MK25 EVO/A700 CARBON BLACK TECH

All the features and breathing performance of the MK25 EVO/A700 with the addition of a Black Tech coating that protects both stages against the ravages of salt water and corrosion. This rugged coating includes an inner layer of nickel (FDA approved) and an outer glossy DLC (Diamond Like Carbon) coated body. It lends a technical look while maintaining a sleek scratch-resistance appearance that lasts. The second stage's handmade full carbon fiber front cover provides excellent shock resistance along with 32 grams of weight savings compared to the standard metal cover.

MK25 EVO BT FIRST STAGE

- Air-balanced flow-through piston in a nickel plated brass body coated with DLC process, provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Intermediate pressure: 9.2-9.8 bar
- Weight: INT 232 791g; DIN 300 567g

A700 CARBON BT SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- DLC Black Tech coating on the metal body offers anti-scratch resistance and a glossy black look
- Handmade full carbon fiber front cover provides excellent shock resistance, plus the 32-gram weight savings (compared to the standard metal cover) increases comfort and reduces jaw stress
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece) 227g.

MK25 EVO/A700

SCUBAPRO's flagship regulator system is designed for divers who want the best. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The A700 offers effortless inhalation and an ease of exhalation that is unmatched in a precision-handcrafted, full-metal package. Together they provide unparalleled breathing performance in all water temperatures.

XTIS EXTENDED THERMAL INSULATING SYSTEM

MK25 EVO FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Intermediate pressure: 9.2-9.8 bar
- Weight: INT 232 790g; DIN 300 570g

A700 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Rugged full-metal case, front cover and valve housing (barrel) are able to withstand years of aggressive diving
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece) 261g.

MK19 EVO/A700

The MK19 EVO / A700 takes our extraordinary breathing A700 and pairs it with an environmentally sealed MK19 EVO first stage that's extremely resistant to freezing and fouling of its inner mechanism. The MK19 EVO offers a dry ambient pressure chamber that is equipped with a double spring for optimum reliability, and a LP port swivel turret to maximize hose routing options. The muscular A700, with its precision handcrafted full-metal casing, front cover and valve housing, offers best-in-class breathing performance, including effortless inhalation and an ease of exhalation that is unmatched.

MK19 EVO FIRST STAGE

- Designed to be the ultimate first stage for cold water or contaminated diving conditions.
- Its design makes it substantially smaller and lighter than the original MK19.
- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Its dry chamber is equipped with a double spring, making it more compact and reliable.
- Two opposing high-pressure ports allow the first stage to be positioned either up or down, plus provide for an optimum hose/transmitter layout.
- Swivel turret comes with four High-Flow LP ports plus one axial Super High-Flow LP port to maximize hose routing options.
- Compact size, light weight and superb breathing performance continue in the best SCUBAPRO regulator tradition.
- Ideal first stage for recreational, technical, professional and military divers.
- Weight: INT 232, 885g; DIN 300, 665g
- Intermediate pressure (bar): 9.2-9.8

A700 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Rugged full-metal case, front cover and valve housing (barrel) are able to withstand years of aggressive diving
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece) 261g.

MK25 EVO T/S620 X-Ti

SCUBAPRO teams its high performance titanium first stage with an air-balanced second stage. The MK25 EVO T is machined from a solid block of titanium which will not corrode, even in concentrated saltwater conditions. It offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand.

The S620 X-Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 X-Ti delivers excellent performance; work of breathing has been reduced by 37% over the S600, providing effortless airflow under all dive conditions. In addition to the valve inlet tube in titanium, the X-Ti also features the cover on the cap and the rings on the hose connection / adjustment mechanism in titanium, which is unique and makes it even lighter , the large purge button improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view. In all water temperatures, in all dive conditions, this reg system is a winner.

XTIS EXTENDED THERMAL INSULATING SYSTEM

MK25 EVO T FIRST STAGE

- Air-balanced flow-through piston in a full titanium body provides effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Weight: DIN 300: 350g
- Intermediate pressure: 9.2-9.8 bar

S620 X-TI SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability
- Uses the S600's large diaphragm inside a compact casing for maximum breathing sensitivity
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever
- The exhaust tee increases performance while directing bubbles out of the field of view
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable compact orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 168g

MK25 EVO/S620 Ti

SCUBAPRO teams its high performance first stage with an air-balanced second stage. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand.

The S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 Ti delivers excellent performance; work of breathing has been reduced by 37% over the S600, providing effortless airflow under all dive conditions. The full titanium inlet tube is ultra-light, the large purge button improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view. In all water temperatures, in all dive conditions, this reg system is a winner.

MK25 EVO FIRST STAGE

- Air-balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate

MK19 EVO/S620 Ti

The compact, lightweight MK19 EVO, with its environmentally sealed system, dry ambient pressure chamber and user-friendly LP port swivel turret, is the ideal first stage for cold water and harsh diving conditions. The smooth-breathing S620 Ti, embracing the best features of SCUBAPRO's renowned S600 in an upgraded design that delivers 37% lower work of breathing, is a proven performer when it comes to providing effortless airflow. Put them together and you have a versatile regulator system that can be counted on to deliver top-line performance in all dive conditions.

MK19 EVO FIRST STAGE

- Designed to be the ultimate first stage for cold water or contaminated diving conditions.
- Its design makes it substantially smaller and lighter than the original MK19.
- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate

MK17 EVO 2 /S620 Ti WINTER 2024/25

new

For compact comfortable breathing performance in cold or silty water, the MK17 EVO 2/S620 Ti regulator system simply can't be beat. The MK17 EVO 2 is more compact and lighter weight than its MK17 EVO predecessor and the MK19 EVO with a **NEW** forged body, dry chamber with a twin spring layout for increased reliability and compactness. The S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 Ti delivers excellent performance providing effortless airflow under all dive conditions. The full titanium inlet tube is ultra- light, the large purge cover improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view.

PRICES	€
MSRP	810,00

PART NUMBER	DESCRIPTION
12.170.000	INT 232
12.170.300	DIN 300

MK17 EVO FIRST STAGE

- **NEW** design allows it to be substantially smaller and lighter than the MK17 EVO and the MK19 EVO.
- Design is based on a forged brass body and a dry chamber with a twin spring layout for compactness and reliability.
- Sealed balanced diaphragm design makes for the ultimate compact first stage for cold water or contaminated diving conditions.
- Air-balanced diaphragm delivers consistent and effortless airflow, regardless of depth, tank pressure, or breathing rate.
- Dry chamber is completely environmentally sealed with a unique dual diaphragm system that keeps out contaminated water. The rib is designed to enhance heat exchange, making the first stage cold water-proof.
- Two opposing high-pressure ports positioned on a 15° angle allow the first stage to be positioned either up or down, plus provide an optimal hose/transmitter layout.
- Due to the high-pressure port positioning, a transmitter adapter is not needed.
- Weight: INT 232: 797g ; DIN 300: 572g
- Intermediate pressure (230 bar): 9.2-9.8

S620 TI SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving.
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability.
- Uses the S600's large diaphragm inside a compact casing for maximum breathing sensitivity.
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity.
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever.
- The exhaust tee increases performance while directing bubbles out of the field of view.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.

XTIS
EXTENDED THERMAL INSULATING SYSTEM

MK25 EVO FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Airflow at 200 bar: >8500 l/min
- Intermediate pressure: 9.2-9.8 bar
- Weight: INT 232 790g; DIN 300 570g

S600 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths
  and supply pressures
- Metal valve housing (barrel) is able to withstand years of aggressive diving
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 200g.

MK17 EVO 2/S600 WINTER 2024/25 new

The MK17 EVO 2/S600 features a **NEWLY** designed sealed diaphragm first stage and an air-balanced second stage with years of proven performance under its belt. The MK17 EVO 2 is more compact and lighter weight than its MK17 EVO predecessor and the MK19 EVO with a **NEW** forged body, dry chamber with a twin spring layout for increased reliability and compactness. The S600, with its rugged reinforced technopolymer casing and stainless steel front face and ring, provides a steady, effortless flow of air, regardless of depth or water temperature, in the most demanding dive conditions.

MK17 EVO FIRST STAGE

- **NEW** design allows it to be substantially smaller and lighter than the MK17 EVO and the MK19 EVO.
- Design is based on a forged brass body and a dry chamber with a twin spring layout for compactness and reliability.
- Sealed balanced diaphragm design makes for the ultimate compact first stage for cold water or contaminated diving conditions.
- Air-balanced diaphragm delivers consistent and effortless airflow, regardless of depth, tank pressure, or breathing rate.
- Dry chamber is completely environmentally sealed with a diaphragm that keeps out contaminated water. The rib is designed to enhance heat exchange, making the first stage cold water-proof.
- Two opposing high-pressure ports positioned on a 15° angle allow the first stage to be positioned either up or down, plus provide an optimal hose/transmitter layout.
- Due to the high-pressure port positioning, a transmitter adapter is not needed.
- Weight: INT 232: 797g ; DIN 300: 572g
- Intermediate pressure (230 bar): 9.2-9.8

S600 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures
- Metal valve housing (barrel) is able to withstand years of aggressive diving
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 200g.

MK17 EVO/S600

Teaming SCUBAPRO's best-selling second stage with its environmentally sealed first stage creates a reliable air delivery system for all diving conditions. The MK17 EVO is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. It is more compact yet delivers better breathing performance than its predecessor. Its improved internal design allows more airflow from the LP ports which have been reconfigured for better hose routing. The S600, with its rugged fiberglass rugged fiberglass reinforced nylon casing and stainless steel front face front face, provides a steady, effortless flow of air, regardless of depth.

MK17 EVO FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Dry ambient pressure chamber increases freezing resistance, ensuring consistent airflow in the coldest conditions.
- Substantial increase in airflow -- 6900 l/min versus 6500 l/min -- includes improved balance of air supply pressure.
- Two high pressure and four high-flow low pressure ports maximize air delivery.
- High-flow performance is available from all four LP ports which are configured for optimum hose routing.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Weight : INT 232: 860g; DIN 300: 640g
- Intermediate pressure: 9.2-9.8 bar

S600 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures
- Metal valve housing (barrel) is able to withstand years of aggressive diving
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 200g.

MK25 EVO BLACK TECH/G260 CARBON BLACK TECH

An upgrade to our popular G260 technical diving system, the MK25 EVO BT/G260 Carbon BT regulator system delivers superior durability with a carbon fiber cover and Black Tech finish. The balanced piston MK25 EVO BT offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The G260 Carbon BT, with its large diaphragm, internal metal components and high-flow exhaust valve for excellent breathing sensitivity and resistance to freezing, ratchets up its ruggedness with the addition of a carbon fiber front cover. Lightweight and extremely durable, carbon fiber can resist substantial shocks without damage. Both first and second stages feature a Black Tech scratch-resistant coating on metal parts that protects against the ravages of salt water and corrosion. Also included is a zippered fabric bag complete with specially fitted padding to protect the regulator during storage and transport.

XTIS EXTENDED THERMAL INSULATING SYSTEM

MK25 EVO FIRST STAGE

- Air-balanced flow-through piston in a nickel plated brass body coated with DLC process, provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Intermediate pressure: 9.2-9.8 bar
- Weight: INT 232 790g; DIN 300 570g

G260 SECOND STAGE

- Stylish and durable carbon fiber front cover and reinforced technopolymer casing are able to withstand years of aggressive diving.
- Lightweight carbon fiber design is 24 grams lighter than the standard G260, making it more comfortable for those long diving days.
- Durable Black Tech DLC coating on metal parts protects against the ravages of salt water and corrosion as well as minor scratches.
- Internal metal components, including air barrel and valve inlet tube, increase resistance to freezing when diving in extreme conditions.
- Air-balanced valve evens out the inhalation effort at varying depths and supply pressures.
- Water circulation holes in the front cover enhance underwater breathing smoothness.
- High-flow exhaust valve reduces exhalation effort for better overall breathing comfort.
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus.
- Large spring-based purge button is easy to use, even when wearing thick gloves.
- Reversible LP hose attachment makes it easy to adjust hose routing for any diving configuration.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Includes a zippered fabric bag
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water
- Weight (without mouthpiece): 244g.

MK19 EVO BLACK TECH/G260 CARBON BLACK TECH

This premium system features SCUBAPRO's MK19 EVO, finished in a special ultra-durable Black Tech coating, along with an upgraded version of SCUBAPRO's most popular tech diving second stage, the G260. While retaining its large diaphragm, internal metal components and high-flow exhaust valve for excellent breathing sensitivity and resistance to freezing, the G260 Carbon BT ratchets up its ruggedness and durability with the addition of a carbon fiber front cover. Lightweight and extremely durable, if dropped or struck against a hard object, carbon fiber can resist substantial shocks without damage. Both first and second stages feature the Black Tech DLC (Diamond-Like Carbon) coating on their metal parts. The MK19 EVO BT/G260 Carbon BT is a rugged, reliable, and sharp-looking regulator system that delivers solid breathing performance in all diving conditions and water temperatures.

MK25 EVO/G260

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold water or technical diving. There's no better example of solid first stage performance in all water temperatures than the MK25 EVO. Teamed with the venerable G260, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

MK25 EVO FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Intermediate pressure: 9.2-9.8 bar
- Weight: INT 232 790g; DIN 300 570g

G260 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Nylon fiberglass design features SCUBAPRO's biggest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water
- Metal components, including metal air barrel and metal valve inlet tube, increase resistance to freezing when diving in extreme conditions
- High-flow exhaust valve reduces exhalation for better overall breathing comfort
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths water conditions and personal tastes
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations

MK19 EVO/G260

The MK19 EVO/G260 is purpose-built for technical diving as well as cave diving. The MK19 EVO offers an environmentally sealed system that is extremely resistant to freezing plus prevents water and pollutants from fouling its inner mechanism, along with a dry ambient pressure chamber equipped with a double spring and a LP port swivel turret to maximize hose routing options. Teamed with the G260, with its metal internal components, high-flow exhaust valve, diving controls and reversible hose attachment, you've got a top-performing regulator system for the most extreme conditions.

MK19 EVO FIRST STAGE

- Designed to be the ultimate first stage for cold water or contaminated diving conditions.
- Its design makes it substantially smaller and lighter than the original MK19.
- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Its dry chamber is equipped with a double spring, making it more compact and reliable.
- Two opposing high-pressure ports allow the first stage to be positioned either up or down, plus provide for an optimum hose/transmitter layout.
- Swivel turret comes with four High-Flow LP ports plus one axial Super High-Flow LP port to maximize hose routing options.
- Compact size, light weight and superb breathing performance continue in the best SCUBAPRO regulator tradition.
- Ideal first stage for recreational, technical, professional and military divers.
- Weight: INT 232, 885g; DIN 300, 665g
- Intermediate pressure: 9,2–9,8 bar

G260 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Nylon fiberglass design features SCUBAPRO's biggest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water
- Metal components, including metal air barrel and metal valve inlet tube, increase resistance to freezing when diving in extreme conditions
- High-flow exhaust valve reduces exhalation for better overall breathing comfort
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 268g.

MK17 EVO 2/C370 WINTER 2024/25

new

With the MK17 EVO 2/C370 you have a compact and lightweight regulator system ready to explore dive locales all over the world. The MK17 EVO 2 is more compact and lighter weight than its MK17 EVO predecessor and the MK19 EVO, thanks to a **NEW** forged body, dry chamber with a twin spring layout for increased reliability and compactness. Small but powerful when it comes to air delivery, the C370 offers convenient user controls include a diver-adjustable inhalation effort knob, a coaxial dive/pre-dive lever and a large, easy-to-activate purge button. The MK17 EVO2/C370 is the regulator system of choice for any dive bag and any recreational dive scenario.

MK17 EVO FIRST STAGE

- **NEW** design allows it to be substantially smaller and lighter than the MK17 EVO and the MK19 EVO.
- Design is based on a forged brass body and a dry chamber with a twin spring layout for compactness and reliability.
- Sealed balanced diaphragm design makes for the ultimate compact first stage for cold water or contaminated diving conditions.
- Air-balanced diaphragm delivers consistent and effortless airflow, regardless of depth, tank pressure, or breathing rate.
- Dry chamber is completely environmentally sealed with a unique dual diaphragm system that keeps out contaminated water. The rib is designed to enhance heat exchange, making the first stage cold water-proof.
- Two opposing high-pressure ports positioned on a 15° angle allow the first stage to be positioned either up or down, plus provide an optimal hose/transmitter layout.
- Due to the high-pressure port positioning, a transmitter adapter is not needed.
- Weight: INT 232: 797g ; DIN 300: 572g
- Intermediate pressure (230 bar): 9.2-9.8

C370 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Compact, rugged fiberglass-reinforced nylon casing takes up little space in a dive bag.
- Stainless steel frame on the front cover adds the SCUBAPRO C-Series signature.
- Exhaust tee contributes to better work of breathing.
- User controls include a diver-adjustable inhalation effort knob and coaxial dive/pre-dive lever.
- Large purge button is easy to activate, even wearing thick gloves.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from smallest to largest.
- CE certified to EN250A European Standards for all diving conditions, including extreme cold water.
- Weight: 171g.

MK17 EVO/C370

This reg system combines SCUBAPRO's premium diaphragm first stage with its lightest air-balanced second stage. The MK17 EVO is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. It is more compact yet delivers better breathing performance than its predecessor. Its improved internal design allows more airflow from the LP ports which have been reconfigured for better hose routing. The C370 brings forth the best features of its predecessor, while adding a balanced valve to its design. Its exhaust tee contributes to an improvement in work of breathing. It's a smart reg system for all kinds of diving applications.

MK17 EVO FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism
- Dry ambient pressure chamber increases freezing resistance, ensuring consistent airflow in the coldest conditions
- Two high pressure and four high-flow ports maximize air delivery and hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Weight INT 232: 860g; DIN 300: 640g
- Intermediate pressure: 9.2-9.8 bar

C370 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Compact, rugged fiberglass-reinforced nylon casing takes up little space in a dive bag.
- Stainless steel frame on the front cover adds the SCUBAPRO C-Series signature.
- Exhaust tee contributes to better work of breathing.
- User controls include a diver-adjustable inhalation effort knob and coaxial dive/pre-dive lever.
- Large purge button is easy to activate, even wearing thick gloves.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from smallest to largest.
- CE certified to EN250A European Standards for all diving conditions, including extreme cold water.

MK11 EVO/C370

The MK11 EVO/C370 is made for new divers, travel divers and avid recreational divers looking for a compact regulator system that delivers top performance and reliability. The balanced diaphragm MK11 EVO is more compact than its MK11 predecessor, with a forged brass body, thermal fins and protective plastic bumpers to ward off scratches. It features an innovative double spring layout that contributes to overall compactness while improving reliability. The two HP ports are set on a 15-degree angle for more comfortable hose routing, and the four LP ports are all high-flow. The compact C370 is small but mighty when it comes to air delivery. Its convenient user controls include a diver-adjustable inhalation effort knob, a coaxial dive/pre-dive lever and a large, easy-to-activate purge button. The MK11 EVO/C370 is a dependable, go-anywhere air delivery system that makes diving fun, wherever your travels take you.

MK11 EVO FIRST STAGE

- Air-balanced diaphragm design is more compact while delivering better performance than its MK11 predecessor.
- Forged brass body comes with metal fins to improve thermal exchange plus plastic bumpers to prevent scratching.
- Two high pressure ports are set on a 15-degree angle for convenient hose routing.
- Four high-flow low pressure ports increase airflow while maximizing hose routing options.
- Innovative double spring layout increases performance while contributing to overall compactness.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Weight: INT 232 : 746g ; DIN 300 : 528g
- Intermediate pressure (230 bar): 9.2 – 9.8

C370 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Compact, rugged fiberglass-reinforced nylon casing takes up little space in a dive bag.
- Stainless steel frame on the front cover adds the SCUBAPRO C-Series signature.
- Exhaust tee contributes to better work of breathing.
- User controls include a diver-adjustable inhalation effort knob and coaxial dive/pre-dive lever.
- Large purge button is easy to activate, even wearing thick gloves.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from smallest to largest.
- CE certified to EN250A European Standards for all diving conditions, including extreme cold water.

MK11 EVO/S270 WINTER 2024/25 new system

Recreational divers looking for solid performance in a regulator system are going to love the MK11 EVO/S270. The **NEW** balanced diaphragm MK11 EVO first stage is more compact than its MK11 predecessor, with a forged brass body, thermal fins and protective plastic bumpers to ward off scratches. It features an innovative double spring layout that contributes to overall compactness while improving reliability. The MK11 EVO's two HP ports are set on a 15-degree angle for more comfortable hose routing, and the four LP ports are all high-flow. The S270 second stage features an air-balanced design whose compact casing and internal aerodynamics produce extremely low work of breathing. Delivering smooth breathing performance in a bulletproof anti-scratch design, the S270 comes with a dive/predive switch, an effective purge, and a compact exhaust tee that minimizes exhalation effort. CE certified for all diving conditions including cold water, this compact reg combination is a must-have addition to any dive bag.

12.179.300	DIN 300

MK 11 EVO FIRST STAGE

- **NEW** air-balanced diaphragm design is more compact while delivering better performance than its MK11 predecessor.
- **NEW** forged brass body comes with metal fins to improve thermal exchange plus plastic bumpers to prevent scratching.
- Two **NEW** high pressure ports are set on a 15-degree angle for convenient hose routing.
- Four **NEW** high-flow low pressure ports increase airflow while maximizing hose routing options.
- Innovative double spring layout increases performance while contributing to overall compactness.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- CE certified to EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (g): INT 232, 746; DIN 300, 528
- Intermediate pressure (230 bar): 9.2 – 9.8

S270 SECOND STAGE

- Air-balanced valve smooths out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch is easy to use even wearing thick gloves.
- More compact, lighter weight and better breathing performance than its S560 predecessor.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- The exhaust tee is compact and very efficient in minimizing exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved silicone, and features a large cross-section to maximize airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.
- Weight (without mouthpiece): 145g.

MK11/S270

The S270 is available with a MK11 first stage for divers seeking an air-balanced diaphragm design delivering effortless airflow unaffected by depth, tank pressure or breathing rate. The air-balanced S270 provides smooth breathing performance in a bulletproof anti-scratch design that's able to handle years of hard use. It comes with a dive/predive switch, an effective purge, and a compact exhaust tee that minimizes exhalation effort.

MK11 FIRST STAGE

- Air balanced diaphragm design delivers constant and effortless airflow unaffected by depth, tank pressure or breathing rate
- Two high pressure, two low pressure and two high-flow LP ports maximize hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Weight: INT 232: 710g; DIN 300: 490g
- Intermediate pressure: 9.2-9.8 bar

S270 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch is easy to use even wearing thick gloves.
- More compact, lighter weight and better breathing performance than its S560 predecessor.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- The exhaust tee is compact and very efficient in minimising exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved (food grade) silicone, and features a large cross-section to maximize airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.
- Weight (without mouthpiece): 145g.

MK2 EVO/S270

Recreational divers looking for solid performance in a regulator system and ready to step up from their entry-level systems are going to love the MK2 EVO/S270. The S270 second stage features an air-balanced design that's patterned after the popular S620 Ti, whose compact casing and internal aerodynamics produce extremely low work of breathing. Designed to last in tough conditions, a fiberglass-reinforced nylon core combined with a PU outer layer result in a bulletproof anti-scratch casing. In addition to breathing performance, the S270 offers an effective purge and a dive/predive switch that's easy to use even wearing thick gloves. The exhaust tee is compact and efficient in minimising exhalation effort. Teamed with SCUBAPRO's classic MK2 EVO, the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions, this regulator combo is affordable and durable while delivering smooth and reliable breathing performance. In addition to recreational divers, the MK2 EVO/S270 is a great choice for rental, training and professional divers seeking solid performance from a durable regulator system.

MK2 EVO FIRST STAGE

- Classic downstream piston design features a chrome-plated marine-grade brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance.
- Chrome-plated marine-grade brass body is smaller than its predecessor but houses an oversized piston that provides better breathing performance by increasing airflow.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Meets EN250-2014 standards for cold-water breathing performance.
- Weight (g): INT 232, 670; DIN 300, 450.
- Intermediate pressure (bar): 9.5-10.

S270 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch is easy to use even wearing thick gloves.
- More compact, lighter weight and better breathing performance than its S560 predecessor.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- The exhaust tee is compact and very efficient in minimising exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved (food grade) silicone, and features a large cross-section to maximize airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.

MK2 EVO/R105

Simple and reliable, the MK2 EVO/R105 is the regulator system of choice for diving schools, rental centres and new divers, as well as avid recreational divers looking for a basic backup breathing system. It offers smooth dependable air delivery and is built to last. The compact casing is based on the S620 Ti with an anti-scratch front cover and a metal classic downstream valve design. Included is a dive/pre-dive VIVA switch plus a soft, co-molded purge button for easy purging, and left or right hose routing for use on stage or pony bottles. Teamed with SCUBAPRO's classic MK2 EVO, the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions, this regulator combo is durable, reliable and affordable.

MK2 EVO FIRST STAGE

- Classic downstream piston design features a chrome-plated marine-grade brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance.
- Chrome-plated marine-grade brass body is smaller than its predecessor but houses an oversized piston that provides better breathing performance by increasing airflow.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Meets EN250-2014 standards for cold-water breathing performance.
- Weight: INT 232, 670 g / DIN 300, 450 g.
- Intermediate pressure (bar): 9.5-10.

R105 SECOND STAGE

- Classic downstream valve comes with a dive/pre-dive VIVA switch to control free flows.
- Metal valve housing is built rugged and increases overall reliability.
- Reversible hose attachment makes it easy to use for side mount, pony or deco tanks.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 156 g.

S270 OCTOPUS

The S270 Octopus is tough, reliable, and easy to use. Its air-balanced design can be counted on to deliver top-notch breathing performance when you need it most.

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch prevents free flows when not being used.
- Exhaust tee is compact and very efficient in minimising exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved silicone and features a large cross-section to maximize airflow.
- High-viz yellow front cover stands out, making it easy to spot when needed.
- High-viz yellow super-flow hose is 39in/1m long with an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.

MK25 EVO/S270 NITROX

For technical divers who need a dedicated nitrox delivery system that is certified for air mixes up to 100% oxygen, there's the MK25 EVO/S270 Nitrox. The air-balanced S270, with its PU green cover devoted specifically to this nitrox version, provides smooth and consistent airflow in a bulletproof anti-scratch design that's able to stand up to years of rugged use. Features include a dive/predive switch, an effective purge and a compact exhaust tee minimizes exhalation effort. And there's no better example of solid first stage performance than the time-tested MK25 EVO, with its excellent resistance to freezing, superb inhalation sensitivity and instant delivery of nitrox mixes. Complying with the most stringent safety norms, you simply won't find a more reliable nitrox breathing system for all diving conditions and water temperatures than this regulator combo.

All Nitrox certified SCUBAPRO regulators are suitable for use with air mixes up to 100% oxygen.

MK19 EVO

SCUBAPRO engineers have taken some of the best features from our past air-balanced first stages and created the MK19 EVO. With its chrome-plated marine-grade brass body, it is environmentally sealed, preventing water and pollutants from entering the inner mechanism. The MK19 EVO adopts a dry ambient pressure chamber that enhances freezing resistance while ensuring consistent airflow and maximum durability in the coldest conditions. With a swivel turret and five LP ports which maximize hose routing options, this first stage is built not only for professional, military and technical divers, but also for recreational divers who need superb cold water performance in a lightweight, small, compact size.

MK17 EVO 2 WINTER 2024/25 new

For years, the MK17 line has been SCUBAPRO's flagship sealed diaphragm first stage. In its latest evolution, the MK17 EVO 2 takes performance, reliability, compactness and freezing resistance to the next level, creating one of the best SCUBAPRO sealed diaphragm first stages ever. More compact and lighter weight than its MK17 EVO predecessor and the MK19 EVO, the MK17 EVO 2 has a **NEW** forged body, dry chamber with a twin spring layout for increased reliability and compactness. The two **newly** designed HP ports lay on a specific 15-degree angle to make HP hose routing easier. This also eliminates the need for a transmitter adapter – a SCUBAPRO transmitter can now be attached directly to the first stage.

This excellent BC inflator/reg is in its 5th generation with dramatically improved work of breathing. Sleek ergonomic inflate/deflate controls allow for pinpoint buoyancy control.

- Test-proven breathing performance and cracking effort surpasses many traditional downstream second stages when it comes to ease of breathing
- Dive/pre-dive switch lets you detune the unit when not in use, eliminating free flows.
- Flexible purge cover is easy to locate and depress for quick clearing
- Power inflate and deflate buttons are positioned on top of the housing for easy buoyancy control
- Power inflate button features a lighter lever for easy inflation
- Power inflate and deflate buttons can be differentiated by color and touch due to their different shapes and sizes, improving ascent control and safety when inflating or deflating the BC
- CE certified (EN250A>10°C/50°F warm water test) as a second stage regulator

DECALCON – EQUIPMENT CLEANER

- For ultrasonic and traditional cleaning
- Suitable for ultrasonic and traditional cleaning methods in a dipping bath.
- For cleaning metallic components (except PU coated springs and 1st stages made of UL alloy).
- Compatible and tested up to 100% O2.
- Compatibility of the cleaning agent showed no negative influence on the materials used in tests carried out by the SCUBAPRO R&D laboratory.

CORE FEATURES FOR SCUBAPRO DIVE COMPUTERS

MICROBUBBLE LEVELS: A range of microbubble levels allows your body to either take up less nitrogen or off-gas more before returning to the surface. Both work toward reducing the amount of micro-bubbles present in the body at the end of the dive.

PREDICTIVE MULTI-GAS (PMG): Lets you enjoy the full benefits of carrying high-oxygen-concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly.

CONTINUOUS AVERAGE DEPTH READING: Available in gauge mode and can be reset by the user anytime.

PROFILE-DEPENDENT INTERMEDIATE STOPS (PDIS): Calculates an intermediate decompression stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives, and breathing mixes.

ENRICHED AIR (NITROX): 21%-100%. The ppO2 is adjustable between 1 and 1.6 bar.

GAUGE MODE: Turns off all warnings and alarms (except low- battery alerts) and monitors depth, time, and temperature without decompression calculations.

LOGBOOK: Records depth, temperature, and heart rate profiles with a 4-second sampling rate, which can be downloaded to a phone, handheld device or PC/Mac.

FREEDIVING MODE: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialized alarms and warnings, adjustable water density, and specific logbook. (Not available on the G2 Console or Aladin H.)

ALTIMETER: Measures altitude and alerts you when approaching an altitude incompatible with saturation status after a recent dive.

BOOKMARK: Allows you to highlight specific moments with a simple button press.

ACTIVE BACK LIGHT: With push-on and push-off function.

REPLACEABLE BATTERY: By user or dealer.

05.103.109	G3 CHARGING DONGLE	65,00

The Galileo 3 (G3) is SCUBAPRO's premium watch-style dive computer, combining a sleek design and color display with a classic timepiece look. The G3's vibrant, high-contrast full-color display offers easy readability and a backlight for excellent visibility in all conditions. Utilizing Galileo's trusted menu design and four button control, it's extremely intuitive to navigate through dive modes, two algorithm choices, screen styles and other personalized dive management options. Powered by a rechargeable lithium battery and built to last with a stainless steel housing, the G3 delivers everything you need in a dive computer with the comfort and style of an everyday wristwatch.

- Modern watch-style dive computer with a classic timepiece look.
- Vibrant high-contrast full-color display and backlight provide excellent readability in all conditions.
- Robust stainless steel housing and scratch-resistant sapphire glass display for diving up to 300 meters in Gauge Mode. Ergonomic design features rounded case back and edges making it comfortable to wear.
- Stainless steel rotatable timing bezel features self-luminescent digits and markers to increase visibility in lowlight conditions. In Gauge mode, the bezel can be used to set and track your dive time.
- Intuitive Galileo full text menu design and four button controls make it easy to navigate through the system. Menu available in 6 languages: English, Spanish, French, German, Italian and Dutch.
- Choice of 2 selectable algorithms: Predictive Multi-Gas Bühlmann ZHL-16 ADT MB PMG or ZHL-16 GF (Gradient Factors).
- 3 dive modes: Scuba, Gauge & Apnea. In Scuba mode, four settings available: Trimix, CCR, Sidemount & PMG.
- Pair up to 8 nitrox/trimix tanks (PMG) plus a diluent tank in CCR and a pony bottle to handle any recreational or technical diving scenario.
- Compatible with SCUBAPRO SMART+ & SMART+PRO transmitters for hoseless tank pressure monitoring.
- Sport mode offers a swim stroke counter, activity counter (pedometer) and stopwatch for topside sports.
- Wireless air Integration monitors tank pressure plus provides true remaining bottom time (RBT) and allows air consumption to be factored into the decompression calculation.
- Personalized dive management functions include PDIS (Profile Dependent Intermediate Stops) which calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving. Also, Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Optional Heart Rate Monitoring (05.060.020 - sold separately) lets you track your heart rate while diving or when engaged in topside sports. While diving, your heart rate and skin temperature can be factored into the workload of the adaptive algorithm to help make your dive safer and more enjoyable.
- Choice of screen display configurations lets you customize your data presentation with Light or Classic screen options to suit your individual diving style
- 3D digital tilt-compensated compass features a top view full compass rose display.
- Smart notifications such as emails, texts, media player controls and alerts when paired with a compatible iPhone
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated with LogTrak 2.0 iOS or Android app.
- Built to last with a TFT LCD display, sapphire glass lens, and a stainless steel housing.
- Rechargeable lithium battery provides up to 30 hours per charge depending on dive and watch settings being utilized.
- Comfortable 22mm black silicone strap included. Interchangeable accessory bands are available to match your style - **SEE P61**
- Dimensions: Diameter 47.2 mm (screen 30.9mm). Height 17mm
- Maximum Operating Depth : 300m in Gauge Mode.

GALILEO HUD IS A "HANDS-FREE COMPUTER"
Galileo HUD, the revolutionary mask-mounted, hands-free dive computer with a virtual floating heads-up display, giving you more freedom to experience your dive.

- Delivers constant, easily viewable, critical dive information without taking your eyes off the dive
- All the important dive information you expect from the Galileo 2 Dive Computer in a convenient heads-up display
- Quickly find information and personalize settings for any dive, using the intuitive, single-knob input menu
- A flip-up hinge allows you to easily tilt the computer up and out of view
- Predictive algorithms and decompression calculations can be customized for all skill levels, from beginner to advanced

05.110.101

The Galileo HUD is an innovative and thoroughly unique air-integrated dive computer. This technologically-advanced computer offers a heads-up display mounted on a dual-lens mask. It delivers excellent readability along with hands-free data monitoring, creating a user experience unlike anything previously seen in diving.

Hands-free data monitoring is a boon to photographers or anyone engaged in underwater activities that require both hands, including military and public safety divers.
Micro OLED display uses near-eye optics to create a screen image that appears at a virtual distance of approximately 1m, making it easy to monitor your dive data without losing eye contact with your dive surroundings.
Intuitive push-wheel allows you to access and control HUD functions with one hand. Simply rotate and press – couldn't be easier.
Convenient flip-up feature, reminiscent of military night vision goggles, enables you to tilt the HUD display up and out of the way. When it's time to resume data monitoring, flip the display back into position and you're ready to track your dive.
Compatible with a variety of SCUBAPRO masks, including the Spectra, Spectra Mini, D-Mask (special mount - part number 24.257.001), Zoom (special mount - part number 25.157.200), Frameless (HUD - part number 24.343.100), Synergy Twin, Ecco Mask, Vibe 2

05.055.020

05.055.040

05.060.020

- Lightweight (neutrally buoyant) and easily mountable to a dual-lens mask.
- Hinge mechanism allows you to easily flip up the HUD when not in use.
- Intuitive menu structure and push-wheel interface make for effortless navigation through the system.
- Full-Color OLED 96x64p display
- Choice of 2 algorithms: Predictive Multi-Gas Bühlmann ZH-L16 ADT MB PMG, or ZH-L16 GF.
- PMG algorithm offers Microbubble levels and Profile Dependent Intermediate Stops (PDIS).
- Selectable dive modes: SCUBA, Gauge, Apnea and CCR.
- Trimix and Nitrox compatible, with advanced CCR functionality.
- Up to 8 selectable gases in SCUBA mode, plus oxygen and diluent in CCR mode and 2 changeable set points for CCR diving.
- Compatible with SCUBAPRO SMART+ & SMART+PRO transmitters for hoseless tank pressure monitoring.
- Provides true remaining bottom time (RBT) based on the workload from breathing.
- 3D full-tilt digital compass allows you to store 3 pre-programmed headings.
- Includes built-in GPS for surface navigation.
- Maximum operating depth: 120m.
- Rechargeable battery provides up to 20 hours of dive time per charge in normal dive mode and 27 hours of dive time in Power Save mode.
- 2GB memory stores 10,000 hours of diving.
- USB Cable or Bluetooth: Easily download dive data wirelessly to your phone or handheld device.
- Compatible with Windows, MAC, Apple and Android devices using LogTRAK.

With all of its features, its ease of use, its screen options, plus the ability to use as much or little of the technology as you want, the G2 is poised to become the favourite computer for divers of all skill levels, from beginner to tech diver. The G2 is designed go anywhere – open water to freediving to CCR to sidemount. And the G2 will grow with the new diver – wherever their passion for diving takes them.

- Same intuitive menu structure, simple 3-button control system, and diver-friendly functions that make the Galileo so easy to use. Enables a seamless transition from the Galileo to the G2.
- Full-Color LCD TFT (Thin-Film Transistor) 5.6cm LCD display screen (320x240p). Produces vibrant colors for maximum readability to quickly direct your attention to what you need to know.
- LCD TFT screens use less energy. More efficient than other screen types to help extend battery life.
- See as much or as little as you like. Choice of screen display configurations. Customize your data presentation with Light, Classic, Full or Graphical screen options to suit your individual diving style.
- Customize menu listings. Use as much or as little of the G2 technology as you need – your choice.
- Multiple Language Choices. Select from more than 19 languages for receiving dive data.
- Microbubble levels let you adjust the algorithm's conservativeness, allowing you to either take up less nitrogen or off-gas more quickly.
- Predictive Multi-Gas ZHL-16 ADT MB algorithm. Advanced Uwatec algorithm programs up to 8 nitrox/trimix mixes to handle any recreational or technical diving scenario.
- Integrated heart rate monitor measures heartbeat and skin temperature and incorporates both into the workload calculations. Integration with the HRM Is exclusive to SCUBAPRO.
- Heart rate monitor also lets you visually track your heart rate "real time" to ensure you stay in your individual target zone to maximize your fun and safety at depth.
- Hoseless air integration. Monitors tank pressure plus provides true remaining bottom time (RBT) and allows air consumption to be factored into the decompression calculation. Provides support for up to 11 transmitters when all features are activated.
- Full tilt digital compass offers a choice of 2 screens with bearing memory. Use the version you like, or use both!
- Rechargeable battery. Provides up to 50 hours of dive time per charge. Battery must be changed by the dealer.
- Huge 485MB memory. Stores pictures, tables, tissue loading status, and 1,000 hours of dive profiles.
- USB cable or Bluetooth Low Energy interface. Easily download dive data wirelessly to your phone or handheld device. Download dive data to a PC/Mac using LogTRAK software.

GALILEO 2 (G2)

PLUS:

- Fiberglass-reinforced thermoplastic slim-line casing. Ultra-durable & UV resistant.
- Curved ergonomic low-profile shape. Sits comfortably on the arm and resists rotating (integrated bungee mounts are provided for tech divers). Can also be used on a retractor.
- Rugged TR 55 transparent thermoplastic lens protects the full color dot matrix TFT display. Features a backlight to enhance low-light readability.
- Sleek, Swiss design. The best elements of the Galileo in an upscale design.
- Stainless steel control buttons (3). Accessible, intuitive, easy to use, even when wearing gloves.
- Multiple dive modes. Scuba, Freediving, Gauge, CCR and Sidemount for total in-water versatility. (Freediving, Trimix, CCR and Sidemount modes are disabled from the factory. Activation is easy – no downloading or upgrading is required.)
- Special apnea logbook. Stores repetitive dives sequentially under the same apnea session.
- Maximum operating depth 120m for reliable data computing regardless of diving situation.

G2 TEK

The G2 TEK is designed specifically for technical divers. While offering all of the easy-to-use features of the highly versatile G2 wrist computer, including wireless air integration, heart rate and skin temperature monitors, a full-tilt digital compass and full-color display, the G2 TEK replaces the Predictive Multi-Gas ZHL-16 ADT MB algorithm of the G2 with the GF PURE algorithm. The Algorithm includes the ability to set Gradient Factors for increased conservatism. The technical diving community, in particular, finds that the Gradient Factors approach best suits their diving needs. In addition, the G2 TEK comes with bungee straps, also preferred by many tech divers in place of the traditional wrist strap, and a blue bezel to differentiate it from the standard G2.

05.080.201

GALILEO 2 (G2) CONSOLE

PART NUMBER	DESCRIPTION	MSRP
05.081.111	G2 CONSOLE (WITH QR AND WITHOUT HRM)	**1075,00**
05.005.001	COMPACT QUICK RELEASE WITHOUT HOSE	**120,00**
06.205.262	G2 CONSOLE PROTECTION FILM	**12,00**

For divers who prefer a console-style dive computer, the G2 Console joins the Galileo family, offering yet another option for handling important dive data. Featuring a cell phone-style portrait-shaped screen, the G2 Console is easy to use, easy to read, and offers a compass with two screen styles. The rugged casing boot protects against bumps and includes hoseguard to safeguard the quick disconnect fitting. Data downloading and analysis is easy with full Android/iPhone/PC/Mac compatibility. The G2 Console is designed to go anywhere, and will grow with the new diver – wherever their passion for diving takes them.

PLUS:

- Cell phone-style screen is familiar and very easy to read at depth.
- Ultra-durable casing boot protects against bumps and includes hoseguard to safeguard the quick disconnect fitting.
- Scuba and trimix modes: (the trimix mode is disabled from the factory. Activation is easy – no downloading or upgrading is required.)

Convenient quick-disconnect fitting. Allows you to detach the computer from your regulator system for easy data downloading, travel and storage.

SCUBAPRO Luna 2.0 is a sleek, intuitive all-purpose dive computer loaded with easy-to-use features. Designed to be one of the thinnest dive computers, the Luna 2.0 offers an oil-filled thermoplastic housing for reliable performance and comfort. Its large modern widescreen features a high contrast black/white LCD display and large characters for easy reading at depth. A simple two-button interface lets you navigate the system with ease, aided by clearly marked screen prompts. You get a choice of ADT and GF algorithms, plus 100% nitrox compatibility and three selectable gases for open circuit diving. Three dive modes are available – Scuba, Apnea and Gauge, along with PDIS and six selectable Microbubble levels.

- Easy-to-use design.
- Oil-filled thermoplastic housing is super thin and sits comfortably on the arm.
- Wide, high-contrast black and white LCD display screen and large characters for easy reading at depth.
- Intuitive menu and two button controls make it easy to navigate through the system.
- Choice of 2 algorithms: Predictive Multi-Gas Bühlmann ZH-L16 ADT MB, or ZH-L16 + GF (Gradient Factor).
- Nitrox compatible (100%) with 3 selectable gases.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives, and breathing mixes for safer diving.
- Six Microbubble levels (L0-L5) let you personalize and adjust the level of conservatism in the ADT algorithm to match your experience level, age and physical conditioning.
- 3 Dive modes: Scuba, Gauge, and Apnea.
- Soft silicone arm strap is comfortable against your wrist
- Durable silicone housing case cover & pre-installed screen protector
- Max Operating Depth (Dive Mode): 394ft/120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.com or the SCUBAPRO LogTRAK 2.0 app.
- CR2450 battery (06.206.132) is user-changeable and rated for up to two years/300 dives.
- Bungee mounts on the corners of the housing allow for alternate securing methods.

05.200.101

LUNA 2.0 AIR INTEGRATED

The SCUBAPRO Luna 2.0 AI is a sleek, intuitive air-integrated dive computer loaded with easy-to-use features. Its wireless air integration feature enables you to monitor tank pressure easily, plus provides true remaining bottom time (RBT) and allows your air consumption to be factored into the decompression calculation. Designed to be one of the thinnest dive computers, the Luna 2.0 AI offers an oil-filled plastic housing for reliable performance and comfort. Its large modern widescreen features a high contrast black/white LCD display and large characters for easy reading at depth. A simple two-button interface lets you navigate the system with ease, aided by clearly marked screen prompts. You get a choice of ADT and GF algorithms, plus 100% nitrox compatibility and three selectable gases for open circuit diving. Three dive modes are available – Scuba, Apnea and Gauge, along with PDIS and six selectable Microbubble levels. The Luna 2.0 AI also offers an optional integrated heart rate monitor that lets you visually track your heart rate and skin temperature to ensure you stay in your individual target zone to maximize fun and safety at depth.

PLUS

- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.
- Optional heart rate monitor (**05.060.020**) records heartbeat and skin temperature that can be factored into the decompression calculation along with workload.

A2

PART NUMBER	DESCRIPTION	MSRP
05.064.300	A2 WITH TRANSMITTER SMART+ PRO	**705,00**
05.064.201	A2 WITHOUT TRANSMITTER	**455,00**
05.055.020	TRANSMITTER SMART+	**270,00**
05.055.040	TRANSMITTER SMART+ PRO	**325,00**
05.060.020	DIGITAL HEART RATE BELT	**128,00**

The A2 is designed for advanced divers and technical divers who appreciate the compactness and convenience of a wristwatch-style dive computer, but demand the kind of features and functions that enable them to excel in their sport. For daily topside use the A2 offers full timekeeping functions and a Sport mode. When it's time to go diving, the A2 offers everything an advanced recreational diver wants, and everything a technical diver needs. It starts with wireless air integration that monitors tank pressure and provides true remaining bottom time. The digital tilt-compensated compass provides easy navigation under water or on the surface. The A2 lets you choose from six Dive modes, including Trimix and CCR, and because it's designed with Human Factor Diving™, it incorporates cutting edge biometrics that enable you to live your life in dive mode. Whatever type of diving you do, the A2 is ready to go there with you.

- Targeted to advanced recreational divers and technical divers as well as CCR divers and freedivers.
- Smart technology wireless air-integration can handle multiple transmitters.
- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.
- Heart rate monitor records heartbeat and skin temperature (with SCUBAPRO HRM Belt only 05.060.020) that can be factored into the decompression calculation along with workload.
- Digital tilt-compensated 3D compass allows for easy navigation.
- Predictive Multi-Gas ZH-L16 ADT MB algorithm accommodates eight gases (21-100% O2) & 2 in CCR mode.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Multiple Dive modes: Scuba, Gauge, Apnea, Trimix, Sidemount, CCR.
- Sport mode offers sport-related functions like a swim stroke counter, activity counter (pedometer) and stopwatch.

PLUS:

- Modern design with full watch functions is perfect for topside time-keeping as well as underwater data tracking.
- High-resolution hybrid matrix display with large numbers is easy to read under water, even in adverse conditions.
- Lightweight design is so comfortable on the wrist you won't want to take it off.
- Intuitive menu and four button controls make it easy to navigate through the system.
- Max Operating Depth: 120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.com.
- CR2450 battery is rated for up to two years/300 dives.
- Included: Protection foil, Quick Card, Arm Strap Extension, Read First (user manual is available online). Optional equipment: transmitter, heart rate belt.

ARM STRAPS COMPATIBLE WITH G3 / A2 / A1 - SEE P61

A1

The A1 is a basic entry-level dive computer designed for new divers and casual recreational divers looking for a simple yet versatile wristwatch-style computer that can be worn on the surface as well as under water. The A1 offers full time-keeping functions, and three Dive modes plus a Sport mode. An intuitive menu system and clearly marked button controls make it easy to access and understand all functions. Offering just the right balance of topside features, underwater functions and ease of use, the A1 will quickly become an integral part of not just your diving life, but of your everyday life as well.

- Targeted to new divers and casual recreational divers.
- Modern design is functional and stylish for topside time-keeping as well as underwater data tracking.
- High-resolution matrix display with large numbers is easy to read under water, even in adverse conditions.
- Lightweight design is so comfortable on the wrist you won't want to take it off.
- Intuitive menu and four button controls make it easy to navigate through the system.
- ZH-L16 algorithm accommodates single-gas Nitrox capability from 21% to 100% O2.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

PLUS:

- Full watch functions for topside time-keeping.
- 3 Dive modes: Scuba, Gauge, and Apnea.
- In Sport mode sport-related functions like a swim stroke counter and a stopwatch can be activated.
- Max Operating Depth: 120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scuabpro.com.
- CR2450 battery is rated for up to two years/300 dives.

ALADIN H (MATRIX) WITH QUICK RELEASE

With its compact size, intuitive data display and quick release, the Aladin H (Matrix) is a sharp-looking and full-featured dive computer targeted to avid recreational divers looking for a convenient air-integrated dive computer. Featuring a metallic faceplate and easy-to-read segmented display on top and middle rows, and a matrix display on the bottom row, the Aladin H (Matrix)'s full air integration eliminates the need to carry a separate submersible pressure gauge. With the on-board digital compass and you have an ultra-compact, full-function, hose-attached dive computer.

- **UPDATED** Convenient quick-disconnect fitting allows you to detach the computer from your regulator system for easy data downloading, travel and storage.
- Predictive Multi-Gas ZHL16 ADT MB algorithm accommodates three gases (21-100% O2)
- Fully air-integrated, the algorithm calculates remaining bottom time (RBT) and workload based on breathing rate
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning
- Features a protector boot covering the metal connection between HP hose and dive computer's HP sensor

PLUS:
- Two Dive modes: Scuba, Gauge
- Maximum operating depth: 120m
- Altimeter
- Digital compass, displayed on matrix bottom row
- Active back light
- Saltwater and freshwater settings.
- Visual and audible alarms.
- Adjustable ppO2 from 1.0 and 1.6, and it can be set to off.
- Full watch functions
- Bookmark function
- Lens protection cap

PART NUMBER	DESCRIPTION	MSRP
05.045.110	ALADIN ONE MATRIX WRIST	255,00
05.045.010	ALADIN ONE MX CAPSULE	250,00

An ideal dive computer for diving schools and rental stations, the compact, single mode Aladin ONE Matrix is simple to use, easy to understand, and delivers reliable dive data for enjoyable recreational diving. The essence of simplicity, this is an ideal computer for new divers, and a great backup once you're ready to move up to more advanced dive computing. Available as a wrist mount or as a basic capsule to insert into a two- or three-gauge console.

- Screen features an updated LCD segmented display on the top and middle rows, plus an eye-pleasing matrix display on the bottom row (the same as Aladin SPORT Matrix)
- A Bluetooth Low Energy interface replaces IrDA communication
- 16 tissue compartments algorithm ZH-L16 ADT MB
- Automatic Safety Stop with timer makes it easy to perform safer ascents.
- Two buttons provide easy access to modes and the programming of basic parameters.
- Nitrox compatible 21-50% in 1% increments
- Reset function is ideal for dive rentals
- 12 and 24-hour mode
- Safety stop with timer
- Adjustable ppO2 between 1.0 and 1.6bar
- Saltwater or freshwater modes
- Dive planner with deco
- Visual and audible alarms
- Back light function
- Maximum operating depth: 120m
- CR2450 user replaceable battery rated for two years/300 dives

DIGITAL HEART RATE BELT

PART NUMBER	DESCRIPTION	MSRP
05.060.020	DIGITAL HEART RATE BELT	128,00
05.060.025	SOFT STRAP FOR HEART RATE BELT	40,00

Factoring your heart rate into your decompression calculations helps make diving safer and a lot more fun. A lightweight waterproof ECG (electrocardiogram) transmitter is clipped onto the elastic belt that straps around the chest, directly against the skin. This belt wirelessly transmits your heart rate data to your SCUBAPRO personal dive computer. Data is displayed on the screen, plus is factored into your decompression calculations to create a more personalized dive plan and improve the quality of your diving.

- More comfortable to wear with soft strap
- Easy to use, just strap it on and enjoy the benefits of biometrics
- More reliable ECG transmitter provides a patented skin temperature measurement. Both skin temperature data and heart rate data are factored into your decompression algorithm, making diving safer and more enjoyable
- Compact design saves space in your dive bag
- Convenient clip can be added and removed from the elastic belt so it can be rinsed and dried fully post-diving
- Powered by a user replaceable CR2032 type battery, that lasts for around 50 dive hours or 1 year.
- Heart Rate Belt has an operation depth of 120 meters / 394 feet

- **Compatible with Galileo 3 (G3), HUD, G2 (but not G2 Console), Luna 2.0 and A2 personal dive computers**

SMART + PRO TRANSMITTER

Enjoy the convenience of air integration without the hassle of a dangling hose. This low-profile Smart transmitter greatly improves communication reliability and works with SCUBAPRO's most advanced dive computers. It screws into a high pressure port on your first stage and relays tank pressure and true remaining bottom time (RBT) to the computer screen. The latest version features a built-in LED located at the top of the cap that gives you an estimate of tank pressure when the first stage is attached to a tank. This lets you know if the tank has gas without needing to activate the computer.

- Easy to use, you only need to pair it to your computer once – the first time you use it.
- Coded transmission technology prevents interference between different dive computers.
- Compact size
- Better HP hose routing
- Powered by a user-replaceable CR 2PE/BN 0 lithium battery that's good for two years or 300 hours of diving, whichever comes first.
- More visible LED Indicator Status:
  - 1,450 psi/100 bar and over = Slow Short Blinking Green light
  - Between 1,450 psi/100 bar and 725 psi/50 bar = Short Double Blinking Yellow Light
  - Below 725 psi/50 bar = Long Single Blink Red Light

- **Compatible with the SCUBAPRO G3, HUD, G2, Luna 2.0 & A2 personal dive computers.**

Although targeted primarily to technical divers, the Digital 330M is an ideal initial data delivery system for beginning divers, and a useful backup instrument for any diver. Whatever your skill level, the Digital 330M can be counted on to provide outstanding electronic accuracy in all diving conditions.

- Incorporating state-of-the-art microchip technology, a bevy of information is provided in a compact information center
- Data includes actual and maximum depth, ascent speed, dive time in minutes and temperature
- Auto on/off feature means it's always ready to dive after a quick self-test
- Variable ascent rates are displayed in a percentage and with a fast ascent warning
- Depth-rated to 330m to suit all technical deep-diving scenarios
- Surface interval is displayed for 24 hours for safety and convenience
- Logbook provides data for the last 20 dives to allow for post-dive review and analysis
- Provides automatic altitude compensation when changing dive locations

05.014.110

STANDARD DEPTH GAUGE

PART Nº	DESCRIPTION	MSRP
05.011.111	DEPTH GAUGE	130,00
05.011.011	CAPSULE	110,00

This handy depth gauge features a fluorescent scale, a built-in temperature gauge and fits nicely on a comfortable wrist strap.

- Oil-filled gauge housed in an impact-resistant nylon case
- 60m linear scale features maximum depth indicator for the easy logging of maximum depth
- Bourdon tube design provides precise readings at all depths

PART NUMBER	DESCRIPTION	MSRP
05.023.353	3 GAUGE INLINE CONSOLE	305,00
06.204.408	BOOT ONLY	47,00

This sleek, three-gauge console combines a SCUBAPRO metal pressure gauge, depth gauge (Standard Depth Gauge 60m) and FS-2 compass, creating an easy-to-use, at-a-glance information center.

- Compact pressure gauge (0-400bar) with brass case.
- Oil-filled analog depth gauge with linear Bourdon tube design.
- 35-degree tilt, oil-filled compass.

05.023.353

SCUBAPRO PG DUAL BAR/PSI

Compact, all-metal analog pressure gauge. The dual bar/psi model is ideal for travelling divers and resorts with an international clientele.

- Compact pressure gauge (0-400bar) and (0-6000) psi.
- Dual gauge displays imperial and metric units simultaneously.
- Red zone displays at (0-50 bar) and (0-800 psi).
- Ø 48mm with brass case.

06.203.115	BOOT ONLY	**29,00**
06.204.469	ARMSTRAP	**23,50**

The FS-2 compass provides a unique tilt angle of up to 35 degrees, making it easier to read and operate in almost any position. With a floating magnet separate from the compass rose, the FS-2 has greater operating freedom than conventional compasses. This means you can use the same compass for both Northern and Southern hemispheres, making it the perfect navigation instrument for travelling divers.

- Scratch-resistant and durable oil-filled polycarbonate case
- Highly luminous dial for easy reference in low light conditions
- Side view window for easy and accurate navigation
- Available in a wrist model or in a retractor model

SCUBAPRO LOGTRAK 2.0

SCUBAPRO LogTRAK 2.0 is a cloud-based mobile dive logbook designed for Android and iOS devices. With LogTRAK 2.0 you can download and store your dive logs, easily review key dive data at a glance, analyse dive or sport biometrics, adjust dive computer settings from your mobile device, update dive computer firmware from your mobile device, and much more. Simple and intuitive to use, LogTRAK 2.0 is the perfect way to view your dives, keep them organized on your mobile device and easily access them wherever you go. You can download the application from the App Store for iOS and from the Google Play Store for Android.

HYDROS X

The Hydros X is the world's first front-adjustable BCD to offer a fully injection molded Monprene® thermoplastic shoulders and back pad. This unique feature allows the shoulders to conform to your body like a tailored fit, creating superior comfort. Add the full-sized backpack and stainless steel Super Cinch tank band and you also get excellent stability both on the surface and at depth. The bladder, made out of EndurTex high-tenacity nylon fabric, is extremely lightweight and durable while offering generous lift capacity, aided by lower back bellows. In the event of damage, several components on the Hydros X are detachable and easily replaceable. Its flat-buckled quick-release integrated weight system and rear trim weight pockets work together to offer a more comfortable and balanced ride during your dive. The two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded. Two stainless steel D-rings provide clip-on points for additional gear. In addition, the Hydros X features a Multi-Mount Accessory Matrix with multiple D-Ring and mounting points that easily attach various dive accessories.

- Hydros X is based on the same modular Monprene® shoulders and back pad design made popular by the Hydros Pro back-inflation BCD.
- EndurTex high-tenacity 420 nylon fabric bladder is lightweight yet extremely durable.
- Monprene® thermoplastic shoulders and back pad are extremely resistant to UV, chemicals and abrasion, plus don't absorb water to Minimize drying time.
- Rotating quick-release shoulder buckles allow you to route your shoulder straps to optimize fit.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Integrated front weight system is based on the same Monprene® pockets found on the Hydros Pro.
- Two rear trim pouches help create a comfortable swimming position.
- Two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded.
- Two stainless steel D-rings provide clip-on points for additional gear.
- Includes Multi-Mount Accessory Matrix with multiple D-rings and mounting points that easily attach various dive accessories.
- With Balanced Power Inflator.

HYDROS PRO

THE ABILITY TO CHANGE ANYTHING, CHANGES EVERYTHING.

The HYDROS PRO is a true breakthrough in dive comfort and convenience. The moldable Monprene®, adjustable fit and multi-attachment points combine to make this the most customisable and comfortable BCD ever. Winner of the 2016 Red Dot award for product design, the HYDROS PRO is an incredible feat of SCUBAPRO engineering, built for anyone who loves to dive.

Interchangeable straps, a packable design and an included backpack with room for your entire dive kit make the HYDROS PRO perfect for any destination and any dive.

TECHNICAL INFORMATION

- Ultra Durable: Patented Injection Molded Monprene® Gel Harness is extremely resistant to UV, chemicals and abrasion. The fabric-free harness uses no Hook & Loop or zippers
- Instant Dry: Ideal for travel due to less water retention and lower post-dive weight
- "BCD-4-Life" Modular Design: Customisable to add/remove weight systems, straps and pouches. Extended lifespan due to simplified repairs. Virtually every component, including buckles, can be replaced without stitching
- 3D Ergonomic Design: Conforms to your body shape for maximum comfort
- Lightweight: Advanced materials keep weight low
- Neutrally Buoyant: Near-Zero inherent buoyancy requires less lead, resulting in better buoyancy control and much more enjoyable diving
- Body Grip Gel: Prevents BCD from shifting and riding up
- Dual-Compound Backplate: Provides the ultimate in stability and comfort. Single tank band system allows for easier assembly
- Torso Flex Zone: Auto-adjusts to your torso length for excellent comfort and freedom of movement
- Articulated Shoulder Straps: Allow straps to adjust to your body shape to achieve a snug fit
- Kit-Up Assist: Holds shoulder straps open for easy donning
- Cross-Flow Channel: Unrestricted internal airflow reduces air trapping for enhanced maneuverability and easy deflation at any angle
- 2-Stage Inflation: Tri-bungee system controls air distribution to maintain a compact shape under water and high lift capacity at the surface
- Dorsal Weight-Wing: Anti-abrasion and instant dry. Optimal "Outboard" trim pockets
- Buckle Weight System: Simple, safe and reliable quick-release buckles offer a fixed location for easy one-hand operation
- Multi-Mount Accessory Matrix: Multiple D-Rings and mounting points for a knife + light + SMB + hoses + crotch strap and much more
- Smart-Pack Design: Folding shoulder and waist straps pack into the wing, creating an unbelievably compact package for easy transport and storage
- Bladder constructed of 420 denier nylon for light weight and long-lasting durability
- Not suitable for use with twin cylinders.
- With BPI & corrugated hose

X-BLACK 2024

SCUBAPRO's premium X-Black front-adjustable BCD has earned a stellar reputation among recreational and professional divers for its quality, feature-rich construction and substantial lift capacity. While unchanged in terms of lift and design, the X-Black 2024's bladder is now built with high-quality PU-coated 420 denier nylon on the inside and 840 denier nylon on the outside. These two fabrics are high-frequency welded together and then tested to stand up to scratches and punctures under the most stressful of conditions, delivering a great balance of weight and wear-resistance. The X-Black 2024 comes with four large zippered pockets instead of three. Mounted two per side, they expand cargo capacity while better balancing out the BCD. On the shoulders, the epaulets are now elastic straps instead of hook and loop for better security and durability. The backpack padding includes the classic SCUBAPRO logo, plus the cummerbund and adjustable harness are more streamlined with Airnet® inner lining to enhance comfort and maximize water drainage. Offering an expanded size range and so much more, the X-Black 2024 is the perfect choice for avid recreational divers interested in a premium-quality, feature-rich, high-lift BCD.

- Four large zippered front pockets, two per side, increase cargo capacity while better balancing the BCD.
- Sizes S-> 2XL are CE Certified for use with either a single tank or a twin tank set. Mount twin tanks using the SCUBAPRO Bibo Kit 20.040.000 (sold separately).
- The epaulets are now elastic straps instead of hook and loop for better security and durability.
- Logos on the backpad and right cargo pocket combine for an eye-catching look.
- Airnet® padding aesthetic design on the backpad, adjustable shoulder pads and cummerbund enhances comfort and maximizes water drainage.
- SCUBAPRO's exclusive AirFlex system with expandable rear side lobes, increases lift capacity when needed, and then retracts with red bungees in order to maintain a streamlined shape while diving.
- The Airflex system simplifies buoyancy control and guarantees an extremely stable ride at depth.
- Front-adjustable design provides a stable and comfortable surface floating position thanks to its evenly distributed buoyancy volume.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Small zippered pocket on the front of the cummerbund is great for storing small items.
- Two rear trim weight pockets with buckle closures allow you to achieve a well-balanced swimming position.
- Stainless steel Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Quick-release integrated weight pouches ditch quickly and easily.
- Built-in stainless steel grommets on the left side provide an attachment point for a knife.
- Octopus pocket on right side is perfect for storing a safe second.
- 6 black hard-anodized 50mm aluminum pre-bent D-rings and 2 black hard-anodized 25mm aluminum pre-bent D-rings provide convenient clip-on points for additional gear.
- Bladder is constructed of 840 denier and 420 denier nylon with high-frequency welding for long-term wear.
- Equipped with Balanced Power Inflator (BPI).

SEAHAWK 2

Seahawk 2 is a popular all-purpose BCD features an ergonomic shoulder design with rotating buckles and a soft, reinforced backpack – this makes it much lighter than its predecessor, and extremely easy to fold and pack. The stainless steel Super Cinch tank band is positioned a bit lower than before, and an additional Hook & Loop strap has been added to secure the tank when diving. Other features include a 50mm waist strap with lightweight cam buckle, redesigned cargo pockets and a range of airway and valve fittings. Offering a streamlined shape yet substantial buoyant lift when needed, the Seahawk 2 is the perfect choice for divers looking for freedom of movement, comfort and stability when cruising the depths.

- Constructed of 1000 denier nylon and 420 denier nylon for maximum durability.
- High-quality air cell offers a streamlined shape when deflated and substantial buoyant lift when inflated.
- Soft neoprene neck roll and padded back pad enhance comfort during long dives.
- Quick-release integrated weight pouches secure with low-profile buckles.
- Two rear trim pouches help create a comfortable swimming position.
- Six stainless steel 40mm D-rings, plus two additional 25mm D-rings on the pockets, provide lots of clip-on points for additional gear and instrumentation.
- Ergonomic shoulder design with rotating buckles improves fit, helps distribute the load and enhances stability.
- Reinforced soft backpack with high-grip tank patch and inner padding add to comfort, reduce overall weight, and make it easy to fold and pack.
- Super Cinch stainless steel tank band system is positioned lower and teamed with a second Hook & Loop™ strap to secure the tank for transport and diving.
- 50mm waist strap with lightweight plastic buckle lets you fine-tune adjustments for a perfect fit.
- Two large zippered pockets have been redesigned, providing lots of cargo-carrying capability.
- With BPI & corrugated hose

BELLA & GLIDE

- Smaller backpack padding design decreases unwanted buoyancy.
- Big zippered cargo pockets hold lots of easy-access dive accessories.
- Integrated weight system places weight pockets over the cargo pockets, making it easier to manage both cargo and lead.
- Constructed of light weight 420 denier nylon for long-lasting durability.
- Wraparound air bladder retains its cradle-like shape even when fully inflated.
- Y-Fit shoulders with a triangular stainless steel ring balance the pressure on the body to maximize female fit and comfort.
- Soft neoprene neck optimises comfort.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Two rear trim pouches allow you to achieve a well-balanced swimming position.
- Two metal grommets for attaching a knife.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.
- With BPI & corrugated hose

BELLA

The **Bella** is designed and tailored for female divers who prefer the comfort and security of a full-featured, front-adjustable BCD. The Bella features large cargo pockets, an integrated weight system design, backpack padding and a striking white color scheme. Loaded with convenience and performance features, the Bella's exclusive wraparound bladder retains its cradle-like shape even when fully inflated, providing a comfortable fit and stable position both at depth and on the surface. It also sports a Y-Fit shoulder design that fits the female body better, allowing for excellent control and increased range of motion for the arms. A stainless steel triangular ring manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control, regardless of your position in the water. This makes for a comfortable and secure ride while cruising the depths.

- White colour scheme looks stylish and holds up to years of use.
- Designed and sized for women divers.

GLIDE

The **Glide** is a full-featured, front-adjustable BCD designed to maximise ease of use, fit and performance. This BCD offers large cargo pockets, an integrated weight system design, upgraded backpack padding and a striking blue color scheme. Other features are the Super Cinch tank buckle system and the Glide's innovative Y-Fit shoulder design that adapts to the body better to allow for excellent control and range of motion for arms. A stainless steel triangular ring manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control for the ultimate in comfort at depth and on the surface. The dump system includes three new-generation valves that allow you to deflate the wraparound bladder in any swimming position.

GO QUICK CINCH

If you like to bring your own gear with you when you go dive-trekking, the SCUBAPRO GO is the BCD for you. A true travel BCD, the GO is lightweight and foldable yet is loaded with features like integrated front weight pockets, two huge quick-draining cargo pockets, two octo pockets and SCUBAPRO's user-friendly Quick Cinch tank buckle system. This innovative, patented tank strap assembly adjusts easily and will fit any tank size in case you find yourself renting different tanks at different dive destinations. Compact rotating shoulder buckles make it easy to don the BCD as well as dial in the perfect fit. The air-net ergonomic backpack is lightweight and soft, so it can be easily folded in your travel bag, ready for your next dive adventure.

- Lightweight design (only 5.7lbs/2.6kg in size Large) folds easily and compactly into your included dive travel bag (included).
- Wraparound bladder is made of durable Nylon 210 denier fabric and features a polyurethane layer and RF soldering for maximum wear resistance.
- Patented Quick Cinch tank buckle requires minimal effort to buckle and easily adjusts to fit any tank size.
- Additional upper band helps secure the tank for maximum stability at depth.
- Two large low profile zippered pockets, one fitted with stainless steel knife attachment grommets, provide lots of cargo-carrying capability.
- Rotating quick-release shoulder buckles allow you to optimize the routing of your shoulder straps to maximize comfort and fit.
- Coated mesh cummerbund is lightweight and fast-drying.
- Air-net padded backpack is water-draining, easy to fold, and enhances comfort during long dives.
- Quick-release integrated weight pouches ditch easily and secure with low-profile squeeze buckles. Each weight pouch can hold up to 10lbs/4.5kg of ballast weight.
- Five aluminum D-rings, including two large, pre-bent D-rings on the shoulder pads, provide convenient clip-on points for additional gear.
- Two octopus pockets are provided for storing octopus and console hoses.
- Optional trim weight pockets provide better trim in the water.
- Available with SCUBAPRO's Balanced Power Inflator (BPI)

NAVIGATOR LITE

new

The Navigator Lite, SCUBAPRO's **NEW** lightweight, back inflation BCD is perfect for the recreational travel diver who prefers back-flotation in a simple, yet durable form with the added benefit of showing off interesting color combinations. The **NEW** Navigator Lite is built around an Airnet® soft backpack, making it light, foldable, and travel-friendly. The design is both modular and heavy-duty, with durable components that are easily replaceable if needed. The Navigator Lite also offers a **NEW** feature that no other SCUBAPRO BCD has - replaceable air cell covers that come in a choice of six color options for color-customizing your dive gear. It is required that an authorized SCUBAPRO technician install the air cell covers. The air cell is made of durable 420D nylon with high frequency welds, delivering generous lift capacity despite its compactness. The BCD comes with an easy-adjust Quick Cinch tank buckle system that's teamed with a 50mm hook & loop tank strap. Together they deliver rock-solid tank stabilization in all dive conditions. The cummerbund features two detachable pockets, each with two soft D-rings. These pockets can be either placed with the opening facing upwards for carrying accessories or downwards to provide quick-release ballast. The Navigator Lite comes in two expandable sizes, 2XS to M and M to 2XL, with a bit of overlapping so you can be sure to find the perfect fit for your next dive travel adventure.

- Perfect for recreational travel divers who prefer back-flotation and enjoy color-customizing their dive gear.
- The Navigator Lite is available as standard in Black, Blue and Coral, with replaceable air cell covers available in six colors (Black, Blue, Coral, Navy Blue Camo, Army Green, and White).
- Padded Airnet® soft backpack is foldable for easy packing and convenient storage.
- Modular design is fully adjustable and allows for the easy replacement of back padding, cummerbund, shoulder straps, tank cinches, air cell and pockets in case of damage or wear.
- Air cell is made of durable 420D nylon with high frequency welds and generous lift capacity, with three flat bungee straps to maintain a streamlined profile.
- Narrow straps with loops on shoulder pads provide multiple attachment points for accessories.
- Cummerbund features two detachable pockets, each with two soft D-rings. Pockets can be placed with the opening facing upwards (for carrying accessories) or downwards (providing quick-releasing ballast).
- Two 8mm stainless-steel grommets on each pocket lid provide a convenient mount for a SCUBAPRO knife.
- Quick Cinch tank buckle is teamed with a 50mm hook & loop tank strap for stabilization. Two rubber inserts guarantee optimal tank retention in all conditions.
- Ergonomic shoulder pads and cummerbunds come in two expandable sizes, 2XS/M and M/2XL, with a bit of overlapping to ensure a snug fit.

LEVEL

A fresh design incorporating eye-catching silver, blue and white graphics and a bold SCUBAPRO logo make the Level stand out in any diving crowd. But beyond good looks, this front-adjustable BCD brings together all of the performance and comfort features you'll need for any recreational diving scenario. The bladder, made of EndurTex high-tenacity 420 nylon fabric, is lightweight yet extremely rugged, and it's designed to comfortably wrap around your body without squeeze. rotating quick-release shoulder buckles allow you to optimize the routing of your shoulder straps for comfort, and a sternum strap and adjustable cummerbund with double-pull over-strap make for the perfect fit. The full-sized backpack, working together with SCUBAPRO's Super Cinch tank band, holds the tank rock solid for maximum stability. The integrated weight system loads easy and ditches even easier with its low-profile 40mm flat buckles. Built-in trim weight pockets help distribute ballast weight and help ensure a comfortable swimming attitude while at depth. Also included are two large cargo pockets, one with metal grommets for attaching a knife, four D-rings for clipping on additional gear, and two octo pockets for storing safe second and console hoses.

- Graphics, color accents and texturing on cargo pockets combine for an eye-catching look.
- Built-in trim weight pockets can each hold up to 4.4lbs/2kg of weight to help maintain a well-balanced dive position.
- Rotating quick-release shoulder buckles allow you to optimize the routing of shoulder straps to maximize comfort and fit.
- EndurTex high-tenacity 420 nylon fabric bladder is lightweight, extremely durable, and dries fast.
- Wraparound bladder comfortably hugs your body without squeeze. 74
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Quick-release integrated weight pouches each hold up to 11lbs/5kg of ballast and feature high-security 40mm flat buckles.
- Sternum strap and cummerbund with over-strap provide plenty of adjustment to achieve that perfect fit.
- Two large pockets with hook-and-loop closures provide lots of cargo-carrying capacity, plus one is fitted with metal grommets for attaching a knife.
- Four stainless steel D-rings, three pre-bent, provide lots of clip-on points for additional gear.
- A pair of octo pockets are perfect for storing safe second and console hoses.

T-ONE

The T-One front-adjustable BCD is targeted to the global rental market. It is simple in design, easy to use, and provides substantial lift capacity, making it the ideal choice for beginners during their dive classes, as well as for avid recreational divers who prefer to rent their dive gear when travelling to prime dive destinations. The T-One is also built rugged, able to stand up to intensive use under extreme conditions. It retains the same reliable bladder design as the current T-One but features an EndurTex high-tenacity nylon fabric. The BCD comes with backpack padding, generous cargo pockets with Hook & Loop closures, two octo pockets and the familiar standard plastic buckle tank cinch. Offering a wide range of sizes and reliable comfort, the T-One is built to deliver solid performance, for every diver and every dive, for years to come.

- EndurTex high-tenacity nylon fabric bladder, polyurethane-coated and high-frequency welded, is lightweight yet extremely durable. This makes for a lighter, more versatile BCD.
- Built to stand up to intensive use under extreme conditions while maintaining its looks with color-fast materials and attractive graphics.
- Back padding is covered with a specific hi-grip material to maximize comfort.
- Two large pockets with Hook & Loop closures provide lots of cargo-carrying capability.
- A pair of octo pockets are perfect for storing a safe second and console hose.
- Color-coded tags make it easy to identify the various sizes.
- With BPI (Balanced Power Inflator).

MASTER JACKET

The Master Jacket is designed with internal passageways that allow air to flow unrestricted and accumulate at the BCD's highest point. It also offers impressive lift capacity in all sizes, and provides a "face-up" body position on the surface. Because of this, the Master Jacket has been certified as a Combined Buoyancy and Rescue Device (CBRD). It is the stabilising jacket of choice among commercial and military divers, dive instructors, and advanced divers.

- Constructed of a combination of polyester and soltane for strength and durability
- Padded back pad enhances comfort during long dives
- Cummerbund with overstrap and sternum strap work together to dial in a snug fit
- Deflation system with removable dump valves enables you to dump air from a variety of underwater positions
- Super Cinch tank buckle system locks the tank in rock-solid for maximum stability at depth
- Two large Hook & Loop-closure provide lots of cargo-carrying capability
- Four large stainless steel D-rings provide convenient clip-on points for additional gear

21.085.045	Service Kit 3rd + 4th generation	-

This excellent BCD inflator/reg is in its 5th generation with dramatically improved work of breathing. Sleek ergonomic inflate/deflate controls allow for pinpoint buoyancy control.

- Test-proven breathing performance and cracking effort surpasses many traditional downstream second stages when it comes to ease of breathing
- Dive/pre-dive switch lets you de-tune the unit when not in use, eliminating free flows
- Flexible purge cover is easy to locate and depress for quick clearing.
- Power inflate and deflate buttons are positioned on top of the housing for easy buoyancy control
- Power inflate button features a lighter lever for easy inflation
- Power inflate and deflate buttons can be differentiated by color and touch due to their different shapes and sizes, improving ascent control and safety when inflating or deflating the BCD
- CE certified (EN250A > 10°C/50°F warm water test controls) as a second stage regulator

TRIM WEIGHT POCKET KIT

Now any SCUBAPRO BCD, including entry-level BCDs and those with full-sized backpacks, can be retrofitted with a high-quality trim weight system to aid in improving a diver's swimming position. These innovative trim weight pockets include low-profile, lightweight buckles to secure the weights, special plastic clips to keep the pockets in place on the BCD, plus double rails stitched to the pockets themselves that are designed to slide between the backpack plate and the bladder. When properly installed, the trim weight pockets do not prevent the bladder from inflating properly, and they do not interfere with the tank or tank strap. Each pocket can carry up to 2.2lb/1kg of weight.

- Rear trim weights allow you to achieve a well-balanced swimming position.
- Trim weight pockets are imprinted with the SCUBAPRO logo along with maximum load.
- Low-profile buckles keep weights secure while diving.
- Each pocket can carry up to 2.2lb/1kg of weight.
- Mounting trim weight pockets on a BCD is extremely easy; however, the kit should be installed by an authorized SCUBAPRO Dealer/Tech Service only, to prevent any potential issues.

- Compatible with T-One 2020, Level 2019, Equilizer, X-One, Go > 2021

S-TEK PRO SYSTEM

PART NUMBER	DESCRIPTION	MSRP
22.249.030	30lbs/13kg - includes a single tank adapter	**1068,00**
22.249.040	40lbs/18kg	**959,00**
22.249.060	60lbs/27kg	**959,00**

The S-Tek Pro's revolutionary design combines premium-plus materials and construction with purist features and technology to create the ultimate adjustable BPW system for technical diving. Designed for both utility and comfort, this system features 3D formed back plate with harness that includes individually adjustable TEK LOC shoulders to ensure a snug fit as well as make donning and doffing easy. Shoulder buckles & D-rings can be adjusted up or down to conform to different torso lengths. To enhance comfort, shoulder and waist straps are fitted with molded Monprene® pads that provide excellent cushioning without creating bulk or inherent buoyancy. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, two D-rings on the waist, and two D-rings on the crotch strap. The stainless steel backplate comes with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. The system is available with a 30lbs/13kg, 40lbs/18kg or 60/27kg lift donut wing, with the 30lbs/13kg and 40lbs/18kg wings being suitable for single tank diving and the 40lbs/18kg and 60lbs/27kg wings for twin tank diving. The 30lbs/13kg system includes a single tank adapter. The S-Tek Pro is built tough and is loaded with features, making your time at depth safer, more comfortable, and more enjoyable.

- Adjustable TEK LOC shoulders contribute to a snug, individualized fit.
- Shoulder buckle & D-ring heights can be adjusted to suit different torso lengths.
- Molded Monprene® pads cushion shoulders, waist and back to optimize comfort.
- Two pre-bent D-rings on the shoulders, two straight D-rings on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder keeps the inflator hose in place.
- Donut wing is constructed of a 1000D Cordura outer shell and 500D Cordura inner bladder.
- Padded stainless steel back plate offers Evo-Angle webbing slots plus mounting points for trim weights and an argon tank for drysuit divers.
- Back plate includes a Monprene® pad for comfort, plus a convenient built-in carry handle.
- 2 x S-Tek Ergo Nuts – ergonomically designed, easier to tighten and loosen, and flushed mounted to prevent abrasion.
- Single tank adapter is included with the 30lb/13kg system.
- Back plate features fully radiused edges and a softened organic shape, along with the back plate's recessed wingnut socket, rationalized hole count and positioning, and webbing bolt hole alignment, make for a well-thought-out system.
- Each wing features an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-Style BPI (21.615.000).

PART NUMBER	DESCRIPTION	MSRP
22.248.030	30lbs/13kg - includes a single tank adapter	**959,00**
22.248.040	40lbs/18kg	**851,00**
22.248.060	60lbs/27kg	**851,00**

BPW divers who subscribe to the DIR (Doing It Right) approach to streamlined and minimalistic equipment configurations will appreciate SCUBAPRO's S-Tek Pure back plate/wing system. This simple yet rugged system consists of a continuous-web harness teamed with a revolutionary designed 3D formed stainless steel back plate and a donut wing. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap. The stainless steel backplate comes with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. The system is available with a 30lbs/13kg, 40lbs/18kg or 60lbs/27kg lift donut wing, with the 30lbs/13kg and 40lbs/18kg wings being suitable for single tank diving and the 40lbs/18kg and 60lbs/27kg wings for twin tank diving. The 30lbs/13kg system includes a single tank adapter. The S-Tek Pure is a rugged and reliable tech diving system designed for those extended trips into the depths.

- Continuous webbing harness provides a custom, individualized fit.
- Can be configured as a fixed-shoulder length harness for ultimate simplicity or in Extender mode that allows the shoulder straps to extend for easier doffing & donning.
- Stainless steel waist buckle allows for a full range of adjustment.
- Two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder and branded silicone guide bands keep inflator hose and straps in place.
- Stainless steel back plate offers Evo-Angle webbing slots plus mounting points for trim weights, an argon tank for drysuit divers, plus a convenient built-in carry handle.
- 2 x S-Tek Ergo Nuts – ergonomically designed, easier to tighten and loosen, and flushed mounted to prevent abrasion.
- Donut wing (30lbs/13kg, 40lbs/18kg or 60lbs/27kg) is constructed of a 1000D Cordura outer shell and 500D Cordura inner bladder.
- Single tank adapter is included with 30lb/13kg system.
- Back plate features fully radiused edges and a softened organic shape, along with the back plate's recessed wingnut socket, rationalized hole count and positioning, and webbing bolt hole alignment, make for a well-thought-out system.
- Each wing features an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-Style BPI (21.615.000).

S-TEK PRO HARNESS W/BACK PLATE

SCUBAPRO's S-Tek Pro Harness combines premium-plus materials and construction with purist technology and features in a revolutionary designed Back Plate that's sure to excite the technical diving community. Designed for both utility and comfort, the harness includes individually adjustable stainless steel TEK LOC shoulder buckles to ensure a snug fit as well as easy donning and doffing. Shoulder buckles and D-rings can be adjusted up or down to conform to different torso lengths. To enhance comfort, shoulder and waist straps are fitted with molded Monprene® pads that provide excellent cushioning without creating bulk or inherent buoyancy. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, two D-rings on the waist, plus two D-rings on the crotch strap. The harness comes with a revolutionary 3D formed back plate - either a corrosion-resistant stainless steel or lightweight aluminium back plate, both with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for dry suit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. These premium plates feature a softened organic shape with fully radiused edges and recessed Wing-Nut Sockets that are compatible with standard Wing Nuts or the included S-Tek ERGO Nuts.

- Adjustable TEK LOC shoulders contribute to a snug, individualized fit.
- Shoulder buckle and D-ring heights can be adjusted to suit different torso lengths.
- Molded Monprene® pads cushion shoulders, waist and back to optimize comfort.
- Two pre-bent D-rings on the shoulders, two D-rings on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder keeps the inflator hose in place.
- Electro-polished Stainless steel or Anodized aluminium back plate offers Evo-Angle webbing slots plus mounting points for both trim weights and an argon tank for dry suit divers.
- Back plates include a convenient built-in carry handle.
- Fully radiused edges and a softened organic harness shape.
- Recessed Wing Nut Socket – 3D formed sockets that accept standard Wing Nuts or the S-Tek Ergo Nuts. Ergo Nuts are flushed mounted to prevent suit abrasion, are easier to tighten and loosen and are ergonomically designed for use with cold, wet or gloved hands.
- Rationalized hole count and positioning and webbing bolt hole alignment make for a well thought out system.

S-TEK PURE HARNESS W/BACK PLATE

SCUBAPRO's S-Tek Pure Harness with Back Plate follows the DIR (Doing It Right) approach to BPW diving with its streamlined, minimalist design. It features a continuous-web harness with lots of stainless-steel hardware, including a waist buckle, two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap. The harness comes with a choice of a revolutionary 3D formed back plate – a corrosion-resistant electro-polished stainless steel or lightweight Anodized aluminium. These premium plates feature a softened organic shape with fully radiused edges, recessed Wing-Nut Sockets that are compatible with standard Wing Nuts or the included S-Tek ERGO NUTS, as well as Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for dry suit divers, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle.

- Continuous webbing harness with provides a custom, individualized fit.
- Can be configured as a fixed-shoulder length harness for ultimate simplicity or in Extender mode that allows the shoulder straps to extend for easier doffing & donning.
- Stainless steel waist buckle allows a full range of adjustment.
- Two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder and branded silicone guide bands keep inflator hose and straps in place.
- Back plates offer Evo-Angle webbing slots plus mounting points for trim weights, an Argon tank for dry suit divers, plus a convenient built-in carry handle.
- Fully radiused edges and a softened organic shape.
- Recessed Wing Nut Socket – 3D formed sockets that accept standard Wing Nuts or the S-Tek Ergo Nuts. Ergo Nuts are flushed mounted to prevent suit abrasion, are easier to tighten and loosen and are ergonomically designed for use with cold, wet or gloved hands.
- Rationalized hole count and positioning and webbing bolt hole alignment make for a well thought out system.

BPW divers can depend on reliable buoyancy control regardless of their diving position with SCUBAPRO's line of S-Tek donut wings. S-Tek donut wings offer rounded profiles to allow for smooth, controlled air migration. Built to last, the 500D Cordura inner bladder is protected by an outer shell made of dope-dyed, colorfast 1000D Cordura that delivers industry-leading abrasion resistance. Each wing comes with an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-style BPI.

- Eco-friendly and colorfast, the Dope-Dyed, 1000D Cordura outer shell and 500D Cordura inner bladder deliver industry leading abrasion resistance and are built to last.
- Durable YKK zipper can stand up to years of use.
- Rounded profiles ensure smooth, controlled air migration.
- Improved profile reduces air trapping.
- Embroidered logos highlight both S-Tek and SCUBAPRO brands.
- Each wing features an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-Style BPI (21.615.000).

S-TEK SINGLE TANK ADAPTER

The S-Tek Single Tank Adapter is a convenient way to switch from double tank to single tank diving. Made from marine-grade aluminium, the design of this adapter makes it much easier to attach the tank using a single cinch band. It offers more vertical adjustability, fixed bolts for easy attachment and removal, and a rubber grip pad to help hold the tank securely in place. A tank height adjustment strap with quick-release buckle is included.

- Made of lightweight marine-grade aluminium.
- Single cinch band makes for easier tank attachment.
- Design offers more vertical adjustability for fine-tuning tank positioning.
- Rubber grip pad helps keep tank securely in place.
- Fixed bolts allow for easy attachment and removal.
- Includes tank height adjustment strap with quick-release buckle.

Designed with guidance from leading tech divers, the SCUBAPRO Tek-BPI is based on a K-style layout and offers an extremely robust, lightweight design from premium materials. The Tek BPI consistently delivers smooth and balanced air control for inflation / deflation of your BCD bladder.

- Balanced inflation button is easy to control for perfect inflation
- Soft mouthpiece can be easily rotated on the BPI body for comfortable oral inflation.
- Ergonomic design for easy handling for a variety of hand sizes, with, or without gloves
- Robust, durable construction
- Lightweight and neutrally buoyant
- Compatible with SCUBAPRO corrugated hoses and most corrugated hoses on the market.

SIDEMOUNT REGULATOR KIT-MK25 EVO/G260

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold water or technical diving. There's no better example of solid first stage performance in all water temperatures than the MK25 EVO. Teamed with the venerable G260, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

S-TEK EXPEDITION REELS

PART NUMBER	DESCRIPTION	MSRP
40.201.330	330ft/100m	**224,00**
40.201.660	660ft/200m	**251,00**

When serious tech divers need a serious reel, SCUBAPRO'S S-Tek Expedition Reel delivers. Evoking the distinctive design of SCUBAPRO's classic G250 second stage, this reel is rugged throughout, featuring a marine-grade Anodized aluminium frame with a durable injection-molded fiberglass reinforced Nylon drum plus stainless steel axle and screws. The anti-snag stainless steel lock-down screw is located at the opposite end of the handle from the line exit; this makes for better ergonomics while reducing the risk of line snags. A handy line capacity gauge lets you know how much line has played out, and an ergonomic anti-snag winder makes line retrieval easy.

- Durable construction includes a marine-grade Anodized aluminium frame, injection-molded fiberglass reinforced Nylon drum and stainless steel axle and screws.
- Anti-snag stainless steel lock-down screw located at the opposite end of the handle from the line exit improves ergonomics while reducing the risk of line snags.
- Anti-release eyelet for the bolt snap ensures security.
- Ergonomic anti-snag winder allows for problem-free line retrieval.
- Integrated stealth line cleat and removable Torben-Loc line anchor provide two options for securing the line-end to avoid losing it through the line guide exit.
- Included: a line capacity gauge and stainless steel bolt snap.

S-TEK SPINNER SPOOLS

PART NUMBER	DESCRIPTION	MSRP
40.202.050	50ft/15m	**62,00**
40.202.100	100ft/30m	**67,00**
40.202.150	150ft/45m	**77,00**

Evoking the distinctive design of SCUBAPRO's classic G250 second stage, these premium spinner spools come in three line lengths and are super easy to use. The key to each spool's user-friendliness can be found in the exclusive SCUBAPRO-branded spinner discs located at the center point of the spool; the discs remain static while the spool spins and the line plays out. Consequently, the spool will not try to rotate out of your hand like normal spools do, allowing for a more secure grip while playing out line. You can adjust the tension on the line by squeezing the spinner discs together, forming a disc brake effect. Made of durable injection-molded fiberglass reinforced Nylon with a stainless steel axle and screws, the body of the spool is designed so that it can be easily clipped off to a bolt snap.

- Spinner discs remain static while the spool spins, so the spool will not rotate out of your hand like normal spools can.
- Design allows for a secure, comfortable grip while playing out line.
- Made of durable injection-molded fiberglass reinforced Nylon with stainless steel axle and screws.
- Body of the spool is designed so that it can be easily clipped off to a bolt snap.
- Includes a stainless steel bolt snap.
- See p93 for the Spinner Spool Color Kits

S-TEK EXPEDITION THIGH POCKET

Expand your equipment carrying capability by adding an S-Tek Expedition Thigh Pocket to your diving rig. Made of heavy-duty 1000D Cordura, a large protective overlap secures contents with an easy-open buckle that can be opened and closed with one hand. A stainless-steel bolt snap mounted on top clips onto a waist harness D-ring, while the adjustable strap on the back secures the pocket to your thigh. An internal bungee loop is provided for securing items and the pocket's proportions are generous, providing space for equipment like dive lights, marker buoys, spare masks or compact cameras.

EVERTECH DRY BREATHABLE

The Evertech Dry Breathable is a premium trilaminate drysuit designed for avid divers and loaded with features. Built with a breathable fabric nylon/PU/nylon trilaminate blend, stitched and double waterproof taped seams, a diagonal front waterproof zipper, a Si-Tech ring system for wrist and neck seals and Si-Tech valves, this fabric suit is top quality throughout. A pair of large cargo pockets, an updated pair of lightweight attached boots and blue suspenders are just a few of the standard features included with a suit designed to keep you dry and comfortable in all water conditions. The Evertech Dry Breathable is also super lightweight: A medium size suit weighs only 3.340kg (without hood, bag & hose).

- Breathable nylon/PU/nylon trilaminate design allows body perspiration evacuation
- Seams are stitched then waterproofed taped twice for maximum reliability
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy and is protected by an extra fabric flap with YKK Vislon zipper.
- Si-Tech ring system for latex wrist and neck seals provides quick replacement of damaged latex seals or the use of optional silicone seals
- Neoprene neck collar keeps the hood in place, makes it easier to position the hood when wearing gloves, and helps preserve the latex neck seal
- Quality Si-Tech valves mounted on stitched and glued pads ensure efficient and trouble-free airflow control.
- Attached semi-rigid dive boots feature soft soles that improve their anti-slip capabilities while enabling you to comfortably walk on rough ground
- Boots include hook & loop straps to improve fit while preventing air from travelling to feet. Also included: Heel cap with fins strap retainer
- Two large cargo pockets equipped with D-rings, easy-to-see blue bungee, high-security over-flaps and Hook & Loop closures
- A hook is provided on the right-thigh utility pocket for attaching a hood
- I-Safe straps on both arms offer a secure mounting spot for a wrist computer
- Suspender system enhances fit and provides convenient lower suit support between dives
- Hood features an air vent system, smooth-skin collar, Diamond Span interior and hook
- Includes hood, carry bag, low pressure hose, repair kit, zipper wax and owners manual

DEFINITION DRY

Targeted to advanced divers looking for a quality mid-range fabric drysuit, the Definition Dry HD is a serious drysuit that's built to last. It is made with a heavy-duty poly/butyl/poly trilaminate blend plus a stitch-glue-double waterproof taped seam assembly that's able to withstand the rigors of diving. The Definition Dry's trilaminate fabric blend has also been certified as being fungous and bacteria resistant by an independent laboratory specialising in textile testing. This will help to extend the working life of the suit plus will radically reduce odours that occur from repeated use. Though built tough, the Definition Dry HD offers a number of design features that enable you to achieve a comfortable, streamlined fit.

- Heavy-duty poly/butyl/poly trilaminate design stands up to years of aggressive diving
- Seams are stitched, glued, and then double waterproof taped for maximum reliability
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy
- Latex wrist and neck seals are durable, comfortable and efficient at blocking water entry
- Neoprene neck collar keeps the hood in place, makes it easier to position the hood when wearing gloves, and helps preserve the latex neck seal
- Quality Si-Tech valves mounted on stitched and glued pads ensure efficient and trouble-free airflow control.
- Attached semi-rigid dive boots feature soft soles that improve their anti-slip capabilities while enabling you to comfortably walk on rough grounds
- Boots include hook & loop straps to improve fit while preventing air from travelling to feet. Also included: Heel cap with fins strap retainer
- Two large cargo pockets equipped with D-rings, easy-to-see blue bungee, high-security over-flaps and hook & loop closures
- I-Safe straps on both arms offer a secure mounting spot for wrist instruments
- Trilaminate fabric blend has been independent laboratory tested and certified as fungous and bacterial resistant.
- Suspender system enhances fit and provides convenient lower suit support between dives
- Hood features an air vent system and a hook for securing to the cargo pocket
- Includes hood, carry bag, low pressure hose, repair kit, zipper wax and owners manual
- Officially certified as fungus and bacteria resistant since 2018

EVERDRY 4MM

This premium-plus compressed neoprene drysuit offers the streamlined fit, comfort and flexibility of a wetsuit with the thermal properties and water-tightness of a drysuit. But this version comes with upgraded shoulder and knee panels, a plush interior, smoother wrist seals, blue suspenders, and much more. The dense 4mm neoprene resists compression at depth so the drysuit can be worn with a thin undergarment or no undergarment at all. Built for comfort and extended wear, the Everdry 4 fits like a glove, offers excellent range of motion, and most importantly, keeps body heat in and cold water out.

- 4mm high-density neoprene weighs 50% less and is significantly softer than traditional drysuit neoprene.
- Seams are triple-glued and double-thread blind-stitched on the outside; inside they are coated with liquid polymer to create a long-lasting waterproof seam.
- Plush interior is comfortable and enhances insulation against cold water.
- Smooth-skin fold-under neoprene neck seal and ultra-smooth wrist seals provide comfortable, watertight sealing surfaces.
- Heavy-duty rear shoulder-to-shoulder BDM metal drysuit zipper is covered by a neoprene overflap.
- Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.
- Shoulder and knee panels cover a lot of area for maximum anti-abrasion resistance.
- Attached neoprene soft socks enable the suit to be turned completely inside-out for cleaning and drying.
- Neoprene soft socks can be worn inside heavy-duty drysuit boots or standard neoprene dive boots.
- Blue suspender system enhances fit and provides convenient lower suit support between dives.
- I-Safe straps on both arms offer secure mounting spots for wrist instruments.
- Handy right-thigh utility pocket with D-ring, bungee and zippered closure provides a secure spot for carrying accessories.
- A hook is provided on the cargo pocket for attaching a hood.
- Includes an anatomically shaped hood, carry bag, low pressure hose, suspenders, repair kit, zipper wax and owner's manual.

EXODRY 4MM

The Exodry 4.0 offers a unique approach to drysuit design by fusing 4mm high-density neoprene with latex wrist and neck seals. This hybrid design is extremely effective, delivering minimal inherent buoyancy, maximum range of motion and an excellent sealing system. The Exodry 4.0 comes with shoulder and knee panels, a plush interior lining, suspenders and a attached semi-rigid dive boot with fin strap retainer that includes a hook & loop strap that improves fit while preventing air from travelling to the boot when diving in the heads-down position. Exodry 4.0 is a smart choice for all types of diving and can be used with or without an undersuit.

- 4mm high-density neoprene resists compression so buoyancy variations are reduced at depth
- Latex wrist and neck seals are thin yet durable and provide comfortable, watertight seals
- Plush interior is comfortable and enhances cold water insulation
- Neoprene warm collar covers the latex neck seal to eliminate cold spots and increase comfort
- Shoulder and knee panels cover a lot of area for maximum anti-abrasion resistance
- Attached semi-rigid dive boot includes a hook & loop strap to improves fit while preventing air shifting
- BDM metal dry zipper keeps water out is extra strong for years of use
- Si-Tech valves move lots of air, enabling you to maintain total buoyancy control
- I-Safe straps on both arms offer secure mounting spots for wrist instruments
- Blue suspender system enhances fit and provides convenient lower suit support between dives
- Handy right-thigh utility pocket with D-ring, bungee and zippered closure provides a secure spot for carrying accessories
- A hook is provided on the cargo pocket for attaching a hood
- Includes an anatomically shaped hood, carry bag, low pressure hose, suspenders, repair kit, zipper wax and owner's manual

X-FOAM-ALL SCUBAPRO NEOPRENE IS X-FOAM

X-FOAM

X-Foam made from limestone neoprene, petroleum-free and complies with strict PAH requirements. SCUBAPRO was the first to offer this special neoprene blend; divers and our oceans are our concern.

SOLVENT FREE GLUE:
SCUBAPRO is the first in the industry to offer this environmentally and diver friendly adhesive material.

AQUAα™

BLUE DIAMOND SPAN INNER LINING
with water-draining material enhances cold-water insulation.

AQUASEAL
Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry.

K2 EXTREME

The undergarments of choice for drysuit diving, the K2 line keeps you warm while diving dry. Sporting a modern eye-catching design, these undergarments are available in three levels of thickness to suit a variety of thermal warmth requirements. They are compatible with trilaminate drysuits.

- Dual Fleece material 629 g/m2 (+/-10%) with 919 g/m2 on shoulders, chest & knees.
- Breathable, warm and stretchy.
- Maximum thermal insulation
- Compatible with trilaminate drysuits
- Steamer design with anti-compression padding on shoulders, chest & knees
- Storage pockets with zippers
- Elastic wrist loops and heel straps
- Men's model features a front double slider zipper
- Holes on legs can be adapted to Pee-valves
- Women's model features a front single slider zipper plus a U-zipper in the seat area.

NOVASCOTIA 7.5MM

This design incorporates 7.5mm neoprene in the chest, torso and upper thigh regions to maximize thermal insulation, and 6.5mm neoprene in the arms and lower legs to enhance comfort and range of motion. A plush interior liner is featured in the arms, legs and shoulder areas to increase warmth and stretch, and the YKK Aquaseal Vislon waterproof rear zipper is super flexible while totally blocking water entry.

Otherwise, all the great features that have made the NovaScotia the premier semi-dry dive suit remain. Glued and blind-stitched seams block water entry, and internal stress discs installed at stitch intersections reinforce seams and extend the suit's working life. A fold-under neck seal and double zippered wrist and ankle seals work together to keep water seepage to a minimum. Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints add a stylish look. A spine pad offers additional comfort where the tank meets the diver's back. There's also an I-Safe strap on each arm for securing wrist instruments and a handy 3D cargo pocket located on the right thigh for carrying accessories.

- Semi-dry concept offers many of the advantages of both wetsuits and drysuits in a sleek, comfortable package.
- CE certified a Class A dive suit - rated for water temperatures ranging from 7°C to 12°C.
- 7.5/6.5mm version is made of 100 percent neoprene, an X-Foam formulation for better health, and is assembled using eco-friendly solvent-free Aqua glue.
- 7.5mm neoprene is used in the chest, torso and upper thigh regions for maximum thermal insulation; 6.5mm neoprene is used in the arms and lower legs for increased range of motion.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Blind-stitched seams block water entry.
- Internal stress discs installed at stitch intersections reinforce seams, extending the suit's working life.
- Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry.
- Plush interior liner in the arms, legs and shoulder areas increases warmth and stretch.
- Double zippered seals on ankles and wrists feature brass sliders for durability and ease of use.
- Fold-under neck seal is ultra-comfortable and keeps water seepage to a minimum.
- Right thigh 3D pocket with hood attachment hook offers lots of room for carrying extra gear.
- Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints add a stylish look.
- Enhanced spine pad provides a welcomed cushion where the tank hits the diver's back.
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments.

ENVIRONMENTALLY FRIENDLY FEATURES

YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.

Suits are assembled using a solvent-free glue, a better process for people, the environment and the ocean.

YULEX® Dive foam is layered inside and out with a black polyester lining made from recycled plastic bottles, an additional step toward environmental sustainability.

YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

SCUBAPRO cares

EVERFLEX YULEX® 7,5/5MM, 5/4MM & 3/2MM

A real milestone for 2023 – SCUBAPRO's premium Everflex steamers are now built with YULEX® dive, a new plant-based foam made from natural rubber.

Everflex YULEX® Dive steamers are of course designed with SCUBAPRO's exclusive Pure Design Concept, with just enough multi-thickness panels to guarantee maximum stretch and comfort. They fit comfortably snug and deliver unparalleled freedom of movement. They also provide superb resistance to water compression to keep divers warmer, deeper, for longer. The rubber is layered inside and out with a polyester lining made from recycled plastic bottles, and an updated Diamond Span inner fleece lining in the torso area enhances warmth while making donning and doffing so much easier. Everflex YULEX® Dive steamers are offered in three thicknesses to cover virtually every diving scenario and are loaded with features that maximize comfort, warmth and ease of use.

- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Multi-thickness panels deliver a superior combination of warmth and flexibility.
- Innovative preformed design delivers an excellent fit for most body shapes.
- Double blind-stitched outer seams are durable and watertight, and single blind-stitched inner seams are comfortable against bare skin.
- Updated Blue Diamond Span inner fleece lining's warm and water-draining material enhances cold-water protection. It is combined with a second black lining for improved stretch, also making donning and doffing much easier.
- Vertical rear YKK zipper with brass slider offers increased long-term durability, and the long webbing puller makes it easy to use.
- Compression-molded zipper flap/spine pad increases back protection.
- Small neck zipper enhances comfort when on the surface.
- Seat and shoulder areas are protected by an abrasion-resistant outside lining to increase durability and extend the life of the suit.
- Printed pads on knees and shoulders provide additional abrasion protection.

EVERFLEX YULEX® 7,5/5MM

PLUS

- CE certified a Class A dive suit -- rated for water temperatures ranging from 45°F (7°C) to 54°F (12°C).
- Internal cuff seals with zippered cuffs on ankles and wrists feature YKK brass sliders for durability, watertightness and easy donning
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments

EVERFLEX YULEX® 3MM

LONG SLEEVE TOP & PANT

This functional 2-piece ensemble is an alternative to the Everflex YULEX® 3/2 steamer. Designed with the Pure Design Concept where fewer seams and panels are employed to maximize comfort and range of motion, both top and pant feature blind-stitched seams and come with a black stretch polyester outside/inside lining. The top is fitted with a vertical front zipper and wrists and ankles feature fuse-cut finished cuffs that are super stretchy for easy donning. The abrasion-resistant fabric on the seat and the printed pads on the knees protect the legs, while the top provides abrasion-resistant fabric with additional printed pads on the shoulders to prevent abrasion from BCDs.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.
- Top and pant are assembled using a solvent-free glue, a better process for people, the environment and the ocean, and blind-stitched seams.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Black stretch polyester outside/inside lining made from recycled plastic bottles enhances comfort.
- Top includes a convenient vertical front zipper.
- Fuse-cut finished cuffs on wrists and ankles are super-stretchy for easy donning and doffing.
- Abrasion-resistant fabric on the seat and shoulders, with additional printed pads on shoulders and knees, increase durability and extend the life of the suit.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.
- CE certified a Class D ensemble (top & pant worn together) – rated for water temperatures ranging from 22°C.

EVERFLEX YULEX® 5/3MM

HOODED VEST

When worn with a SCUBAPRO steamer or shorty, the Everflex YULEX® Hooded Vest substantially increases thermal protection with 5mm panels on the front and back in the torso area and 3mm side panels to increase range of motion. To warm the head, the attached hood offers 3mm of thermal protection and features a 2mm face seal to help seal off water entry and minimize heat loss. Assembled with solvent-free glue and blind-stitched seams, the inside of the vest is lined with a combination of blue Diamond Span fleece and black stretch polyester. The hood also has a black stretch polyester inner lining.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.
- Vest is assembled using a solvent-free glue, a better process for people, the environment and the ocean, and blind-stitched seams.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Vest offers 5mm thermal protection in the torso area, front and back, with 3mm side panels for added flexibility.
- Inside of vest is lined with a combination of blue Diamond Span fleece and black stretch polyester, the latter of which is made from recycled plastic bottles.
- Hood provides a thickness of 3mm laminated with an outside/inside black polyester lining. Also included is a 2mm face seal & 3 vent holes to allow for a better fit.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

SLEEVELESS SWIMSUIT FOR WOMEN

This stylish swimsuit is the ideal garment for pool training or ocean swimming in warm climes. It can also be worn as a first layer in an exposure protection ensemble. The swimsuit is designed with the Pure Design Concept to maximize comfort, fit and range of motion. A convenient front zipper makes donning easy, and the black polyester outer/inner lining is comfortable against bare skin.

- YULEX® dive: Plant-based foam made from FSC-certified natural rubber. 100% neoprene free.
- Suit is assembled using a solvent-free glue, a better process for people, the environment and the ocean, and flat-lock seams.
- Pure Design Concept uses fewer seams and panels to maximize comfort and range of motion.
- Vertical front zipper makes donning and doffing quick and easy.
- Black stretch polyester outer/innerlining made from recycled plastic bottles is comfortable against bare skin.
- YULEX® dive foam is specifically formulated to resist wetsuit compression while diving.

EVERFLEX 1,5MM COLLECTION

SCUBAPRO's stylish Everflex 1.5mm neoprene separates keep you warm while providing protection from scrapes and stings. Sporting a new design and high-tech materials ideal for tropical diving, snorkeling or pool training, these eye-catching tops and leggings are made with a special water-repellant, high-stretch Everflex neoprene on the outside and a combination of fleece and plush on the inside. They offer warmth, comfort and lots of range of motion, plus they dry quickly and are great for layering.

- Neoprene is lightweight, durable, water repellant and a highly efficient insulator for heat retention.
- Assembled using solvent-free glue.
- High-tech plush and fleece lining reduces water flow and provides both comfort and extra warmth.
- Design helps block water intrusion to reduce convection.
- Provides effective insulation under water as well as at the surface.
- Form-fitting for that sleek hydrodynamic look and feel.
- High-stretch neoprene is easy to don and doff and offers excellent range of motion.
- Same sizing as wetsuits.

DEFINITION 7MM

HOODED WITH FRONT ZIP

Filling the niche between traditional steamers and semi-dry suits, the Definition 7mm hooded steamer is a thoroughly modern cold water dive suit loaded with features. The design, while influenced by the popular Definition 6.5mm steamer, uses a thicker, higher stretch neoprene for more thermal insulation and increased range of motion. An attached hood warms the head and neck, and a YKK horizontal front shoulder-to-shoulder zipper makes it easy to get in and out of the suit without help from a dive buddy. The ultra-comfortable plush interior has a aluminum foil lamination for maintaining warmth. Internal cuff seals in both wrists and ankles keep water entry to a minimum, and a built-in spine/ lumber pad cushions the tank, providing additional comfort during extended dives. This suit fits like a glove, provides extra stretch where it's needed most, and offers a level of warmth, comfort and durability well-suited to active cold-water divers.

- CE certified Class A dive suit – rated for water temperatures ranging from 7°C to 12°C.
- Flexible neoprene increases range of motion and makes the suit easier to don and doff.
- Suit is assembled using solvent-free Aqua glue, a 100% green process.
- YKK front shoulder-to-shoulder zipper includes an over-flap panel.
- Interior plush with aluminum foil lamination keeps warmth next to the body.
- Arms and legs are made of single panels for enhanced donning/doffing.
- Internal cuff seals on wrists and ankles inhibit water entry.
- Large prints on shoulder, knees and elbows provide abrasion resistance.
- Abrasion-resistant fabric on the high-wear seat area.
- Built-in spine/ lumber pad cushions the tank, providing additional comfort during extended dives.
- Equestrian-style stitching on the seat-area creates a slimmer silhouette.
- Made from X-Foam neoprene, the only "green" neoprene that complies with P.A.H.regulations.

63.780.xx0

Infrared (IR) interior lining on front and back torso reflects body heat for extra thermal insulation and is extremely soft against the skin

DEFINITION 7MM

BACK ZIP

The Definition 7mm steamer replaces the former 6.5mm version of this popular cold-water wetsuit while providing even more stretch, warmth, comfort and features. Special tailoring and strategically placed panels in the chest area, sides, arms and legs, and behind the knees, create a suit that fits like a glove and provides extra stretch where's it's needed most. Bigger shoulder, knee and elbow pads provide maximum abrasion resistance.

DEFINITION 1MM

Delivering optimal comfort and flexibility, this lightweight steamer is made with 1mm X-Foam neoprene with an outside super-stretch nylon lining and an inside mix of plush on the front and back of the torso and super-stretch nylon on all other panels. It comes with a diagonal rear zipper with brass slider and abrasion-resistant fabric on the seat and elbows. Shoulders and knees also offer abrasion-resistant fabric reinforced with printed pads. Foot loops prevent ride-up when used as a base layer beneath a thicker wetsuit. This steamer offers the perfect level of full-body protection for pool training, warm-water diving or layering for any watersport activity.

- Can be worn for pool training, as a warm-water wetsuit, or as a base layer for thicker wetsuits.
- Made from 1mm neoprene with an outside super-stretch nylon lining and an inside mix of plush on the front and back of the torso and super-stretch nylon on all other panels.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Body Map System features special tailoring and material inserts to compensate for the stresses of the human body.
- Rear diagonal zipper with brass slider makes easy work of donning and doffing the suit.
- Foot loops prevent ride-up when worn beneath a wetsuit.
- Flat-lock seam construction is comfortable against bare skin.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.

SPORT 5MM

The Sport 5mm (Generation 2) offers must-have thermal insulation for first-time suit buyers or occasional divers. Sport is easy to don and doff, fits like a second skin and looks good in the process. Made from super-soft neoprene, the suit is assembled using solvent-free Aqua glue – a 100% green process. A triathlon cut increases the range of motion in the shoulder and under arm areas for maximum freedom of movement on the boat and in the water. The Sport 5mm comes with exterior styling and colors, a vertical-cut rear zipper and a hood hook on the right hip.

- CE certified as a Class B dive suit - rated for water temperatures ranging from 10°C to 18°C.
- Softer and more flexible neoprene makes it easy to put on and take off, maximizes range of motion and improves overall comfort.
- Suit is assembled using solvent-free Aqua glue, a 100% green process.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas which allows unrestricted arm and shoulder movement.
- Main vertical-cut YKK rear zipper brass slider offers increased long-term durability and ease of use.
- Single zippered cuffs on ankles and wrists with YKK brass sliders offer durability and comfort plus are easy to use.
- The interior is lined with two plush materials that enhance comfort and warmth, dry quickly and provide cushioning beneath wrist and ankle zippers.
- Glued and blind-stitched seams keep warmth in and water out.
- Abrasion-resistant fabric on shoulders, seat and knees shield against shifting gear or when sitting or kneeling.
- High-stretch neoprene is great for hard-to-fit divers who can now enjoy a suit that molds comfortably to the body.
- Made from X-Foam neoprene, the only "green" neoprene that complies with P.A.H.regulations.

SPORT 2MM - SHORTY

This incredibly soft shorty offers lots of warmth, comfort and stretch for casual tropical divers who enjoy diving in moderate to shallow depths. Made from super-soft 2mm neoprene with an inside/outside polyester lining, the shorty features the triathlon cut from Sport steamers that allows for lots of range of motion in the shoulder and underarm areas. Design enhancements include smart exterior styling and colors and a vertical-cut rear zipper. This shorty is easy to put on and take off, is stretchy and comfortable, fits like a second skin and looks good in the process.

- Designed to keep new and casual tropical divers warm and comfortable while diving in moderate to shallow depths.
- Also provides good thermal insulation for pool training.
- Softer and more flexible neoprene makes it easy to put on and take off, maximizes range of motion and improves overall comfort.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted shoulder movement.
- Vertical YKK rear zipper with brass slider offers increased long- term durability and ease of use.
- Flat-lock seam construction is comfortable against bare skin.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Assembled using a solvent-free glue, a 100% green process.
- Product logo on the arm includes neoprene thickness for easy identification.

SPORT 2MM - HOODLESS VEST

Designed to layer with any SCUBAPRO steamer, this classic 2mm Hoodless Vest is made of 2mm limestone-based pure neoprene, lined outside with stretchy recycled polyester fabric and lined inside with stretchy and warm plush made of recycled nylon. The Sport 2mm Hoodless Vest features dark logos on the chest and spine for that modern look, and is intended to cover the torso to protect the body's thermal area. Flexible and comfortable, it's the perfect thermal addition for those times when extra thermal layering is the plan for the dive day.

- Provides extra warmth over the torso, a critical area for minimizing heat loss, while the sleeveless cut leaves arms free for mobility.
- Super-stretchy so it's easy to don and doff, while also adding warmth and comfort.
- Fast-drying, the vest remains comfortable for use and reuse during a long dive day.
- Made from 2mm X-Foam limestone-based pure neoprene.
- The outside is lined with stretchy recycled polyester, while the inside is lined with stretchy and warm plush made from recycled nylon.
- Anatomical design for perfect body fit.
- Sleeveless and wide arm openings for easy donning and doffing.
- Soft and stretchy binding on arms, neck and waist for comfort.
- Dark graphic print on chest and spine enhances styling.
- Flatlock construction.

For the Sport 2mm Hoodless Vest, women will generally need one size smaller. For example, if she usually takes a medium, she should try a small.

We recommend a proper fitting before choosing a size.

SPORT STEAMER 0.5MM

This versatile ultra-thin neoprene steamer can be used for thermal protection while pool training, as a warm-water wetsuit, or as a base layer beneath a thicker wetsuit for cold-water diving. Made from extremely soft 0.5mm neoprene with a stretchy Nylon 2 Sides lining, this lightweight steamer comes with a vertical YKK zipper with brass slider for easy donning and doffing, and foot straps to prevent ride-up when used as a base layer. Printed kneepads increase durability while maintaining comfortable flexibility in the leg areas.

- Ideal for pool training, as a warm-water wetsuit, or as a base layer for thicker wetsuits.
- Nylon 2 Sides lining is soft, stretchy and extremely comfortable.
- Vertical YKK rear zipper with brass slider offers long-term durability and ease of use.
- Foot straps prevent ride-up when used as a base layer.
- Flat-lock seam construction is comfortable against bare skin.
- Printed kneepads protect lower legs while maintaining softness.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.

ONEFLEX 6MM FRONT ZIP

The Oneflex 6mm steamer is built for cold water or for making multiple dives in temperate water. The attached hood maximizes heat retention and minimizes water entry. The suit is designed with a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. The addition of outside stretch fabric on arms and armpits contribute to making the suit much easier to don and doff while increasing comfort and freedom of movement in the water – extremely important to beginning divers. The suit is built with the Pure Design Concept using fewer seams and panels for maximum flexibility, and the quality X-Foam neoprene is stretchy and comfortable but also durable, thanks to its 2-sided polyester lining. This makes the Oneflex 6mm steamer an ideal wetsuit for repeated use at training centers and rental locations.

- CE certified as a Class B dive suit - rated for water temperatures ranging from 10°C to 18°C.
- Constructed of high-stretch eco-friendly X-Foam 6mm neoprene with 5mm neoprene in the arm/armpit area for increased comfort and range of motion.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine, substantially extending the life of the suit, even after repeated use.
- Attached 5/3mm hood maximizes heat retention and minimizes water entry.
- Diagonal front zipper with brass slider is durable, easy to use and makes easy work of donning and doffing
- Single YKK zippers on ankles and wrists feature durable brass sliders and pull tabs, and the built-in cuff seals are comfortable and easy to use.
- Heavy-duty kneepads and anti-abrasion material on shoulders and seat cushion the diver while protecting the suit from scrapes and scuffs.
- Round logos on both arms/shoulders with size color coding and lettering allow for easy identification.
- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solvent-free glue, a 100% green process.

HOW SHOULD YOU MEASURE?

SIZE NOTE: Everflex YULEX® suits are built with high-stretch YULEX® Dive Foam and numerous high-stretch panels that provide a tighter fit initially, but stretch after a few dives.

If you plan to wear a swimsuit or other items under your divewear, you should measure yourself while wearing those garments, keeping the tape measure parallel to the floor. We recommend if you are between sizes to choose the larger size. Sizes may vary: +/- 2cm

CHEST: Measure around the fullest part of your chest.
WAIST: Measure at the narrowest point of your waist.
HIPS: Stand with your heels together and measure around the fullest part of your hips.

SCUBAPRO NEOPRENE IS X-FOAM
X-Foam made from limestone neoprene, petroleum-free and complies with strict PAH requirements. SCUBAPRO was the first to offer this special neoprene blend; divers and our oceans are our concern.

SOLVENT FREE GLUE:
SCUBAPRO is the first in the industry to offer this environmentally and diver friendly adhesive material.

BLUE DIAMOND SPAN INNER LINING
with water-draining material enhances cold-water insulation.

AQUASEAL
Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry.

HYBRID CARGO SHORTS 1MM

The form-fitting Hybrid Cargo Shorts are made of quality 1mm X-Foam neoprene and stretchy nylon. On the inside, a micro-plush lining makes the shorts warm and cozy. This plush lining absorbs less water, increasing overall warmth, plus dries quickly. Hybrid Cargo Shorts come with larger Hook & loop pockets featuring internal bungees and a D-ring, along with large fast-draining eyelets and an additional zippered pocket for stowing small valuables. The shorts come with an adjustable waist belt that threads through a series of belt loops and includes an easy-to-use male/female squeeze buckle closure. Anti-abrasion fabric on the seat panel enhances durability. Designed to be worn either by themselves or over a dive suit, Hybrid Cargo Shorts are perfect for enjoying a day in the water.

- Larger volume cargo pockets offer more space for carrying valuables.
- Easier to open Hook & loop pocket flaps, even with gloves.
- Large-diameter pocket eyelets drain water fast.
- Internal bungees and D-ring inside pockets provide attachment points for accessories.
- Small zippered pocket on the exterior of the main pocket flap is a great place for stowing smaller items.
- Made with 1mm X-Foam neoprene for warmth and durable nylon for stretch and comfort.
- Adjustable waist belt includes an easy-to-use male/female squeeze buckle closure.
- Abrasion-resistant fabric on the seat panel provides additional protection.
- Form-fitting for that sleek hydrodynamic look and feel.
- Highly versatile – ideal for divers, snorkelers, paddle boarders, swimmers and other water enthusiasts too.

DRYSUIT BOOT

A must-have boot for any drysuit diver who walks, hikes or climbs to a dive site. This sturdy boot can handle the most rugged shoreline terrain, and is designed to fit comfortably over the sock of any drysuit.

- Lace-up design lets you quickly and easily achieve a snug, secure fit.
- Heavy-duty ultra-grip sole supports the foot when traversing rocky shorelines.
- Neoprene upper is ultra-flexible, enhancing overall comfortable.
- Toe and heel are reinforced with durable rubber caps to protect both boot and foot.
- Heel cap features a fin strap keeper to eliminate slippage when engaged in aggressive kicking.
- Boot comes with a water-draining mesh storage bag.

This boot is designed to be worn with a 2.5mm sock and the above size includes this additional thickness. To ensure a perfect fit, please choose your usual shoe size and a 2.5mm sock.

K2 SOCK

When diving cold water it's important to keep your extremities warm, particularly hands and feet. The K2 sock is designed to be worn inside drysuit boots to keep feet toasty warm during those extended bottom times. Made from the same K2 fleece that you find in SCUBAPRO's K2 drysuit undergarments, the K2 sock is breathable and stretchy for maximum comfort as well as warmth, and the high-cut design covers a lot of ankle area. They are compatible with all kinds of drysuits.

SIZE CHART - SEE P142

EVERFLEX ARCH 5MM

The Everflex Arch Boot just might be the most comfortable dive boot you've ever slipped your foot into. Featuring an innovative arch design that closely matches the foot's natural anatomy, the boot's foot pocket is cut wide, creating a cramp-free fit, even for wide-shaped feet. While the boot offers 5mm of thermal protection throughout most of the boot, in the upper-ankle area the neoprene is a bit thinner to prevent bulkiness where it overlaps the wetsuit leg. The Diamond Span inner lining is super comfortable and dries fast. For 2022, the Everflex Arch Boot features a Black/Gray "boat-style" color and a logo.

- Black/Gray color and logo. "Boat-style" boot.
- Innovative arch design provides a level of support and comfort not often found in dive boots.
- Neoprene is thinner (3.5mm) in the ankle area to prevent bulkiness where it overlaps the wetsuit leg.
- Boot's neoprene is so pliable that donning and doffing is easy without the need of a zipper.
- No-zip design includes webbing puller loops in front and back to aid in donning.
- Diamond Span interior improves warmth and comfort and dries fast.
- The outside of the toe box is cushioned and protected against abrasion.
- Sole with heel helps prevent the foot from slipping on boat ladders.
- Heel cap includes a molded fin strap keeper to eliminate strap slippage.
- Made from X-Foam, a petroleum-free, limestone neoprene.

DELTA BOOT 6.5MM

The classic Delta boot has been redesigned with impressive arch support, a wider foot pocket plus a sole incorporating a special heel, designed to prevent slipping on boat ladders. The built-in arch provides extra support and comfort, and the full-cut foot pocket delivers a cramp-free fit, even for wide-shaped feet. Inside, our quick-drying Diamond Span lining improves warmth. The boot's rubberized armor on the toe and heel cap offers additional flexibility and resistance without adding bulk to the boot. Offering both comfort and insulation, the Delta boot is a great choice for virtually any cold-water diving scenario.

- Provides full-featured foot insulation for cold-water diving.
- Arch provides a level of support and comfort.
- An extra wide foot pocket creates a cramp-free fit, even for wide-shaped feet.
- Diamond Span interior is quick-drying, comfortable and enhances warmth.
- Sole with heel prevents slipping on boat ladders.
- Toe cap provides cushioning while preventing abrasion from the edge of the fin pocket.
- Heel cap includes a fin strap keeper to eliminate slippage.
- Long zipper makes it easy to put on. Secured with a Hook & Loop tab.

DELTA 5MM

The Delta Boot 5 is sturdy with a flexible outsole and rubberized armor, yet still feels very light on the foot. The boot maintains its sturdy but flexible outsole and rubberized armor, yet still feels very light on the foot. A revised ankle diameter and contoured top improve fit and make sliding the YKK zipper up and down even easier. A full cut creates a comfortable, cramp-free fit.

- 5mm N2S (Nylon 2 Sides) construction delivers comfort and durability
- Sturdy outsole and rubberized armor provide excellent resistance on top and bottom and increase comfort when traversing rocky shorelines
- Reinforced toe and heel caps extend boot life. Heel cap includes a fin strap keeper
- YKK zipper is fitted with a gusset to cut down on water seepage, and secures with a hook & loop tab
- High-quality anti-slip tread is non-marking, a feature boat owners always appreciate
- Improved fit and easier wear with revised ankle and contoured top
- Made from X-Foam, a petroleum-free, limestone neoprene

BASE BOOT 4MM

The 4mm Base boot is an economical and durable boot built for temperate water diving and the rental market. The lightweight rubber sole is durable yet flexible while providing an effective anti-slip tread. Rubberized armor on the toe and heel cap offer lots of resistance without sacrificing comfort. A logo design color-coded for size differentiation is ideal for diving operations and rental applications.

X-FOAM

- Lightweight rubber sole provides durability and comfort along with an effective anti-slip tread.
- Logo design is color-coded for size differentiation.
- The toe cap prevents abrasion from the edge of the fin pocket.
- Heel cap includes a molded fin strap keeper.
- The long zipper makes it easy to put the boot on and secures with a Hook & Loop tab.
- Made from X-Foam, a petroleum-free, very specific limestone-based neoprene complying with strict PAH and REACH regulations.

HYBRID SOCKS 2.5MM

The Hybrid Sock is made of soft 2.5mm neoprene with a textured sole that provides light non-slip feature for walking on wet boat decks. Featuring 100% high-stretch Everflex Nylon outside and a plush interior lining for warmth and comfort, you can wear the Hybrid sock inside your dive boot for added warmth, as a liner inside a full foot fin, or by itself to walk around on a chilly boat deck. Whichever you choose, your feet will love you for it. Easy to don and doff, this sock is great footwear for freedivers too, and also for small divers (the three smallest sizes are designed to fit the smallest of divers). Included: a reusable fabric boot bag for transport and storage

The Släggö Flex Ring is a modular quick-change solution designed to make it easy to replace a broken or torn wrist seal on a drysuit. And now, with the Oberon Dry Glove system, there's a convenient and reliable method for attaching virtually any model of dry glove to a Släggö Flex Ring. Developed and manufactured by Si Tech, the Oberon Dry Glove System consists of 13 components per arm, connects to large and medium Släggö Flex Rings, and fits most common dry glove models. Dry gloves not included.

- Easy to mount and easy to use.
- For each arm, the system includes:
  - > Oberon Ring (with Lock and Release Ring, Rubber Ring and O-ring).
  - > Glove Ring.
  - > O-Rings (4 pcs).
  - > Red, green, blue and yellow Spanner Rings.
- Fits most common dry glove models.
- Suit Ring requires no alignment – 360° swiveling connection.
- Lock & Release Ring is made of rubber for maximum grip plus protects the O-ring from dust.

EASYDRY PRO GLOVE - DRY, SEMI-DRY AND WET SUITS

These gloves are designed for use with drysuits, semi-dry suits and wetsuits. The elastic latex cuff seal ensures the glove is waterproof. The gloves are manufactured from high quality vulcanized latex, which gives them a high elasticity and makes them very resistant to puncturing and tearing. The rough surface allows perfect grip with instruments, valves, regulator etc. The anatomic shape of the gloves allows prolonged use without causing increased fatigue.

TROPIC 1.5MM

The ever-popular Tropic glove features a material pattern and now comes in colors that match SCUBAPRO's UPF Collection of rash guards. Stylish looks aside, this soft tropical glove still features a 1.5mm neoprene back for comfort and warmth, plus an Amara palm to prevent finger cuts when grasping barnacle-encrusted dive ladders in tropical waters.

- Reinforced fingertips and palm increase durability while ensuring a non-slip grip.
- Amara fabric layer on palm is resistant to punctures and remains soft when dry.
- Hook & Loop wrist seal is adjustable to ensure a snug fit.
- Available in colors to match SCUBPARO's UPF Collection.

T-FLEX - UPF 80

UPF 80 is the best UV protection rating the industry has to offer. Under the UV Standard 801, fabrics are tested in their "worst-case" scenario - wet and stretched – two stress factors that adversely affect a fabric's protective qualities. So divers benefit from the ultimate UV protection, wet or dry.

SCUBAPRO's top-of-the-line UPF performance gear. Featuring a quality nylon/spandex blend – considered the best material combination for warm water or tropical use. The T-Flex earned a UPF 80 certification by UV Standard 801, the only UV certifying standard that tests fabric in real conditions of use – wet and stressed. This is the highest protection available in the industry.

Super-soft nylon and high-stretch spandex equal comfort and freedom above and below the surface. Vibrant color and sleeve options make it hard to pick a favorite.

- Made from a blend of 86% super-soft nylon and 14% high-stretch spandex
- Maximum comfort – maximum stretch
- Form-fitting for that sleek hydrodynamic look and feel

21.712.000	SRS with BPI	**725,00**

new

In any emergency professional divers need to act fast. SCUBAPRO's Rapid System (SRS) can be donned quickly to react to underwater crises at a moment's notice. The large-volume donut shaped system features a front-mount bottle configuration, with a rear bottle set-up available as an option. Additional products can be purchased separately, including regulator systems, analog pressure gauges, knives and tools.

DOUBLE HORSE COLLAR-STYLE AIR CELL
- PU-coating on the outside makes it easy to sanitize and dry.

TEK BALANCED POWER INFLATER
- An extremely robust and lightweight design delivers smooth, balanced air control during inflation/deflation.

FRONT MOLLE SYSTEM
- Perfect for attaching accessories, pockets, cutting devices and more.

ZIPPERED SLEEVE AND REAR NECK HOOK & LOOP STRAP
- Allows for streamlined rigging of LP hoses.

NOVASCOTIA 7.5MM SEMI-DRY STEAMER, ALL BLACK

This jet-black semi-dry dive suit is a no-nonsense solution for staying very warm and relatively dry while virtually eliminating hydrodrag when moving through the water. With its 7.5/6.5mm thickness, flexible fit and first-rate thermal properties, the NovaScotia semi-dry is the professional diver's answer to a rugged and comfortable dive suit for any underwater mission.

CE CERTIFIED CLASS A DIVE SUIT
- Rated for water temperatures ranging from 7°C to 12°C.

YKK AQUASEAL VISLON ZIPPER
- Flexible rear shoulder-to-shoulder waterproof zipper provides an excellent seal against water entry.

HEAVY-DUTY CONSTRUCTION
- Pure Design Concept uses fewer seams and panels to ensure maximum flexibility.
- Seams are blind-stitched with reinforcing internal stress discs installed at stitch intersections, blocking water entry and extending the suit's working life.
- Double zippered seals on ankles and wrists feature brass sliders for durability, water-tightness and ease of use.

COMFORT & FUNCTIONALITY
- Plush interior liner in the arms, legs and shoulder areas increases warmth and stretch.
- Enhanced spine pad provides a cushion where the tank hits the diver's back.
- Fold-under neck seal is ultra-comfortable and keeps water seepage to a minimum.
- 3D pocket offers plenty of room for carrying extra gear. A hood hook is positioned on the outside of the pocket for added convenience.

CLASSICO 7.5/6MM FARMER JOHN STEAMER, ALL BLACK

Designed for hard-working divers everywhere, the rugged two-piece Classico dive suit, in basic black, embraces an updated design based on Everflex dive suits. The long john is 6mm while the jacket is 7.5mm. Put them together and you have some serious thermal protection for cold-water diving.

JACKET
- Half-zipper allows for easy donning while eliminating a zipper in the neck/hood area to maximize head comfort.
- Beavertail secures with two rotating nylon clips.
- Inside lining is a comfortable black plush.
- Attached hood comes with a face seal and is lined with black plush for comfort.
- Internal cuff seals on wrists minimize water intrusion.

LONG JOHN
- Inside is lined with a comfortable black plush.
- Internal cuff seals on ankles keep water seepage to a minimum.
- Ankle zippers make for easy donning.

BUILT FOR COMFORT
- Pure Design Concept and strategically placed pre-formed shapes allow both suit components to move more naturally with your body.
- All panels (except those with abrasion-resistant fabric) feature a super-stretchy nylon outer lining to increase overall range of motion.

ULTRA-DURABLE
- Blind-stitched seams block water entry.
- Shoulders and seat area are protected with abrasion-resistant fabric.
- Abrasion-resistant high-stretch material on the outside extends the life of the suit.

ONEFLEX 5 & 3MM STEAMERS, ALL BLACK

For professional divers working in temperate- or warm-water locales, nothing beats Oneflex 5mm and 3mm steamers. Delivering superb thermal protection and straightforward styling, these suits are built using the Pure Design Concept and a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. Zippered pockets on both legs are great for carrying tools or accessories.

ULTRA-DURABLE 2-SIDED POLYESTER LINING
- Stretchy and comfortable while providing excellent resistance to heat, UV rays and chlorine, substantially extending the life of the suits.

YKK ZIPPERS
- Diagonal rear main zippers are durable and easy to use, plus zippered ankles and wrists feature brass sliders and pull tabs over comfortable cuff seals.

ANTI-ABRASION PATTERNS
- On shoulders and kneepads provide protection and extend the life of the suit.

EVERFLEX 3/2 & 1MM STEAMERS, CAMO GREEN

Professional divers can blend effortlessly into the underwater world and be comfortable doing it wearing Everflex Camo Green suits. Offered in two thicknesses, these stealth suits are built using SCUBAPRO's exclusive Pure Design Concept for even better fit and freedom of movement.

DIAMOND SPAN PLUSH INNER LINING
- Super comfortable, enhances warmth and drains water quickly.

PRE-FORMED DIMENSIONAL SHAPES
- Allow suits to move more naturally with your body, delivering unparalleled comfort and flexibility.

ANTI-ABRASION OUTER LINING
- On the seat, shoulders and knees increase durability and extend the life of the suit.
- Printed pads on knees and shoulders provide additional abrasion protection.

USEFUL EXTRAS
- Small neck zipper enhances comfort between dives on the 3mm model.
- Single cuffs on ankles and wrists are comfortable and super-stretchy to aid in donning and doffing.
- A convenient hook on the right hip lets you attach a hood before and after dives.

NOVASCOTIA 7.5MM SEMI-DRY STEAMER, SAR

The NovaScotia 7.5mm Search & Rescue semi-dry is ready for action. The suit's 7.5/6.5mm thickness, easy-zip waterproof YKK Aquaseal Vislon zipper, attached hood, improved plush lining and long list of features, including a high-visibility red and yellow color scheme, make this semi-dry dive suit the perfect choice for cold water, temperate water and multi-dive thermal protection.

CE CERTIFIED CLASS A DIVE SUIT
- Rated for water temperatures ranging from 45°F (7°C) to 54°F (12°C).

DURABLE DESIGN
- Pure Design Concept reduces seams and panels to maximize flexibility while moving around at depth.
- Seams are blind-stitched to block water entry, and internal stress discs installed at stitch intersections provide additional reinforcement, increasing suit durability for a long working life.

QUICK-DRYING DIAMOND SPAN
- Inner fleece plus stretch plush liner in the arms, legs and shoulder areas enhance comfort and warmth.

ADDITIONAL FEATURES
- Double zippered seals on ankles and wrists feature brass sliders for durability, water-tightness and ease of use.
- Right thigh 3D pocket offers lots of room for carrying extra gear.
- Enhanced spine pad provides a welcomed cushion where the tank hits the diver's back.

ONEFLEX 7 & 5MM HOODED STEAMERS, SAR

With a high-visibility red and yellow color scheme, Oneflex 7mm and 5mm Search & Rescue hooded steamers can be easily seen both topside and under water while providing superb thermal protection. Built tough and loaded with comfort and convenience features, Oneflex SAR steamers are smart choices for professional divers working in a range of water conditions.

TRIATHLON CUT & MORE
- Wider panels covering the underarm and back areas allow for unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.

COMFORT & WARMTH
- Plush inside and nylon outside are ultra-durable yet stretchy and comfortable for extended bottom times.
- Stretch fabric on arms and underarm areas make the suits easier to don and doff while increasing comfort and freedom of movement.

RELIABLE ZIPPER SYSTEM
- Diagonal front YKK zipper with brass slider increases long-term durability and ease of use.
- Single YKK zippers on ankles and wrists feature brass sliders and pull tabs, and the built-in cuff seals are comfortable and easy to use.

PROTECTIVE FEATURES + POCKET
- Anti-abrasion patterns on shoulders, seat and kneepads provide protection and extend the life of the suit.
- Reflective panels on hood, shoulders, forearms and backs of ankles increase visibility.
- Zippered 3D utility pocket provides a secure place for carrying tools or accessories.

ONEFLEX 3MM & 2.5MM HOODLESS SUITS, SAR

When warmer waters dictate lighter-gauge dive suits, professional divers can turn to the Oneflex 3mm SAR steamer and Oneflex 2.5mm SAR shorty. Built with the same design and construction elements as heavier Oneflex SAR dive suits, these warm-water offerings come with familiar vertical rear YKK zippers that are durable and easy to use.

BRIGHT RED & YELLOW COLORS
- Make the suits easy to see in and out of the water. Reflective panels and logos on shoulders increase visibility.

ANTI-ABRASION FEATURES
- Outside stretch fabric on arms and underarm areas contribute to making the suit much easier to don and doff while increasing comfort and freedom of movement.
- Anti-abrasion material on shoulders and seat, as well as kneepads on the 3mm steamer, protect from scrapes and scuffs.

TRIATHLON CUT DESIGN
- Featuring lots of range of motion in the shoulder and arm areas, these dive suits are also built using the Pure Design Concept which uses fewer seams and panels for maximum flexibility.

3MM STEAMER FEATURES
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine for a long productive working life.
- Single cuffs on ankles and wrists are comfortable and super-stretchy to aid in donning and doffing.

SCUBAPRO

S-TEK FIN

A addition to SCUBAPRO's S-Tek line of technical diving equipment, the S-Tek Fin is a purpose-built, next-gen technical diving fin providing maximum power when you need it. Constructed of durable Monprene® for maximum durability and designed with an ultra-streamlined profile, the S-Tek Fin's 30° pre-angled blade requires less deflection to achieve the desired angle of attack for an efficient kick. This allows for a stiffer blade without increasing drag, thereby reducing leg cramps and ankle strain while delivering unbeatable maneuverability and alternate kick performance. In particular, the S-Tek Fin excels in frog kicks, backward kicks and helicopter turns, plus produces a high-torque flutter kick.

- Clean Water Blade and Vented Blade design reduces drag and increases thrust.
- Hydra-Loop ramped and reinforced leading edge improves lateral rigidity for improved alternate kicks, plus creates a hydrofoil profile for better thrust.
- Removable Stainless Steel Weight Plate System lets you choose between a positively buoyant, neutrally buoyant, or negatively buoyant fin.
- The S-Tek Fin's two-piece design, with blade and foot pocket molded separately, makes transport easy.
- Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that allows for easy assembly and disassembly.
- Open heel foot pocket features an upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- The Complete Fin is available in black in 5 sizes (XS, S, M with Midi blades; L, XL with Maxi blades) and includes a Multi-Tool and 2 sets of Lock Plates, a Stainless Steel Weight System and a SCUBAPRO boat bag.
- Compatible with Seawing Supernova foot pockets.

SEAWING SUPERNOVA

SCUBAPRO's Seawing Supernova represents the next generation of powerful SCUBAPRO fins. Winner of the prestigious, internationally-recognized Red Dot Award for product design, the Seawing Supernova is a step up from the Seawing Nova in performance, construction, fit and versatility. The proven Pivot Control Technology (PCT) works in tandem with the unique Auto-Adjust central panel to always provide the optimal angle of attack for the blade. The PCT hinges pre-set the blade in the 40° to 50° range that is ideal for converting kicks into forward motion. The flexible Auto-Adjust central panel then fine-tunes the angle of attack according to the strength of kick by counter-pivoting, providing a milder angle of attack for comfort when kicking gently, a more aggressive angle of attack when kicking at full strength, and anything in between. When it comes to frog and alternate kicks, the twin-tip winglets increase control and markedly improve maneuverability. The Seawing Supernova's innovative two-piece design, with blade and foot pocket molded separately, makes transport easy, and with the optional full foot pocket the fin can be modified to handle any warm-water dive scenario. The Seawing Supernova is the essential high-performance fin for avid recreational and professional divers seeking maximum speed, power and control in all diving conditions.

- Innovative blade shape produces more power, more speed and better maneuverability.
- Blade's central panel membrane auto-adjusts the angle of attack based on kicking strength, providing easier kicking when cruising and maximum power when needed.
- Central panel Hydra Loop channels water flow rearwards for increased efficiency and thrust.
- Pivot Control Technology ensures that the most efficient 40° to 50° range of angle of attack is maintained.
- Twin-tip winglets improve control and maneuverability for excellent frog and alternate kicks.
- Two-piece design makes transport easy and increases versatility to handle any dive scenario.
- Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that allows for easy assembly and disassembly.
- Key fob-style multi-purpose tool is included (25.550.001) for assembly and disassembly of the foot pocket and blade, along with a travel-friendly storage bag.
- Made of premium Monprene® for long-lasting durability.
- Sold as an open heel set with open heel foot pocket and blade pre-assembled.
- Open heel foot pocket features an upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- Full foot pocket (sold separately) is available for warm-water conditions that don't require the wearing of a boot.
- Extended grip pads on open heel foot pockets provide an improved non-skid grip on wet surfaces.
- Compatible with colored Scuba Skegs - 25.328.x00 - see page 170

Key fob-style multi-purpose tool is included for assembly and disassembly of the foot pocket and blade.

PIVOT CONTROL TECHNOLOGY:
- Comfortable & Efficient Hinged blade design.
- Made famous by the SEAWING NOVA.
- Aims to pre-set Angle of Attack (AOA) to 45°.
- Blade is effective at all kick strengths.

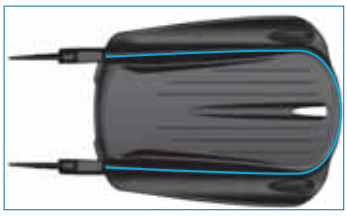

CLEAN WATER BLADE:
- Areas of blade with bad AOA are eliminated.
- Reduces drag and increases thrust.

AUTO-ADJUST-THRUST:
CENTRAL PANEL has a membrane around the sides and front: Allows it to react to water pressure and change angle independently of the rest of the fin.
COUNTER PIVOTS – Opposite to normal fin blades! Normal fins reduce AOA as you kick harder. SUPERNOVA increases AOA as you kick harder!
AUTO-ADJUSTS the AOA based on kick strength. Provides easier kicking when cruising. Maximum power when you need it.

HYDRA-LOOP REINFORCED CENTRAL PANEL:
- Improves lateral rigidity for vastly improved alternate kicks.
- Creates a hydrofoil profile for better thrust.
- Channels water flow rearwards for increased efficiency & thrust

TWIN-TIP WINGLETS
improve control and maneuverability for excellent frog and alternate kicks.

SEAWING NOVA

Setting the bar in dive fin design, the multiple-award-winning Nova Seawing delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort and efficiency of a split fin. Combining classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design, divers will be hard-pressed to find a fin that's more comfortable to wear or fun to kick when cruising the underwater world.

SCUBALAB TESTER'S CHOICE 2015

- Built with a spaceage Monprene® elastomer that is virtually indestructible.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a near-perfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.
- Pivot Control technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.
- Marine-grade bungee strap is self-adjusting, comfortable, extremely durable, and makes easy work of donning and doffing the fin.
- Re-engineered footplate with co-molded Grip Pads provides improved non-skid grip on wet surfaces.

JET FIN

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965, and continue to be immensely popular today.

- Proven vented design
- Spring heel strap

A small hole at the end of the blade has been added, which allows the diver to clip the fins to his suit or BC with a click strap or hook.

TWIN JET II

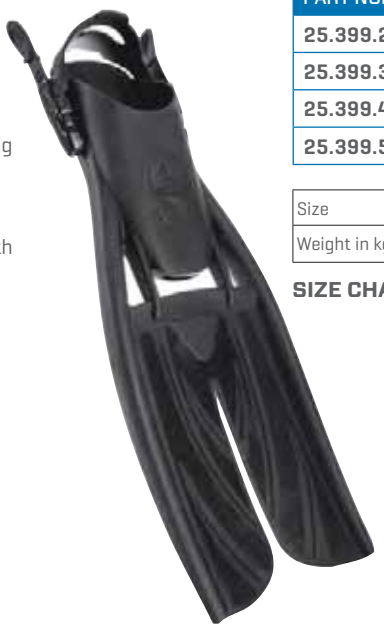

Max out on propulsion with the Twin Jet II. This new split fin is constructed of single material thermoplastic rubber to increase durability and maximise kicking performance while minimizing leg and ankle stress.

PATENTED SPLIT FIN "PROPELLER TECHNOLOGY"
Produces more propulsion with considerably less effort than most traditional blades.

SEMI-RIGID SIDE RAILS
Improve stability through the kicking cycle.

MODERN FOOT POCKET
Offers an extended soleplate to enhance kicking power without wasting energy.

VERSATILE BUCKLE SYSTEM
Comes with standard straps and quick-release buckles. Also compatible with bungee and steel spring straps.

GO SPORT GORILLA

While identical in design to the GO Sport Fin, the Gorilla features a slightly stiffer blade and heavy-duty bungee, providing that extra umph for experienced divers maneuvering through demanding conditions. It is an excellent choice for public safety and professional services divers.

- Built with a higher-grade Monprene® to provide more stiffness for experienced divers.
- Open heel "Boot-Fit" design features the upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- 25° pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect.
- Power Bars on the underside of the rails prevent over flex to maintain the optimum angle of attack.
- Features Black Heel Grips and Black Skegs.

GO SPORT

The GO SPORT fin features a "Boot-Fit" design and offers the same functions and features as the original GO fin. This version features a revised Ergo3 foot pocket that has been re-profiled to accommodate boots. The blade has also been slightly revised; it now provides mounting points to attach skegs that minimize sideslip and maximize stability. Like the original GO fin, the GO SPORT is designed to fit easily in IATA carry-on compliant luggage.

- Lightweight design increases convenience when travelling and comfort in the water
- Open heel "Boot-Fit" design features a replaceable self-adjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff
- Revised Ergo3 foot pocket is re-profiled for maximum comfort and power transfer
- Ultra-strong 100% Monprene® construction avoids problems of delamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use
- 25° pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect
- Power Bars on the underside prevent overflex to maintain the optimum angle of attack under high-load conditions
- In-water performance delivers speed, power, stability and maneuverability with a minimum of effort
- Mounting points for skegs that minimize sideslip and maximize stability
- Skegs come in a variety of colors for customisation and to color-code sizing in rental operations - see page 131
- Fins fit easily in IATA carry-on compliant luggage
- Sizing profile is the same as the Seawing Nova

GO FIN

GO travelling, GO Diving, GO Snorkeling – with the GO fin. This travel fin combines the benefits of an open heel fin, with the comfort and barefoot freedom of a full foot fin. The GO is lightweight yet virtually indestructible, plus it's a fast and nimble performer in the water. It's also designed to fit easily in IATA carry-on compliant luggage, making it the ideal fin everybody who enjoys travelling the world.

- Lightweight design increases convenience when travelling and comfort and ease of use in the water (Size M-L weighs 1 kg a pair)
- Barefoot Design features a replaceable self-adjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff – it can also be used when wearing neo socks.
- Ultra-strong 100 percent Monprene® construction avoids problems of de-lamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use
- 25-degree pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect
- Power Bars on the underside of the rails prevent overflex to maintain the optimum angle of attack under high load conditions
- In-water performance delivers speed, power, stability and maneuverability with a minimum of effort
- Fins fit easily in IATA carry-on compliant luggage
- Innovative Piggy Back Stack system interlocks one fin blade into the other, creating a snug pairing
- Coloured bungee straps are available optionally

JET SPORT ADJUSTABLE

Lightweight and comfortable, fans of traditional blade fins will be impressed with the performance of the Jet Sport. With a big, slightly stiff blade and a soft rubber foot pocket, this fin generates propulsive kicking power, provides good stability and makes efficient work of frog and dolphin kicks. The fin is easy to maneuver too - responsive in turns and able to back you out of tight spots. It's the perfect blend of performance, kicking comfort and price.

- Three-material blade construction optimizes flex to maximize kicking performance
- Drag reducing vents substantially decrease resistance on both up and down strokes
- Big blade generates a powerful response in the water and improves stability and maneuverability
- Ergonomic foot pocket molds to your foot for total comfort during long dives
- Quick release buckles simplify strap adjustment and make donning and doffing easy
- Effective non-skid pattern protects against slips on wet surfaces

JET SPORT FULL FOOT

A full foot version of the powerful Jet Sport adjustable, this is a lightweight fin that delivers lots of propulsion, excellent maneuverability and feels comfortable on bare feet.

- Three-material blade construction optimizes flex to maximize kicking performance
- Drag reducing vents substantially decrease resistance on both up and down strokes
- Big blade generates a powerful response and improves stability and maneuverability
- Ergonomic full foot pocket molds to your entire foot for total comfort during long dives
- Effective non-skid pattern protects against slips on wet surfaces
- It's an ideal choice for finning in the tropics.

JET CLUB FULL FOOT

The Jet Cub full foot fin comes with an ergonomic foot pocket that lets you enjoy remarkable foot comfort while benefiting from impressive kicking performance. The fin's blade generates lots of power, while its vented design and three-material construction help maximize thrust and maneuverability and minimize leg strain.

- Ergonomic foot pocket increases comfort and contributes to the fin's overall efficiency
- Blade generates a powerful response
- Three material blade construction optimizes flex to achieve a high kicking performance
- Drag reducing vents substantially decrease resistance on both the up and down stroke

D-MASK TWIN LENS MASKS

Sharing the design scheme of the D-Series D420 regulator, the D-Mask is a sleek, premium mask well-suited for all types of diving. The mask features true color UV protective lenses that deliver the best balance of surface protection and underwater clarity. It also features an interchangeable lens system for optional optical lenses. Offering a comfortable fit and a wide field of view, the D-Mask is available in black with blue accents to match the D420 regulator's color scheme. It comes with a choice of black or clear skirts in two sizes: Medium and Small, and there's also a Wide skirt available in black only.

The D-Mask's skirt is made with SCUBAPRO's revolutionary **Trufit Technology**, utilizing a unique ribbing pattern and not one but two thicknesses of high-quality silicone. The silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable and extremely comfortable watertight seal.

- Sleek design matches the D420 regulator.
- True color UV protective lenses offer protection from UV light on the surface without affecting colors under water.
- Interchangeable lens system makes it easy to install optional optical lenses.
- Available with a choice of skirts to suit a variety of face shapes.
- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal
- Rotating buckles work with a black-on-black Comfort Strap to optimize range of motion and achieve a comfortable, watertight fit.
- Included in the durable molded fabric box: mask delivered with blue mask frames, all black colored frames, a HUD hands-free dive computer mount and an all-black Comfort Strap.
- Optional lenses available: Optical lenses (6x positive +1.5 to +4.0/8x negative -1.5 to -5.0); Bi-Focus lenses (3x positive +1.0 to +3.0).
- Optional Color kits available
- Mask delivered as standard with a black-black Comfort Strap, a black color kit and a D-Mask HUD Mount.

SYNERGY MINI

The Synergy Mini is the little brother/sister of the Synergy Twin mask. With its downsized design, it features a smaller frame and a smaller skirt to accommodate smaller faces. The Synergy Mini's Trufit skirt is both extremely comfortable and ensures a watertight seal on men and women who have had issues getting the full-sized Synergy Twin to seal on their faces. The dual lens design is low volume and offers a wide field of view, and the mask comes standard with a color-coordinated Comfort Strap.

- Downsized, with a smaller frame and a smaller skirt to fit smaller faces
- Trufit Technology can be identified by its unique ribbing texture on the mask skirt
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal
- Rotating buckles work with a color-coordinated Comfort Strap to optimize range of motion and achieve a comfortable, watertight fit
- Ultra Clear lenses provide optimal clarity under water

The Synergy Twin benefits from SCUBAPRO's second-generation Trufit Technology, a skirt made of two thicknesses of silicone – thin and pliable where it touches the face for comfort and to ensure a watertight seal, and thicker near the mask frame for support and rigidity. It's an effective combination that delivers a comfortable fit for a wide range of face shapes as well as a reliable seal against water intrusion. The dual-lens design is low volume and offers a wide field of view.

All-black version for military use or for divers who don't want colored equipment.

- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Mirrored lens option delivers a glare-free view of the underwater world.
- Ultra Clear no-tint glass provides optimal clarity under water.

This model includes a black-on-black Comfort Strap.

ZOOM

The Zoom is a low volume dual-lens mask that is ideal for all divers, but is especially well-suited to divers who use optical lenses. The mask has a lens-change system that enables you to switch lenses yourself, without tools, in less than a minute. Featuring spray-painted sub-frames in colors matching Seawing Nova fins, HYDROS BCD color kits and the UPF Collection of rash guards, steamers and leggings, the Zoom offers a universal fit and includes an integrated buckle design that is compatible with the Comfort Strap.

All-black version for military use or for divers who don't want colored equipment.

- Convenient lens-change system for divers who use optical lenses.
- Lens-change system lets you change the lenses yourself, without tools, in less than a minute.
- Ultra Clear no-tint glass provides optimal clarity under water.
- Low volume design makes clearing easy.
- Universal fit ensures a comfortable, watertight fit.
- Integrated buckles make adjustments easy.
- Colorful spray painted sub-frames come with black or clear skirts.
- Equipped with a standard silicon strap.
- Compatible with optional Comfort Straps.
- Optional accessories like a HUD hands-free dive computer mount adapter, color kits and optical/bifocal lenses are also available.

REPLACEABLE OPTICAL LENSES RANGE FROM -1.0 TO -8.0 (IN .5 DIOPTER INCREMENTS). LENSES ARE INTERCHANGEABLE AND WILL FIT EITHER THE LEFT OR THE RIGHT SIDE. SEE P183

- Add-on Bi-Focus lenses are magnifiers that are bonded to plain lenses and range from +1.0 to +3.0. These have a left and right side.

ZOOM LITE WINTER 2024/25 new

The **new** Zoom Lite dual-lens mask offers divers a more comfortable, lightweight experience. It offers all of the same features and functions of the standard best-selling Zoom mask, but comes with lightweight polycarbonate lenses instead of glass. The mask comes with a choice of solid-color frames and skirts and includes an integrated buckle design that is compatible with the Comfort Strap. For divers who use optical lenses, the Zoom Lite features an easy lens-change system that enables you to switch lenses yourself, without tools, in less than a minute.

- Lightweight polycarbonate lenses.
- Low volume design makes clearing easy.
- Universal fit ensures a comfortable, watertight fit.
- Integrated buckles make adjustments easy.
- Equipped with a standard silicone strap.
- Compatible with optional Comfort Straps.
- Available in seven solid mask/skirt colors.
- Convenient lens-change system lets you change the lenses yourself, without tools, in less than a minute.
- Optional accessories like a HUD hands-free dive computer mount adapter and optical/bifocal glass lenses are also available.
- **Care Information:** Do not use toothpaste, harsh or abrasive cleaning agents. When not in use, avoid placing in very high or low temperatures and sunlight. Clean the outside only with clean, cold water and a soft cloth.

STEEL COMP FREEDIVING MASK

new

The ultimate freediving mask, the, dual lens STEEL COMP is particularly well-suited to deep diving. It has the lowest possible internal volume so equalizing is easy. Plus, on descents the mask itself compresses, so equalization is not required as often. The skirt is very effective at blocking out light reflection at depth. The soft skirt and rotating buckle system allow for a comfortable, watertight fit on most faces.

- Low internal volume enables easy equalizing, a huge plus for freedivers.
- Ultra Clear scratch-resistant glass lens delivers distortion-free vision and long-term wear.
- Premium supple silicone skirt comfortably fits a range of faces.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Scaled-down size is ideal for smaller divers or those with narrow faces.

Note: As water pressure increases, the bridge between the lenses bends slightly and squeezes the mask tighter to the face. The only noticeable indication of this is a brief change in vision as the eyes need a split second to adjust. However, because of this the Steel Comp is not recommended for scuba diving.

FRAMELESS GORILLA SINGLE LENS MASKS

The FRAMELESS GORILLA has a slightly larger and wider lens than the original Frameless mask, and a slightly larger skirt in a matte finish. Otherwise, it shares the same classic single lens design and long list of comfort and performance features. Like on the original Frameless, the soft silicone skirt on the FRAMELESS GORILLA is comfortable yet durable, and the double-edge seal feels good against the skin. The buckle system is easy to use and allows for quick adjustments. Buckles attach to flexible tabs on the skirt; this optimizes strap angle when dialing in fit. The wide headband spreads the load on the back of the head, greatly enhancing comfort. For divers with larger or wider faces the FRAMELESS GORILLA is an excellent choice.

- Extra-large single-lens provides an expansive field of view while reducing volume
- Slightly larger double-seal matte skirt creates a comfortable, watertight seal on larger faces
- Push-button buckles attach to tabs on the skirt to optimize range of motion when dialing in fit
- Buckle tabs are flexible, enabling the mask to be folded flat for travelling
- Wide headband allows for a comfortable fit against the back of the head

SCUBAPRO's classic Frameless is diving's original frameless mask, and it continues to be the mask of choice among professional divers throughout the world. Its single lens design features a distinctive rectangular shape that provides an excellent field of view on the periphery as well as straight ahead. The soft silicone skirt is comfortable yet durable, and the double-edge seal feels good against the skin.

- Frameless single-lens design provides an expansive field of view while reducing volume
- Soft silicone skirt uses a double-seal system for a comfortable, leak-proof fit
- Push-button buckles attach to tabs on the skirt to optimize range of motion when dialing in fit
- Buckle tabs are flexible, enabling the mask to be folded flat for travelling
- Wide headband allows for a comfortable fit against the back of the head

CRYSTAL VU

A large single lens plus seamless side windows equals an expansive view under water. The double-sealed silicone skirt offers a seal that is both comfortable and watertight. An exclusive paint process lets you dive with style.

- Patented tempered glass single-lens design with side windows creates a panoramic field of vision.
- Double-sealing skirt is comfortable against the skin and keeps water out.

SYNERGY 2 TRUFIT

Called the most comfortable dive mask on the market, you have only to try on a Synergy 2 to feel the difference. Made with SCUBAPRO's Trufit Technology, its double-skirt system has proven to be ultra comfortable during extended periods under water while providing a watertight seal on virtually all face shapes. The single lens provides excellent field of view, and the buckle system is easy to use. The mask frame is spray painted for that premium look.

- Trufit Technology design uses two skirts for creating a comfortable, watertight seal.
- Main skirt offers a thin and soft silicone material for the best possible fit, seal and comfort against the skin.
- Outer skirt, made with firmer silicone, provides support and rigidity where needed.
- Trufit Technology can be identified by its unique ribbing texture.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Push-button buckles attach to tabs on the skirt to optimize range of motion when dialing in fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.

STEEL PRO

new

The single lens, low volume STEEL PRO offers an expansive view of the underwater world. Perfect for freediving or scuba diving, the frameless design is streamlined and lightweight, and the soft silicone skirt provides a comfortable fit on a range of face shapes. Rotating buckles work with a micro-adjustable strap to maximize water-tightness and the skirt is very effective at blocking out light reflection at depth. The low volume design makes the STEEL PRO a great mask for all types of diving.

- Low internal volume enables easy equalizing, a huge plus for freedivers.
- Premium super-soft silicone skirt seals out water and comfortably fits a range of faces.
- Ultra Clear scratch-resistant glass lens delivers distortion-free vision and long-term wear.
- Easy-adjust rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.

SOLO

The Solo is a modern single lens mask that offers a panoramic, low volume field of view in the streamlined design. The double-sealed silicone skirt molds to the face to create a comfortable, watertight seal. Buckles with flexible mounts on the skirt allow you to easily route the non-slip strap to achieve the perfect fit. This mask is a favourite among recreational divers.

- Dual colored frameless single lens design delivers a panoramic field of view.
- Low volume design increases field of view plus makes clearing easy.
- Non-slip strap with easy-adjust buckles let you find that perfect fit.
- Tempered glass lens.

ULTRA CLEAR LENS
Standard glass has a slight green tint, resulting from impurities that do not have a big influence on vision but can distort true colors and reduce light transmission through the glass under low light conditions. SCUBAPRO ultra clear lenses offer exceptional clarity together with brighter vision underwater.

COMFORT STRAP COMPATIBLE: Masks that show this icon are compatible with Comfort Straps

GALILEO HUD COMPATIBLE: Masks that show this icon are compatible with Galileo HUD

TRUFIT : Uses two different thicknesses of the same high quality silicone in one skirt, assuring total comfort and sophisticated simplicity

DEVIL

This devil of a mask offers excellent field of vision, and the super soft black silicone skirt blocks out light reflection, a huge plus for photographers. The design of the nose pocket makes it easy to equalize while descending. The mask comes with the EZ-Open mask strap; a standard mask strap is included in the box.

- Super-soft silicone skirt is comfortable and seals well against facial skin.
- Ultra Clear lens is durable and allows for distortion-free viewing.
- Easy-grab nose pocket makes equalising a quick and simple task.
- Buckles will also accommodate SCUBAPRO Comfort Straps.
- Includes EZ-Open mask strap.
- Buckles will also accommodate SCUBAPRO Comfort Straps.

TRINIDAD 3

The Trinidad 3 offers the same popular single lens design and lightweight frameless construction as the Trinidad 2. The quick-release buckles attach to tabs on the skirt to optimize range of motion when dialing in fit.

- Lens and skirt are assembled without frame reducing size and weight.
- Single lens style offers a wide vision range.
- Extremely low volume allows easy clearing.
- One hand quick-adjust buckle system lets you dial in the perfect fit.
- Buckles accommodate the ski goggle-style Comfort Straps.
- Tempered glass lens is durable and distortion-free.

COMFORT STRAPS

Upgrade your diving or snorkeling mask with a Comfort Strap. Similar to a ski goggle strap, the Comfort Strap is comfortable, keeps hair from knotting and pulling, and attaches quickly and easily to a variety of mask models.

- Ideal addition to any diving or snorkeling mask.
- Uses the same design concept as a strap used on ski goggles.
- Easy to attach, easy to use.
- Enhances mask comfort and keeps hair from knotting and pulling.
- One size fits all for total convenience.

SYNERGY TWIN TRUFIT COMBO

This premium mask/snorkel set includes the Synergy Twin Trufit mask and Spectra Dry snorkel. The Synergy Twin features a skirt made of two thicknesses of silicone – thin and pliable where it touches the face, and thicker near the mask frame for support and rigidity. Its low volume, dual lens design offers a wide field of view. The Spectra Dry is an easy breather. Its large-bore upper tube allows plenty of airflow, and its dry top keeps water out so no clearing is needed upon resurfacing. The combo comes packed in a convenient carry bag.

• Carry bag is made of 600D Polyester with a PU coating and includes a carry handle.

SPECTRA DRY

Offered as the perfect companion to SCUBAPRO's Spectra mask, the Spectra Dry's large-bore upper tube allows plenty of airflow, and its dry top keeps splashing surface water from entering the airway. An efficient purge valve expels any water that might seep in. The flexible lower tube hangs down and out of the way when not being used.

- Large-bore upper tube with dry top is designed for dry and easy breathing
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator
- Purge valve, positioned at the lowest point, takes care of any water that might enter the airway
- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkelling adventures
- Offered in five metallic colors to coordinate with Spectra masks.

SPECTRA

This snorkel is tops when it comes to breathing comfort and ease of clearing. The large-bore upper tube is rigid for stability and allows plenty of airflow, while the corrugated lower tube can be easily positioned when being used, and hangs out of the way when not being used. The semi-dry top helps prevent water from entering, the purge valve positioned at the lowest point makes quick work of any water that does sneak in.

- Large-bore upper tube is fitted with a semi-dry top to deflect surface splash
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator
- Purge valve, positioned at the lowest point, takes care of any water that enters the airway
- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkelling adventures
- Exclusive paint process includes stylish duotone colors

ESCAPE

new

The semi-dry barrel-top design of the helps keep water from entering the large-bore barrel while allowing abundant airflow. Included is a very efficient purge valve located down low, a ultra-comfortable regulator-style mouthpiece and a convenient cell phone-style clip for easy removal.

PROFESSIONAL SERVICES

- Semi-dry top design prevents water from entering the large-bore barrel
- Flexible, corrugated section is easy to use and drops away from face when not needed
- Ergonomic mouthpiece enhances comfort during extended swims
- Purge valve positioned at the lowest point requires only a quick breath to clear any errant water
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap

SCUBAPRO
SCUBAPRO

DEFINITION BAG LINE

SCUBAPRO's Definition Bag line is an assortment of premium bags designed to protect your dive equipment during transport and travel. Made with recycled two-tone gray fabric, blue accents, and a black inside lining featuring the SCUBAPRO logo, these bags are stylish and loaded with stowage options. Built to last, all zippers, pull bars and wheels are made from premium materials and constructed for long-lasting use in a diving environment.

DEFINITION ROLL 130

The Definition Roll 130 is a premium roller bag loaded with travel-friendly features, including a solid back to increase rolling stability and a telescopic tow handle for easy maneuvering through airport terminals. Huge volume main compartment includes a zippered mesh pocket on the inside cover. Additional external front compartment with zipper allows for extra storage. Made with recycled two-tone gray fabric with blue stitched bar tack reinforcements, this quality bag is ready for world travel.

- Premium wheeled duffel for dive travel.
- Made from recycled two-tone gray fabric with a black inside lining sporting the SCUBAPRO logo.
- Heavy-duty construction includes blue stitched bar tack reinforcements.
- Solid back and telescoping tow handle add to rolling convenience and stability.
- U-shaped opening features a rain-proof YKK zipper with double sliders, black pull cords and a locking loop for security.
- Large zippered front pocket provides additional easy-access storage.
- Comes with removable and adjustable backpack straps and top and side web handle increase carry options.
- Rigid bottom handle aids in lifting bag onto any table or facilitate carriage by two people.
- External compression straps help snug down a partial load to make bag handling easier.
- Wheels are changeable and roll on axles treated for salt water-resistance.
- Dimensions (approximate): 72x41x45cm
  - Weight: 4.50kg

OCEAN CLEAN UP BAG

Divers can do their part to keep the oceans clean by carrying a SCUBAPRO Cares Ocean Clean-Up Bag folded away in a BCD pocket. While out on a dive, if you come across a rusty can, a bit of plastic, or other underwater litter, simply unfold the bag and load the trash. The fabric and mesh construction allows water to flow through, minimising drag, plus makes for easy cleaning after returning to the surface and emptying the bag into a trash receptacle. A Hook & Loop closure keeps the contents secure, and large double D-rings can be used as handles and provide clip-off points for attaching to a BCD or belt equipped with a carabiner (not included). A blue bungee keeps the bag neatly rolled up when not in use.

- Dimensions: 55x37x10cm
- Weight: 135g
- Volume: 20L

LIFELINE JAWZ TI MULTI-PURPOSE RESCUE TOOL

More than a dive knife, the JAWZ Ti™ is a versatile, all-in-one multi-purpose rescue tool for dive professionals. It is designed to be worn on the upper chest area of a BCD using a TacWare™ J-clip (included) that allows instant access to the tool. Easy one-handed operation is ideal for cutting jobs in low visibility or restricted movement environments. The JAWZ Ti™ effectively cuts rope, monofilament line, netting, webbing and other materials commonly encountered under water. Each tool is made from Grade 38 ATI 425 ballistic titanium with 316 stainless steel hardware. Handles and sheaths are made from either heat-injected molded polypropylene thermoplastic, or polypropylene thermoplastic with glow-in-the-dark phosphorescent strontium aluminate to increase functionality in low-light conditions.

The JAWZ Ti™ features two main cutting surfaces with three distinct cutting areas: a cutting blade on the spine for cutting above or behind the head, an aggressive full length serrated blade, and a curved hooked blade for pull cuts or slashing. On the end of the handle a pointed breaker is provided for breaking glass or creating starter holes prior to cutting. Put them together and you have a high-performance specialty tool for a wide range of surface and underwater operations.

- An essential tool for search and rescue, military and survival applications.
- ATI 425 titanium alloy exceeds the corrosion resistance, ballistic and strength requirements of MIL-DTL-46077 titanium armour plate.
- Metal is PVD-BLACKCAT™ coated for corrosion resistance and durability. PVD-BLACKCAT™ is a "green" coating that uses no harsh chemicals in its production and offers a durable, attractive, performance-enhancing finish.
- Glow-in-the-dark handles and sheaths can be recharged by any form of UV light, including sunlight.
- Index finger grip and thumb grip on the spine make for easy one-handed operation.
- Highly aggressive serrations can cut through a variety of materials found under water.
- Cutting surface on spine is effective at slicing through monofilament line and netting.
- Serrated hook is good for cuts that require pulling or slashing rather than a sawing motion.
- Blunted nose protects against puncturing BCD bladders or hoses.
- Pointed breaker on the handle is highly effective against laminated glass and for creating starter holes before cutting.
- TacWare™ J-Clip, made of high-strength polymer, is designed to hold up to heavy, long-term EDC (Every Day Carry) use. It can be attached to 1.5" – 1.75" belt widths and up to triple-layer nylon webbing. A built-in finger-grab allows for easy removal.
- A sheath is included.

ALL ABOUT JAWZ TI

LIFELINE Tactical Rescue Tools

Manufactured by LIFELINE Tactical Rescue Tools

TK15

The TK15 is the first of a "Tactical" series of dive knives. It is built around a single piece of marine-grade stainless steel that's b+een machined to achieve the ideal balance of strength and weight. Its surface is specifically polished to let the water drain easily and prevent oxidation. The thickness of the stainless steel is consistent from one end to the other, creating a high level of stiffness. The blade is 15cm long and features a lower smooth-edge and an upper serrated edge close to the handle to maximize control of the cut. There's also a line cutter. The knife comes with a heavy-duty handle and a fiberglass-reinforced polyamide sheath with nylon straps. Also included is a SCUBAPRO branded hand cover with bungee for securing the knife to the hand in critical dive conditions.

- Built with marine-grade stainless steel, the best material for maintaining cutting edge reliability and resisting corrosion
- Substantial 15cm blade offers plenty of heft and cutting power
- Both smooth and serrated blade edges are designed to meet any cutting situation
- Heavy-duty handle with stainless steel screws provides a reliable hand-hold when wearing gloves
- Fiberglass reinforced polyamide sheath with nylon straps delivers reliable knife protection
- Recesses in the handle matched to teeth in the sheath enable the knife to securely stay in place
- Red tab on the underside of the Hook & Loop leg strap keeps the sheath secured on the leg when pulling the knife out for use

32.005.100

32.006.100

SCUBAPRO's all-purpose K knives feature quality stainless steel blades with a fine hollow-ground cutting edge on one side, a serrated edge on the other, plus a notch for cutting line. K knives are offered in two sizes to handle any diving situation:

The **K6** is the largest of the two. It features a 15.5cm stainless steel blade plus a stainless steel hammer at the top of the ergonomic grip handle. Available in black, it includes an injected molded sheath and two quick-adjusting buckle straps.

The **K5** is the mid-sized model with a 11cm stainless steel blade, ergonomic grip handle and a locking injected molded sheath with two quick-adjusting buckle straps.

MAKO

PART NUMBER	DESCRIPTION	MSRP
32.022.000	Titanium	165,00
32.023.000	Stainless steel	109,00
32.005.207	Mako Sheath	13,00

The Mako knife has a 8,5cm multifunctional blade providing a conventional edge, line-cutting notch, serrated edge and bottle opener. Comes with a locking sheath with a one-hand release mechanism.

X-CUT

The lightweight, multi-function, X-Cut is made from alpha (hardened) titanium. Its blade is specially designed and shaped to maintain a sharp cutting edge for a long life of corrosion-free performance.

- Measures just over 12.7cm in overall length
- Its 6.3cm blade offers both serrated and smooth cutting edges, along with a line cutter
- No-nonsense handle is contoured and offers both indents and a finger guard to enable you to maintain a firm, non-slip grip
- A lanyard eyelet is provided for running a wrist lanyard
- Low profile, protective sheath features a Hook & Loop closure and is designed to fit on a tech harness waistband.

30.232.002	NOVA 1000R WIDE WITHOUT BATTERY & CHARGER	188,00

NOVA 1000R & 1000R WIDE

The Nova 1000R is an upgraded version of the Nova 850R, delivering increased lumens for even brighter illumination, a powerful 21700 li-ion battery that pumps out 40% more burn time, and a focused 8° beam angle. Built to last, this compact dive light is machined from heavy-duty black matte aluminum and includes an extended light head shroud to control the beam. A must-have piece of gear for any night dive or day dive, an easy-to-use push-button switch activates the light, and a 50% mode allows you to extend your burn time if you don't need full power. The Nova 1000R Wide delivers the same illumination and offers the same features as the Nova 1000R, but is equipped with a wider 80° beam, making it the perfect primary night diving light.

- Rugged matte black aluminum body with blue accents offers a high-quality look while providing lightweight, long-term durability.
- 1000+ lumens for super bright illumination.
- 21700 li-ion battery delivers 40% more burn time than the old 18650 battery and is widely used in modern rechargeable products.
- Double O-ring seals ensure watertight integrity.
- Push-button switch is easy to activate, even when wearing gloves.
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing.
- A depth rating of 492ft/150m ensures worry-free lighting in virtually all diving conditions.
- Powered by a single 21700 li-ion rechargeable battery (a high-quality XTAR 21700 rechargeable battery and a battery charger are included with 30.231.001 & 30.232.001 only)
- Packaged in a reusable semi-soft box with a lanyard.
- Burn time: up to 2.5 hours on full power.

1000R

1000R WIDE

NOVA 1000R
- Equipped with a Cree XPL LED.
- 21,000 lux @1m.
- Beam angle: 8°.
- Measurements: 1.77 x 6.61in/45 x 168mm.
- Weight (w/o battery): 8.47oz/240g.

NOVA 1000R WIDE
- Equipped with a Cree XML LED.
- Beam angle: 80°.
- Measurements: 1.77 x 6.3in/45 x 160mm.
- Weight (w/o battery): 8.68oz/246g

NOVA 850

The Nova 850 delivers intense illumination, ideal for lighting up the dark spaces and bringing out the vibrant colors on night dives as well as day dives. It is machined from heavy-duty aluminum so is both lightweight and built to last. It's also easy to use. A 50% mode allows you to increase burn time if you don't need the full power. For divers looking to brighten their dives, the Nova 850 is the perfect choice. Available in rechargeable and non-rechargeable versions, with a light body to hold a single 18650 li-ion rechargeable battery or 3 C-cell disposable/rechargeable batteries.

- Measurements: 253x45 mm. Weight (w/battery): 522 g
- Rugged aluminum body offers a stealthy "tech" look while providing lightweight long-term durability
- Equipped with a Cree XPL LED.
- 850 lumen illumination.
- 17,000 lux @1m.
- CCT (correlated color temperature): 4200°K
- Beam angle: 8°
- Double O-ring seals ensure watertight integrity.
- Push-button switch on the end of the light is easy to activate, even when wearing gloves.
- Safety-lock mode using push-button switch
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point
- A depth rating of 150m ensures worry-free lighting in virtually all diving conditions.
- 3 x C-cell disposable/rechargeable batteries (not included)
- Burn time: up to 7 hours on full power.

NOVA 850 TEC

In underwater lighting where performance, reliability and simplicity are the keys to success, nothing beats the no-nonsense Nova 850 Tec. This rugged single-mode dive light delivers intense 850 lumen illumination with a focused beam, ideal for lighting up those dark compartments in wrecks and hidden crevices in deep-water reefs. The light is machined from heavy-duty aluminum so is both lightweight and built to last. It is also easy to use, with simple twist-on/twist-off activation. The light comes with a convenient attachment point for attaching a bolt snap – usually with a short length of cave line – so it can be securely clipped to a D-ring when not being used. Divers looking for simple yet serious underwater illumination for night dives as well as day dives will find the Nova 850 Tec a smart choice.

- Rugged matte black aluminum body with blue accents offers a stealthy tech look while providing lightweight, long-term durability.
- 850 lumen illumination.
- Equipped with a Cree XPL LED.
- 17,000 lux @1m.
- CCT (correlated color temperature): 4200°K.
- Beam angle: 8°.
- Double O-ring seals ensure watertight integrity.
- Easy twist-on/twist-off activation allows for trouble-free operation, even when wearing thick gloves.
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point.
- A depth rating of 300m ensures worry-free lighting in virtually all diving conditions.

ADDITIONAL SPECS:
- Measurements: 243x45mm.
- Weight (w/o batteries): 288g.
- Powered by: 3 C-cell disposable/rechargeable batteries (not included) 35.121.100 – see P248
- Burn time: up to 7 hours on full power.

SCUBAPRO

MK2EVO/R105 REGULATOR FOR YOUNG DIVERS

Young diver's version with shorter LP hose and a smaller mouthpiece.

MK2 EVO FIRST STAGE

- Classic downstream piston design features a chrome-plated brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance.
- Chrome-plated brass body is smaller than its predecessor but houses an oversized piston that provides better breathing performance by increasing airflow.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Meets new EN250-2014 standards for cold-water breathing performance.
- Weight (oz/g): INT 232, 23.6/670; DIN 300, 15.9/450.
- Airflow at 2900psi/200bar: (l/min/SCFM): >3000/106.
- Intermediate pressure (psi/bar): 138-145/9.5-10.

R105 SECOND STAGE

- Classic downstream valve comes with a dive/pre-dive VIVA switch to control free flows.
- Metal valve housing is built rugged and increases overall reliability.
- Reversible hose attachment makes it easy to use for side mount, pony or deco tanks.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Short LP-hose and small mouthpiece for kids. Compact Hi-Flow mouthpiece improves airflow.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 5.5oz/156 g.
- Airflow at 2900psi/200bar: 1200 l/min - 42 SCFM.

*** While stocks last**

Specially designed for young divers, the front-adjustable Rebel is built tough to last. Its wraparound bladder provides a stable and secure ride at depth, and the padded backpack provides a lot of additional comfort. A flexible, one-size-fits-all design, coupled with a choice of two sizes of comfortable cummerbunds, enables divers of various sizes to maintain a snug fit. The front integrated gravity weight pocket system loads easily through zippered top openings. Weights are held in place by lower-hook and-loop flaps backed by heavy-duty buckles. They release easily, especially when using SCUBAPRO's optional Rebel weight pouches with easy-grab handles.

- Front integrated gravity release weight pocket system loads and releases weights quickly and easily.
- Constructed of 420 denier nylon for lightweight durability.
- Padded backpack provides extra cushion when strapped to a tank.
- Adjustable sternum strap and cummerbund contribute to a comfortable fit.
- Small and large cummerbunds are included so all young divers can achieve the best fit.
- Buckles on shoulder straps adjust the size range to optimize diver fit and provide additional comfort.
- Standard web strap with lightweight buckle holds the tank securely.
- Two zippered cargo pockets and four plastic D-rings – two large and two small – are provided for carrying extra gear.
- SCUBAPRO's Balanced Power Inflator (BPI) and two dump valves provide pinpoint buoyancy control.
- Optional weight pouches (21.572.000) with easy-grab handles make quick work of handling ballast weight.

REBEL WEIGHT POCKET KIT (21.572.000)

The Rebel Weight Pocket Kit is designed to fit into the Rebel's front integrated gravity weight pocket system. The kit includes two weight pouches that you insert into the Rebel's gravity weight pockets. Each weight pouch can hold up to 5.5lbs/2.5kg of ballast weight and features a convenient plastic handle so divers can quickly and easily remove the weight pouches when needed.

21.572.000

REBEL STEAMER 6/5 & 2.5

- Rebel streamer are made with X-Foam, a non-toxic neoprene formula that complies with the very strict P.A.H. requirements
- Diagonal back zipper and long ankle zippers make the suit extremely easy to don and doff
- Short zipper at the neck enhances comfort during surface intervals
- Stretch neoprene side panels increase range of motion
- Reinforced kneepads avoid abrasion on the legs of both suit and diver when kneeling on the bottom

STEAMER 6/5.0
This hoodless Rebel steamer is made for young divers with two thicknesses of neoprene to deliver thermal insulation in the body's core area where it is needed most, and flexibility in the legs and arms where mobility is key

STEAMER 2.5
This soft neoprene, well-cut steamer is offered in a 2.5mm thickness for maximum comfort when diving in warm waters. Thinner-skin neoprene on wrists can be rolled up or down depending on arm length

REBEL SHORTY BACK ZIP 2.0

Young divers will enjoy wearing this shorty with its cool, modern design. It provides comfort and warmth while underwater for snorkelling and swimming. The sophisticated cut creates a comfortable fit that leaves no pressure marks. The soft neoprene is made from X-Foam, a neoprene formulation that is non-toxic and complies with the very strict P.A.H. requirements.

- Stretch binding at neck, arms and legs makes it comfortable to wear, helps keep water out and warmth in
- Nylon 2 Sides construction for overall comfort
- Diagonal back zipper is comfortable and makes it easy to get in and out of the suit

MICRO 3.0 UNDERWATER CAMERA - Item SL550

The Micro 3.0 Underwater Camera is the third generation of the popular, permanently-sealed, Micro camera series. The camera is leak-proof with no O-rings to lube or maintain, so there is never a worry about flooding the camera. Like its forerunners, the Micro 3.0 features an ergonomic, compact design with easy-to-use controls and menus. The camera has a 16-megapixel Sony® CMOS image sensor and offers 4K ultra-high definition video. Since it's permanently sealed, the Micro 3.0 has a large 3-plus hour battery good for a full day of diving and built in 64gb of memory to store thousands of photos and hours of video.

The camera's ease of use starts with the three wide Piano key type buttons that are easy to locate and control, even with dive gloves on. The intuitive camera's Easy Setup feature quickly guides you through the correct settings based on the shooting environment, depth and lighting accessories being used. The Micro 3.0 offers WiFi sharing ability, so you can wirelessly preview, download and share pictures & videos to a smart phone or tablet with the free Micro 3+ app available at Google Play or Apple App stores.

REEFMASTER RM-4K - Item SL350

REEFMASTER RM-4K COMPACT UNDERWATER CAMERA - Item SL350
Experience unparalleled ease-of-use with the ReefMaster RM-4K, featuring a pocket-sized design with a 14 megapixel Panasonic® CMOS image sensor and ultra-high definition 4K video. The compact, portable design ensures you can take the ReefMaster anywhere. The built-in fisheye lens allows you to closely approach your subject while still keeping everything in the picture. And with SeaLife's know-how in underwater lighting, you'll easily be able to pair your RM-4K with a variety of Sea Dragon Photo/Video lights for any underwater scene or situation.

TECHNICAL FEATURES
- 14 Megapixel Panasonic® CMOS image sensor for sharp, colorful pictures
- 4K Ultra HD Video at 30fps and 1080p HD Video at 60fps
- 40m Compact Underwater Housing
- Humidity Control with replaceable Moisture Muncher dry capsules
- Wide Angle 140° Fisheye Lens to get close to your subject and still get everything in the picture
- 2.0" TFT color LCD Display to keep you on your subject and for quick review of your underwater adventure

SPECIAL FEATURES
- Waterproof to 130ft / 40m using "Pressure-Lock" thumb screw sealing system
- Easy 4 button controls for easy operation
- Wi-Fi to wirelessly preview, download and share pictures & videos to smart phone or tablet with a free app from Google or Apple
- Expandable memory with micro SDHC/SDXC memory card up to 128GB
- Compact design for easy handling and lightweight travel
- Removable Li-ion rechargeable battery (950 mAh / 3.8V / 3.6Wh for 2+ hours video or 500+ images)
- Focus from 12" (30cm) to infinity – optional Macro Lenses available
- Time lapse shooting at set time intervals – saves as video file or series of still images
- Underwater color-correction modes – Underwater Deep for diving and Underwater Shallow for snorkelling
- Image Stabilisation - Electronic stabilisation reduces vibration and hand movement for smoother video recording
- Expandable with one or more SeaLife Sea Dragon Photo/Video Lights

SPORTDIVER ULTRA - UNDERWATER HOUSING FOR SMARTPHONE

The all-new SportDiver Ultra is a cutting-edge underwater smartphone housing designed for superior performance and reliability and offering universal compatibility with virtually all smartphones, including **iPhone 8 and later models, as well as larger Android devices like the Samsung Galaxy Ultra series**. Engineered with an unwavering commitment to excellence, the SportDiver Ultra allows divers and snorkelers to capture stunning photos and videos with their smartphones down to depths of 40 meters.

Constructed from premium polycarbonate, stainless steel, aluminum, and optical-grade glass, the housing weighs 808 grams on land while offering near-neutral buoyancy in water, depending on the smartphone used. Ergonomically designed for comfortable handling and ease of use, the SportDiver Ultra features a large shutter lever and rear control buttons, enabling effortless operation even while wearing dive gloves. Photographers can unleash their creativity by utilizing advanced camera settings such as zoom control, exposure adjustment, auto/manual focus, white balance, lens selection, RAW+JPEG mode, and many more, depending on the phone model.

SportDiver
Bluetooth®

- Easy control– Large shutter lever and rear control buttons for easy operation, even with dive gloves.
- Shoot photos or record video – Easily switch between photo and video modes.
- Dual Leak Alarms – Includes internal moisture alarm and internal vacuum pressure alarm
- Sealed electronic circuitry to protect against damage from accidental water drops entering the housing when opening after diving.
- Durable optical glass lens port design – New landscape-oriented lens port accommodates most multi-lens phones including the Samsung Galaxy S24 Ultra. Ultrawide lens setting will not vignette.
- Removable underwater color-correction filter (included) for bright, colorful underwater photos & videos
- Includes SeaLife SportDiver camera app for iOS and Android
- Bluetooth® wireless technology – Housing automatically connects to your smartphone
- Holding spring and rubber grip tabs securely holds phone in place and adds shock-protection.
- Expandable with Sea Dragon underwater photo-video lights and underwater wide-angle / macro lenses.
- Standard 1/4-20 accessory mounting bar – Seven standard ¼-20 tripod mounts for attaching underwater lighting or any tripod mountable accessory.
- Cam-lock sealing mechanism easily and securely locks waterproof door
- Powered by two AAA batteries that give over 50 hours of continuous use
- Anti-fog design when SL911 Moisture Muncher capsule is used
- Depth rated to 40m – Each housing is individually depth tested
- Dimensions: External: 23.1 cm x 12.4 cm x 6.1 cm. Internal: 18.3 cm x 8.0 cm x 1.2 cm
- Weight: 808g UW housing – with batteries, red filter, and Moisture Muncher (without phone)

SEALIFE SPORTDIVER CAMERA APP FOR ANDROID & IOS
The SportDiver housing includes the free SeaLife SportDiver camera app for Androis & iOS and up and uses the Smartphone camera technology native to each model. The SportDiver housing automatically connects to your smartphone and the SportDiver app using Bluetooth® Low Energy (LE) 5 wireless technology.

Check model compatibility with the "Fit-guide" on the SeaLife website

SPORTDIVER LENSES

PART NUMBER	DESCRIPTION	MSRP
35.335.053	SPORTDIVER WIDE ANGLE DOME 6"/15CM	**210,00**
35.335.054	SPORTDIVER WIDE ANGLE DOME (FOR 52MM THREAD MOUNTS)	**440,00**
35.335.081	SPORTDIVER LENS ADAPTER / LENS HOLDER	**170,00**

SPORTDIVER WIDE ANGLE DOME 6"/15CM The 15cm Wide Angle Dome Lens for the SeaLife SportDiver underwater smartphone housing increases the phone's camera lens field-of view by 43% and allows photographers to get closer to the subject while fitting everything into the image frame. The new dome lens mounts directly to the SportDiver housing's lens port without a lens adapter.

The 0.65x dome lens requires no skill, training, or adjustment; simply mount it and shoot. Split shots that split the topside view with the undersea view are especially easy. There's a safety lanyard included to keep the lens with the housing should it get bumped off. The dome lens design uses high-grade acrylic optics arranged in a 2-element/2- group array that delivers crisp edge-to-edge sharpness. The lens has a 15.6mm film-equivalent effective focal length when used, for example, with the SeaLife SportDiver and the iPhone 15 Pro's 24mm "Ultrawide" camera lens.

The lens is waterproof to 40m and is positively buoyant. The new 6"15cm Dome Lens fits all SeaLife SportDiver housings. The dome lens includes a rotatable sunshade built around the optics to help control stray sunlight. The 15cm dome lens is a "wet lens" and easily attaches and removes underwater, the inner lens chambers are air-filled, and the lens is therefore buoyant. A lanyard is included and prevents the lens from accidental detachment if bumped off.

Includes neoprene dome lens cover and protective pouch.

35.335.053

Shown with SportDiver

- The rotatable light shade prevents unwanted glare from external lighting or sunlight, as well as protect the dome lens from bumps and abrasion.
- Lens are "wet lenses" and can be attached/removed while underwater.
- A lanyard is included and prevents the lens from accidental detachment if bumped off.

SPORTDIVER WIDE ANGLE DOME (FOR 52MM THREAD MOUNTS) The SportDiver Wide Angle Dome Lens for the SportDiver attaches to the Smartphone housing with its 52mm thread mount to the SportDiver SL081 Lens Adapter. The lens also mounts to other underwater cameras and housings using a 52mm thread mount. The increases the phone or camera's field-of view by 43% and allowing photographers to get two times closer to the subject.

The SportDiver Wide Angle Dome Lens design uses high-grade optics arranged in a 4- element/4- group array that delivers crisp edge-to-edge sharpness. The internal elements are fully multi-coated optical glass. The dome lens is optical polycarbonate with hard, anti-scratch coating.

The lens has an 18.2mm film-equivalent effective focal length when used with a 26mm phone or camera lens. The lens is waterproof to 60m.

The SportDiver Wide Angle Dome Lens is a "wet lens" and easily attaches and removes underwater. A locking ring prevents the lens from accidently detaching when bumped or in rougher water conditions. The lens weighs 329 g and is negatively buoyant. A lanyard is included to prevent loss underwater, the lens threads on to the SeaLife SportDiver Lens Adapter (SL081).

Includes neoprene dome lens cover, rear lens cap and protective pouch.

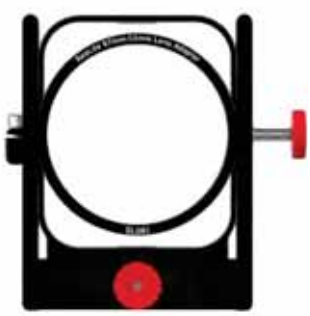

35.335.054

Shown with SportDiver and Lens adapter 35.335.081 (sold separately)

SPORTDIVER LENS ADAPTER / LENS HOLDER With SeaLife's SportDiver Lens Adapter, 67mm and 52mm threaded lenses can be mounted to the SportDiver smartphone housing allowing the underwater photographer to expand their macro and wide-angle creativity by allowing most aftermarket lenses to be used with the SportDiver Smartphone housing.

The precision lens adapter, constructed with hard anodized machined aluminum and stainless-steel hardware, mounts directly to the SportDiver's lens port for a secure, solid fit. The adapter allows for easy horizontal and vertical lens movement adjustments to center the lens over the phone's intended shooting lens. The adapter comes threaded with a 67mm opening for larger diameter lenses. A 52mm threaded ring is included for attaching smaller 52 mm lenses. For other lenses, a step-up or step-down ring may be obtained through dive photo or photography shops.

35.335.081

Shown with SportDiver

ULTRA WIDE ANGLE DOME LENS - MICRO SERIES & RM-4K (SL052)

PART NUMBER	DESCRIPTION	MSRP
35.330.052	ULTRA WIDE ANGLE LENS FOR MICRO & REEFMASTER 4K CAMERAS	**465,00**
35.330.053	LENS COVER FOR DOME LENS SL052 (SL05212)	**18,00**
35.330.054	LENS POUCH FOR DOME LENS SL052 (SL05213)	**18,00**

The Ultra Wide Angle Lens for the Micro-series and ReefMaster 4K underwater cameras that increases the camera's field-of view by almost 50% and allowing photographers to get three times closer to the subject.

The wide angle dome lens design uses high grade optical glass components arranged in a 4-element/4- group array that delivers crisp edge-to-edge sharpness. All optical elements are fully, multi-coated to prevent internal glare and maximize light transmission. The lens has a 13.3mm film-equivalent effective focal length when used with the SeaLife Micro 3.0 and is waterproof to 200ft/60m.

The lens fits all SeaLife Micro-series cameras (Micro HD, HD+, Micro 2.0, Micro 3.0) and also works with the SeaLife ReefMaster RM-4K increasing the tiny camera's shooting angle to a massive 196°. The lens is a "wet lens" and easily attaches and removes underwater. A locking ring prevents the lens from accidently detaching when bumped or in rougher water conditions. The SeaLife Dome Lens weighs 11.7 ounces (331 grams) and is negatively buoyant. A lanyard is included to prevent loss underwater.

The inner airspace is back-filled with nitrogen to prevent fogging in extreme temperature conditions. The rotatable light shade prevents unwanted glare from external lighting or sunlight, as well as protect the dome lens from bumps and abrasion.

SEA DRAGON PHOTO-VIDEO DIVE LIGHTS

- One button control for easy operation - one button to power light on/off, select brightness and switch beam angle
- Easy to expand with Flex-Connect™ trays, grips and Flex Arms, handle, Y-S, ball joint, cold shoe and other accessories
- Universal mounting screw fits SeaLife and other brands of underwater cameras w/ standard ¼-20 tripod mount
- Quick-release button to detach light and aim in crevices and hard to reach areas
- Corrosion-proof metal light head for heat dispersion and durability
- Waterproof battery compartment - even if the O-ring seal fails, the battery compartment is isolated so water cannot reach the internal electronics

SEA DRAGON 5000+ WITH COLOR BOOST™ (SL680)

The Sea Dragon 5000+ photo-video light is a high-performance underwater lamp delivering 5000 lumens in a smooth 120° wide beam. The light offers a 90 CRI (color rendering index) with a proprietary COB LED array that replicates natural sunlight (A CRI of 100 would be just like natural sunlight). With the addition of the newly patent pending SeaLife Color Boost™ mode, the photo-video light combines red and white light frequencies to produce a warming underwater effect that increases brilliance and adds colors to underwater photos and video. The Sea Dragon 5000+ is depth tested to 330 feet (100 meters).

Other underwater LED light brands offer a much lower CRI and miss critical color components necessary to produce natural and colorful undersea images and videos; the Sea Dragon 5000+ powers on at 5000 lumens of white light at 5000k color temperature. When the SeaLife Color Boost™ is activated, the color temperature warms to 3700k, which replenishes lost red for a balanced effect, especially shooting at longer distances. The Sea Dragon 5000+ also has an over-drive feature that allows brightness output of 6000 lumens for 2 minutes time, with or without Color Boost™, and then automatically returns to 5000 lumens to regulate temperature and power consumption. Accessing Color Boost™ is easy, by simply pushing the mode button once. Divers can adjust the brightness from 3000 lumens, 1500 lumens, and red-only stealth mode (which uses two red LEDs that allows for night dives that will not scare sea creatures).

The Sea Dragon 5000+ also features an "Advanced Mode" with more brightness and color settings, including more Color Boost™ options. The light automatically starts in "Easy Mode" with 5 light options. The user can easily change to Advanced Mode by pushing and holding the light's central push-button for 8 seconds from the power-off state. The light also has an Emergency Signal Mode - pushing and holding the central push-button from the off position for 4 seconds accesses the emergency mode with a 40+ hour run time, which will flash a SOS signal or, by touching the button again, a 1-second blinking light.

The 5000+ is lighter and smaller than its 5000F lumen predecessor. The light head includes standard YS adapter, Flex-Connect™ YS Adapter and 1" ball joint adapter, for easy expansion with any YS, Flex-Connect or 1" ball joint system of arms, grips, trays, and mounts. The buoyancy is negative underwater.

The Sea Dragon 5000+ with its powerful 50W Li-ion removeable battery pack, will power the light for 1 hour with Color Boost™ at full power. The light includes an AC battery charger, and international plug adapters and a protective travel case.

MSRP	695,00

PART NUMBER	DESCRIPTION
35.505.680	SL680

Shown with the SportDiver Housing, Flex Connect Single tray & Grip. Sold separately.

SEA DRAGON 3000SF PRO DUAL BEAM (SL679)

PART NUMBER	DESCRIPTION	MSRP
35.300.005	SEA DRAGON 3000SF PRO DUAL BEAM LIGHT W/TRAY & GRIP (SL679)	**690,00**
35.300.006	SEA DRAGON 3000SF PRO DUAL BEAM LIGHT HEAD (SL6791)	**680,00**

The compact Sea Dragon 3000SF Pro Dual Beam Photo-Video light. The larger COB LED delivers 3000 lumens in an even 120° wide beam. The light offers an impressive 90 CRI (color rendering index) with a proprietary COB LED array that replicates natural sunlight (A CRI of 100 would be just like natural sunlight). With a simple one-button push, the underwater photographer can switch from the wide 120° beam to a narrow 1500 lumen 15° spot beam. For imaging, the spot beam offers many creative opportunities such as to create a narrowly focused snoot or stage spotlight effect.

The narrow beam feature has a long effective range making it useful to see in dark areas and discover hiding fish. The Sea Dragon Pro Dual Beam also offers two 180 lumen 88° red LEDs. Red light won't affect your own eyes' night vision or scare-off light-sensitive sea creatures, a simple push on the feature button shifts the light from red to the wide beam at 3000 lumens. The diver is ready in an instant to capture still or video images.

The feature control button easily switches to the most popular functions: 3000 (Lumen) Flood > 1500 Flood > 750 Flood > 1500 Spot > 750 Spot > 180 RED Flood > Repeat

The Pro Dual Beam includes a Flex-Connect® Single camera tray, Flex-Connect® Grip, Sea Dragon EVA Travel case, adapter for GoPro® cameras, Li-ion battery, AC Charger, and international plug adapters. Light Head only: 35.300.006 Item SL6791; without case, grip & tray.

Part of the Sea Dragon's impressive performance is its powerful 25Wh 3400mAh Li-ion rechargeable battery pack, that runs the light for 60 minutes at full (3000 lumen) power.

POWERFUL 3000 LUMENS WITH AUTO BRIGHTNESS, FLASH DETECT AND NIGHT MODE
COB design delivers 3000 lumens over 120° smooth, even beam angle without a hot spot. Two red LED's emit a 88° wide beam that won't scare away nighttime sea creatures and preserves your eye's natural night vision. Brightness can be adjusted manually or automatically with its built-in photocell light sensor. The Auto Bright mode automatically adjusts from 300 to 3000 lumens to preserve your eye's natural night vision and extends battery life. Aim the light at your dive computer or other close-up objects and the light will automatically dim. Aim the light at far away objects for maximum brightness. When nearby flash fires, the Flash Detect feature turns the light off for 1 second for optimal image exposure control.

Includes powerful 3400 mAh Li-ion battery with protected circuitry for 60 minute run time at full power. One button operation for easy operation. Includes Flex-Connect grip and tray for mounting to any camera with standard ¼-20 tripod threads. Easy to expand with Flex-Connect™ system of trays, grip and Flex Arm.

- **Body material:** Anodized aluminum light head with fiber-reinforced polycarbonate body
- **Powerful 3000 lumens** featuring BridgeLux Gen 7 Vero COB LED Array
- **Auto Bright mode** adjusts from 300 to 3000 lumens.
- **Auto Flash Detect mode**. Light turns off for 1 second when detecting external flash. Flash detect can be turned on or off. Flash detect works in all 5 light modes
- **One button control for easy operation.** One button to power light on/off and select brightness
- **Five Light modes:** 3 white modes (Manually adjust to 100%, 50% or 25%), 1 white Auto (Automatically adjusts from 10% to 100%) and 1 Red light mode
- **60 minute burn time at full power** (120 min at half power or Auto, 240 min at quarter power
- **Constant brightness** - Regulated circuitry so light won't dim with battery power.
- **80 color Rendering Index (CRI)** that mimics natural daylight.
- **Quick-release button** to detach light and aim in crevices and hard to reach areas

SEA DRAGON 3000F COB KIT

The Sea Dragon underwater photo-video light delivers 3000 lumens in a 120° wide beam without hotspots. A 90 CRI (color rendering index) COB LED array simulates natural sunlight, allowing the user to capture vibrant colors and sharp details in underwater photos and videos. The new patent pending SeaLife Color Boost™ mode combines specific red and white light frequencies, producing a warm and vibrant underwater color effect. Red is the first color in the visible light spectrum filtered out by water. The light's Color Boost feature replenishes the lost red for a balanced, warm color effect. The new dial design delivers fast, intuitive power and brightness control. Rotate to power on/off and adjust brightness. Push the dial to switch between Color Boost and white light modes. Brightness can be smoothly and evenly adjusted from 300 to 3000 lumens without steps or clicks. Adjusting the brightness in Color Boost mode maintains the color temperature of 3900K.

The light can be used as an emergency signaling device by pushing the dial down for 5 seconds. Push and release the dial will switch between SOS, Blinking and Red-only modes. The red-only mode is useful for night dives, so you won't scare off light-sensitive sea creatures. The SOS and Blinking modes have a 20+ run time with full battery charge. Rotate the dial all the way counterclockwise to exit emergency signal mode and power off the light.

Includes a powerful 3400 mAh Li-ion battery with protected circuitry delivers 60-minute run time at full power. Includes Flex-Connect grip and tray for mounting to any camera with standard ¼-20 tripod threads. Easy to expand with Flex-Connect™ system of trays, grip, and Flex Arm.

- Single dial control for fast, easy operation. Rotate to power on/off and adjust brightness.
- Patent pending Color Boost™ mode replenishes the lost red for a warm, vivid color effect.
- Powerful 3000 lumens featuring Bridgelux Gen 8 Vero COB LED Array
- 60-minute run time at full power
- Constant brightness – Regulated circuitry so light won't dim with battery power.
- 90 Color Rendering Index (CRI) that mimics natural daylight.
- 120° wide beam angle evenly illuminates the subject with no hot spots. 90° underwater
- Emergency mode emits a blinking light or SOS signal to alert others of distress.
- Stealth mode – Red-only won't scare off night-time sea creatures.
- Removable 25Wh 3400 mAh Li-Ion battery w/ charger and international plug adapters included.
- Includes standard single tray, grip, and compact travel case.

Technical Specifications

- Color Rendering Index: 90+ (White light and Color Boost)
- Beam Angle: White Light and Color Boost: 120° on land / 90° underwater
- Red-only light: 88° on land / 66° underwater
- Battery: Lithium Ion 7.4V, 3400 mAh, 25Wh (included)
- Battery Charge Time: 170 minutes
- Run Time: 60 minutes at full power (10 hours at low power – 300 Color Boost reduces run time by approximately 20% SOS / 1 sec blink 20+ hour run time with a full battery (white light at full power)
- 10-minute Reserve Power Light dims to 300 lumens for 10 minutes when the battery is nearly empty
- Depth: Tested to 100 meters
- Dimensions 22cm x 24cm x 6cm light head w/battery, grip & and tray 12.2cm x 5.6cm x 10.9cm Light head only
- Weight: 391 g light head only w/battery installed
- Bulb Life: 35,000 hours
- O-ring: Dual silicone O-rings (lube included)
- Buoyancy: Negative; -99 g underwater

835.250.001	SEA DRAGON 2500F PHOTO-VIDEO DIVE LIGHT HEAD (SL6712)	**485,00**

The Sea Dragon 2500F uses flat panel COB LED technology to closely mimic natural sunlight, bringing out amazing colors in underwater photos and videos. With a color Rendering Index of 90, the Sea Dragon 2500F solves the issue of blue underwater photos and videos by giving divers the ability to add light down to 200 feet/60 meters with portable sunlight.

- Powerful 2500F lumen LED light. Latest COB LED array technology
- Three brightness levels 100%, 50% and 25%
- Hidden emergency signal mode. 1 sec blink interval and SOS Morse code. Push and hold power button for 4 seconds to activate
- 60 minute burn time at full power and constant brightness
- 120° wide beam angle evenly illuminates the subject with no hot spots
- Removable 25W Li-Ion battery w/ charger and international plug adapters included
- Depth rated to 60 meters

*** While stocks last**

The Sea Dragon 2000F UW photo-video-dive light delivers 2000 true lumens and a smooth, even 120° wide beam angle. This revolutionary COB LED array technology produces an 80 CRI (color rendering index) that mimics natural daylight. Most other LED's have 70 CRI, missing wavelengths of the visible light spectrum. Uncover colorful reefs and hidden sea creatures with this 3-in-1 photo-video-dive light.

- Body material: Anodized aluminum light head with fiber-reinforced polycarbonate body
- Powerful 2000 lumen LED light. Latest COB LED array technology. True, lab-tested lumens and not "theoretical" lumens specified by most other manufacturers.
- One button control for easy operation. One button to power light on/off and select brightness
- Three brightness levels 100%, 50% and 25%
- Run time: 60 minutes at full power/120 min at half power/240 min at quarter power
- Hidden emergency signal mode. 1 sec blink interval and SOS Morse code (4 seconds to activate)
- Constant brightness - Regulated circuitry so light won't dim with battery power
- 80 color Rendering Index (CRI) that mimics natural daylight
- Quick-release button to detach light and aim in crevices and hard to reach areas
- 120° wide beam angle evenly illuminates the subject with no hot spots
- Corrosion-proof metal light head for heat dispersion and durability
- Removable 25W Li-Ion battery w/ charger and international plug adapters included
- Waterproof battery compartment – even if the O-ring seal fails, the battery compartment is isolated so water cannot reach the internal electronics
- Depth tested to 60m – Guaranteed

SEA DRAGON MINI 1300S POWER KIT (SLKIT08)

Featuring 1300 lumens, the compact Sea Dragon Mini 1300S dive light offers users tremendous brightness and a narrow long-range beam. All light functions are easily accessible with one handed operation to cycle through five light modes.

The compact Sea Dragon Mini 1300S Dive Light will easily slip into your BCD pocket. A wrist lanyard with a BCD-clip is also included allowing divers to secure the light to their wrist or clipped on to their BCD D-ring. **The Sea Dragon Mini 1300S Power Kit includes an 18650 2600mAh battery and USB battery charger.**

The Mini 1300S light is constructed of an Anodized aluminum machined body for maximum durability and corrosion resistance. The dual O-ring design ensures reliable waterproof seal down to depths of 330ft/100m. The light's power and mode button also features a battery charge level indicator, which illuminates from green, to amber, to red when batteries charge is depleted.

- 1300 lumens Using latest Luxeon V LED
- 8° ultra-narrow spot beam (6° underwater) for long range viewing and pointing out sea life
- One button operation: Long push (1 sec) to power on/off; Short push to cycle through 5 light modes
- Five light modes: Full power 1300 lumen, Half power 650 lumen, Quarter power 325 lu-men, Blinking (once per second at full power), SOS (blinking signal at full power)
- Depth tested to 330ft (100m)
- Battery options: Two CR123 lithium single-use batteries or one 18650 Li-Ion rechargeable battery (runtime up to 3.67 hours with a 18650 rechargeable Li-ion 2600mAh battery at quarter power)
- Colored Battery indicator. Green = full, yellow = medium and red = low battery strength.
- Safety pressure release valve relieves internal pressure built-up caused by damaged battery.
- Depth tested to 100m

SEALIFE PHOTO PRO BACKPACK (SL940)

The SeaLife Photo Pro Backpack features a large padded compartment with waterproof lining and 6 adjustable dividers. Furthermore 5 zippered pockets and a larger compartment for laptops or tablets. The back of the backpack offers soft, breathable and comfortable padding; the exterior is made of durable x-grade nylon. The external zippers are made of corrosion-proof material suitable for marine environment. Six rubber feet on the bottom keep the backpack standing upright and not directly touching the ground. Two large drain holes effect that no water will be stuck inside the backpack.

- Professional Photo backpack made of durable X-Grade Nylon
- Padded compartments with 6 adjustable dividers
- 5 zippered pockets
- Backside features soft, breathable and comfortable padding
- 6 rubber feet and 2 large drain holes in the bottom
- Corrosion-proof external zippers
- Retrainer Strap to prevent gear from falling out

835.999.020	FLEX CONNECT BALL JOINT ADAPTER (MALE) (SL96305)	**89,00**

'Flex-Connect' is a range of Sealife Accessories. The trays, mounts and flex arms allow you to easily expand your camera set. Modular for travel and they quickly and easily lock into place.

Flex Arms extend lights with 100° of silent bending motion. Cold Shoe Mount and Micro Tray provide an incredibly compact set-up. Dual Tray enables you to connect multiple lights to your camera.

- Fiber-reinforced polycarbonate and marine grade stainless steel
- Clicks into place underwater or topside
- Disassembles with the push of a button

SCUBAPRO

SCUBAPRO SWEATSHIRTS

MADE WITH RECYCLED POLYESTER.

Recycled polyester makes use of existing plastic.In many cases, those existing plastics are your old water bottles, which are then processed and transformed into products. By purchasing this product you have helped turn the tide - Over 8 million tons of plastic are dumped in our oceans every year – you have helped reclaim it and put our planet first.

SCUBAPRO has partnered with OCEANR.CO Designs for these Sweat Shirt creations.

SCUBAPRO

Can't be in the water every day? Follow @SCUBAPRO on social media for your daily dose of incredible underwater images.

For 60 years, SCUBAPRO has been committed to protecting the oceans. From manufacturing processes & materials to reusable packaging to sponsoring conservation efforts of our Deep Elite ambassadors, we at SCUBAPRO believe we have a strong responsibility to the very environments we love to explore.

We encourage new and seasoned divers to not just dive in, but to experience, discover and protect the oceans. And we lead by example.

SCUBAPRO cares
